Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
07/31/26	Charles Weaver	60089	X	X		X					Support	As a frequent Illinois Tollway customer who relies on the system for business travel, family activities, and recreation throughout the region, I strongly support the Tollway's Driving Connections capital program. The Tollway remains one of the most important transportation assets in northern Illinois, providing safe, reliable, and efficient mobility for residents, visitors, and businesses alike. From my personal experience, the Tollway helps make travel more predictable and convenient, whether I am meeting with clients across the Chicago region, attending community events, visiting family, or accessing recreational destinations. The continued investment in rebuilding and modernizing the system improves safety, reduces congestion, and enhances the overall travel experience for millions of users. I also appreciate that the Illinois Tollway has historically maintained comparatively affordable toll rates while continuing to invest heavily in infrastructure improvements. Compared to many toll facilities across the United States, the Tollway delivers significant value by providing a high-quality transportation network at a reasonable cost to users. This balance of affordability and investment has helped maintain public confidence while supporting the long-term needs of the region. The benefits of previous Tollway capital programs can be seen throughout northern Illinois. Investments in roadway capacity, interchange improvements, freight mobility, and regional connectivity have helped attract private investment, support commercial and industrial development, create jobs, and expand access to employment centers. Many communities have experienced substantial economic growth that was made possible, in part, by improved transportation access and mobility provided by the Tollway system. Driving Connections builds on this successful legacy. By continuing to modernize critical infrastructure, improve safety and reliability, accommodate future travel demand, and enhance freight and passenger mobility, the program represents an investment not only in transportation but also in the economic competitiveness and quality of life of our entire region. I commend the Illinois Tollway for its commitment to delivering a world-class transportation system while maintaining a strong focus on customer value. Driving Connections is a forward-looking program that will continue to generate economic opportunity, improve mobility, and benefit users like myself for decades to come. Thank you for the opportunity to provide these comments in support of the program.
07/31/26	Stephen O'Donnell	61016	X		X		X				Oppose	How can you make the statement that "after more than a decade without a rate increase"? The rates increase every year on January 1st. The tollway was to be paid for "decades ago", you expect us to believe this rate increase you are proposing will end by 2042? You don't enforce any of the lane restrictions which creates all sorts of traffic problems and accidents. You are constantly repairing newly completed roads and ramps adding to the congestion. Dozens of exit and entrance ramps are being reworked causing detours and increased traffic. I am constantly receiving e-mails telling me I have an improperly placed toll tag. But what it actually is, is the exit ramp is under construction (and has been for months). Fix the toll readers and finish the work instead of telling us it's our problem. Half of the overhead lighting on I90 out to Rockford doesn't work and much of it hasn't worked correctly since that project was completed. You have reduced acceleration and merging lanes creating dangerous conditions and which just adds to all of the traffic problems. Raising the rates will not help any of the commuters or solve any of the problems the tollway has, it will just make the lying Illinois politicians richer as usual. Or is it that you need to replace that $80,000 conference room table and $1,200 leather chairs?
07/31/26	Shelly Smith	60148		X	X	X					Support	
07/31/26	Jay Szafasz	46373	X			X	X				Oppose	I do not drive the toll roads in IL all that much but i do notice the only delays I experience is around construction.
07/31/26	Mark	61088					X		X	Cost too high	Oppose	You just took 150 million from road funds and used for CTA and balancing the budget or repurpose. It's not a piggy bank at jb.pritzker discression

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
07/31/26	James Reynolds	60462	X		X					Safety	Support	Transportation infrastructure is vital for a thriving society
07/31/26	Carla MARTZ	60137	X		X					traffic noise control	Oppose	I reside in Glen Ellyn, IL west of the North Avenue-Roosevelt Road corridor (about 2 blocks west of I-355). There is no noise barrier on this side of I-355, unlike the east side of the highway. The noise level in this corridor is extremely high, especially during rush hour. Even outside of rush hour, there is a constant “roar” of traffic. There are times when, sitting outside in my yard, I have to raise my voice in order to be heard by someone sitting right next to me. At night when the weather permits windows to be open, the traffic noise is so loud that I have to wear earplugs to sleep. Summertime is worse as extremely loud motorcycles roar up and down I-355. There is an absolute need for a noise barrier on this side of the highway, especially if it is widened—meaning even more traffic will be traveling along this corridor. The constant traffic roar lowers the quality of life in this part of Glen Ellyn. I strongly urge you to consider erecting a noise barrier along this corridor.
