

CENTRAL TRI-STATE TOLLWAY

Flex Lane

A *Flex Lane* is located on the left inside shoulder of the roadway and can be used for a variety of safety related needs.

TRANSIT

To provide reliable transit service, buses have the ability to travel in the Flex Lane in times of congestion.

EMERGENCY VEHICLES

To safely reach roadway incidents, emergency vehicles can use the Flex Lane to route around congestion.

INCIDENTS

To provide a safe haven for customers and emergency responders, the Flex Lane can be used in an emergency like any other shoulder.

ALTERNATE LANE

To temporarily re-route traffic and reduce incident congestion, the Flex Lane can be used as an alternate lane for customers to navigate around an accident and create a safe haven for emergency responders.
