

2IM Group LLC

Luis Montgomery, President

Luis Montgomery knows the value of a good education, having attended the prestigious St. Ignatius College Prep on Chicago's Near West Side. Today, as a consultant for the Illinois Tollway, he is helping to educate others about the importance of sustainable transportation infrastructure.

As president of 2IM Group LLC, Luis has established his firm as a leader in stormwater design management. His ability to manage complex designs coupled with his desire to produce measurable environmental benefits is a perfect fit for the Illinois Tollway.

In 2008, when the Tollway was ready to implement bioswales as part of the 36-mile Tri-State Tollway (I-94/I-294) Rebuilding and Widening Project, 2IM Group was awarded a contract to lead the way. The Tollway and 2IM Group introduced innovative "green" techniques

to improve water quality and remove common roadside pollutants along the Tri-State Tollway that will be felt for years to come.

More recently, Luis' firm was selected for three *Move Illinois* projects along the Jane Addams Memorial Tollway (I-90). With the Tollway accounting for more than 60 percent of 2IM Group's business, Luis has been able to increase the size of his firm from three employees to 10 and is currently looking for larger office space to house his growing staff.

"I share the Tollway's vision of developing best management practices to protect our natural resources. With the increasing demand for sustainable solutions in the transportation industry, my firm is well-positioned for future growth."