07/31/26	Giancarlo Scarcia	60103	X	X	X						Support	In order to maintain, upgrade, modernize and to keep up with inflationary costs, I feel that tolls should be raised. They are essentially the skeleton tour infrastructure. As a contractor who is currently working on various tollway projects I can see with my own eyes the improvements we are making. However, I also see the short falls of budgets and leaving bad pavement behind causing hazardous situations to the motoring public. It is essential to to continue modernizing our infrastructure because if we let it go now, it will only cost us more down the road.
07/31/26	Jose Valle	60517	X		X		X				Oppose	Whom It May Concern: I am writing to express my strong opposition to the egregious proposal to increase every toll by 40 cents. You could not have chosen a worse time for this proposal. Gas prices are at their highest levels in years, not to mention the rising expenses of car maintenance and repair parts, which have increased significantly due to recent tariffs. Add to that the ongoing increases in the cost of groceries, medicines, electricity, and utilities. Whoever came up with this plan during a time of such severe economic struggle for so many has absolutely no touch with what the public is facing. Before asking hardworking drivers for fare increases, the agency should look into internal areas to cut costs and save money. I understand that it is harder to implement the necessary changes to promote efficiency and accountability, but it is the responsible path forward.This proposal feels like a slap in the face to all of us who are running out of ways to stretch our budgets to the end of the month.Sincerely,Jv
07/31/26	Michael H. Brooks	60448	X		X	X					Neutral	

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
07/31/26	Scott Duff	60007	X				X	X			Neutral	I have used the Illinois Tollways since the 1960's and commend the Tollway Authority on their work building and maintain an outstanding and safe expressway system to meet and exceed ever expanding traffic needs. Prior to automated tolling the toll fee structure at toll booths included CAR + TRAILER (1 axle trailer, 2 axle trailer). This distinct classification for passenger vehicles was eliminated with toll booth removal. Family vehicles pulling a trailer were subsequently, at minimum, classified as "commercial 3-axle". I can understand the desire to simplify but consider also transponders (now stickers) are connected to the license plate and therefore vehicle use (passenger or commercial). This class elimination represents a massive overcharge per vehicle weight for nearly all passenger vehicles. The optics of this just aren't good (i.e. family SUV with jet skis or kayaks vs. cement truck) SUV's plus PICK-UPS represent 80% of passenger vehicles on US roads: approx. weight 4,500 lbs Recreational 1-axle trailers weigh approx. 3,000 max. Total weight SUV/pick-up truck with loaded 1-axle trailer est. -> 8,000 lbs (high) COMMERCIAL TRUCKS with 3-axle weigh 22,000 to 33,000 lbs. Passenger vehicles with 1-axle trailer PAY TOLLS = THREE TIMES their actual weight! The current toll results in most folks with trailers choosing alternate roads. This adds 30-60 minutes for many regional trips (for example Chicago to Madison) using US 12 or US 14. Out-of-state thru-travel families I know who skipped the Interstate and tried navigating alternate Chicagoland IL/US highways got completely confused and added hours to their family trips. The iPass rate proposal rolls over an eliminated class (passenger + trailer), with plans to grandfather in and now increase rates for this decades-old class omission. Passenger + trailer is a very SMALL percentage of daily traffic. Family time and budgets matter. In conclusion, restoring some sort of passenger vehicle class of PASSENGER + TRAILER would seem a FAIR and most positive PR move for the Tollway Authority, one greatly appreciated by Tollway users and their families. Thank you for the opportunity to contribute to the process! Scott Duff Elk Grove Village resident
07/31/26	Tyler Clausen	60152	X	X				X			Support	
07/31/26	Walter L Maceika	60565	X			X	X				Oppose	NO automatic increases.
07/31/26	Narcizo Garcia	60426	X	X	X						Support	
07/31/26	David Johnson	60406	X		X	X					Neutral	I can support the toll increase if the investments are really focused on maintaining top notch conditions, mitigating congestion by reducing bottlenecks to improve travel times, and maximizing regional mobility. For example, I-294 SB at 95th Street is regularly congested and I'm sure this is related to the current configuration of the ramps, traffic patterns, and the nearby interchange between 95th and Harlem. I would love to see design improvements including auxiliary exits or entrances to spread traffic loads, flyover ramps, and things of that nature. It would be reassuring to see and understand how the planned projects are selected to actually address known congestion or safety hotspots, or address known issues of deteriorated conditions. Likewise, some toll booth canopies around the system (such as at 95th Street) are in a shabby and rusted out condition, which would not be acceptable with a large increase toll revenue that should easily cover all routine maintenance activities. I also favor investments that improve regional quality of life such as treating ambient noise as a key design factor. An asphalt overlay and increased use of noise barriers on I-294 south would be very welcome - the roar can travel for miles.
07/31/26	THOMAS TAGLIOLI	60655	X		X		X				Oppose	This rate increase is much too high. I feel that you continue to raise rates just to appease the road builders and continued never ending construction which only adds to delays and frustration. I also fell that I'm wasting my time commenting here because no matter how many people comment, you will pass this increase even if most of the public opposes.
07/31/26	ron	60101	X		X		X				Oppose	Totally against the toll hike.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
07/31/26	Nina Sultanian	60005					X		X	Less construction	Oppose	About 50 years ago, the tollway authority was supposed to sunset when the original construction bonds were paid off. Then, the tollway authority said that tolls would remain but be nominal. Now, the tollway authority wants to raise the rates to more than a dollar per toll. This comes at a time when gasoline is $4.00 - $5.00 per gallon and all of the other governmental units want more in taxes. People who have lived in Cook County for years are leaving because the cost of living in Cook (and northeastern Illinois) has become too burdensome. If the Tollway Authority wants to continue or accelerate that migration trend, then pass this measure. Thank you.
07/31/26	Robert Burger	61761	X				X			Efficient use of currently collected tolls, without an increase.	Oppose	I'm well aware that toll road construction is expensive. I'm pretty sure that a transparent accounting of the current tolls collected per year would be entirely adequate to maintain and improve Chicago Land expressways. There must already be billions available!! I am opposed to an increase, only in that I highly suspect mismanagement of currently collected tolls.
07/31/26	Rick Sniegowski	60439	X		X	X					Support	Maintenance is the key to high quality.
07/31/26	Elizabeth Nicosia	60142	X				X		X		Oppose	The tollway was to paid off years ago. Yet that never happened. You've put tolls at entrances and exits that never had them before. Toll increases put an undue strain on users pocketbooks especially commuters who use it regularly.
08/01/26	David	60548	X		X		X				Oppose	Do not increase the toll. They can't maintain what they have now with the amount of money they have been taking over all these years, more money will not fix the issue. The whole system needs to be audited to make sure the money currently being taken is actually being used to maintain the infrastructure in a proper manner and in the interest of both Illinois taxpayers and tollway users. The Illinois Tollway system is currently experiencing a "glitch" about "unpaid tolls" from years ago that they have not notified tollway and iPass users about in any formal manner and have yet to provide any proof these unpaid tolls are even legit. Several attempts by both iPass users and news reporters to find any answers from the Illinois Tollway have been met with very little and in my opinion, unsatisfactory explanations about this "glitch". In addition, I have yet to see any justification for the increase as the same problems have been plaguing the tollway systems for years. Stop financing failures.
08/01/26	Tony Rodriguez	60441		X	X					Fastest rout to get to my destination	Oppose	Just like the data centers you are putting this information up to see how mad the people are going to be when this goes through. There is no way to stop this toll increase no matter what the people of Illinois say or do! This is going to pass no matter how many people this upsets. Welcome to Illinois!!!
08/01/26	Connie M Ripplinger	53545	X				X		X		Oppose	No, to raising toll prices; have already had issues with overcharging
08/01/26	Martin Moister	60014	X			X	X				Oppose	Toll rates in the Chicagoland area continue to be excessive compared to tolls in other states. Having said that, I am strongly opposed to any tollway increase. I often travel travel to the east coast and experience tolls in numerous other states. It is comparatively much higher per mile traveled to use Illinois and Chicagoland tollways, by orders of magnitude. Further, Toll roads in and around Chicago are often plagued by traffic jams due to the heavy usage. With the usage being so high, you should be capable of managing the current revenue stream from the excessively high usage to keep the roads in good condition. As a result of the above, I am strongly opposed to any tollway increase.
08/01/26		60452	X	X			X				Neutral	Even though the toll rates have not increased since 2012, this is going to be a significant increase over the next few years. I'm retired senior citizen, so this will not affect me as much as drivers who work and use the tollways everyday. I think this will be the hardest on them. I remain neutral because I do also agree on most of the proposed plans
08/01/26	Chuck	60188		X		X	X				Oppose	I can not afford extra .45 cents to travel the tollway, so if it go up to .45 cents I will not use the tollway.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/01/26	Jenay DiOrio	60013	X		X		X				Oppose	First, I got an email on July 15 that there will be meetings in our area - well our meeting was on July 14. So the email was sent a day after the meeting. If you can't manage to send out emails about meetings on time, we are to trust that you can handle multiple millions of dollars? First, do a forensic audit on finances. I am sure you will currently find waste and be able to fund some projects. When you say no to a forsensic audit you are hiding something.
08/01/26		60195			X	X	X				Oppose	I am an engineer who works for the Illinois Department of Transportation, and have worked with the IL Tollway on many projects over the years, and can testify first hand to the amount of unnecessary waste that the Tollway spends mostly on useless consultant labor. The Tollway hires layers upon layers of consultants who typically have very expensive contracts for the illusion of providing professional services toward furthering the Tollway's Capital program, but mostly are an unnecessary expense with a payroll burden three times that of a State employee due to all the overhead. When something is needed, a literal army of consultants end up getting cc'd on emails, often with no one responding or actually helping to solve the problem because there is not accountability. The Tollway only cares about getting their contracts completed on time, no matter the cost, and creating an appearance to the public that they are being good stewards of Tollway customers' funds that they are really not using efficiently or responsibly. Whenever a problem is encountered (often due to design errors by subpar consultant-prepared designs), the Tollway simply throws more money at the problem to make it go away rather than engineering a proper solution. The Tollway absolutely does not need a blank check in the form of a toll increase from passenger vehicles before practicing some fiscal responsibility and accountability to the Toll payers. Drivers will definitely not get a return on this "investment" especially because previous capital programs have already completed all of the major widening and capacity additions to the vast majority of the Tollway's system. Drivers will not see a return on their increased investment of dramatically higher tolls simply to maintain the existing system. The Tollway needs to develop and practice far better spending, investing, and budgeting practices before the public should trust them with ANY further increase in the toll rates. Until then, they can continue squeezing commercial vehicles for higher toll rates as they have done every single year, since trucks are the ones creating all the wear and tear on the pavement (not hundreds of light weight passenger vehicles), even though all consumers (tollway drivers or not alike) end up paying for higher transportation costs for all goods delivered by truck via the IL Tollway system as a result of the already skyrocketing commercial toll rates that no one has any control over except the self-serving Tollway leadership who do not truly have the average Illinois resident's best interests at heart as public servants should (as IDOT management has to because of accountability to the public and the Federal Government who is charged with allocating dwindling funds from the non-sustainable sources of funding that mostly includes motor fuel taxes but not any income from EV users).
08/01/26	mike	600067	X		X		X				Oppose	It would be great if leadership for once came up with a plan that involved something other than raising taxes and fees for its constituants. This is a lazy program that has done nothing proactively, only reactively and was supposed to be temporary. This is very transparent and the reason people are leaving this state in record numbers. embarassing
08/01/26	Nora L Gonzalez	60164	X		X		X				Oppose	I disagree with the increase tolls. There are so many cars that use the tollway who already pay on the hourly. Use the money to fix the tollways accordingly. I live by 294 and North Ave. This area has been worked on only to be torn down and worked on again and then torn down. The connecting communities project is great but the execution was horrible! Stop wasting money doing things multiple times and get it right the first time.
08/01/26	Jean Adduci	60401	X				X		X		Oppose	With the price of everything else skyrocketing, this is not a good time to be increasing prices if it can be avoided, or at least delayed. For those who must travel the tollways for their job jobs, this is especially burdensome. Sadly, the tollways were supposed to have paid for themselves. Of course that never happened. Illinois already has some of the highest taxes and prices in the country. Hopefully the tollway authority will reconsider.
08/01/26	Patrick Johnston	49036	X			X	X				Oppose	We do are best to find ways around the tollway

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/01/26	Simone Johnson	53223	X		X		X				Oppose	Prices for daily living are already high enough.
08/01/26	Madge	60477	X				X			Wishing that Illinois gas sales tax money was being used properly and not given to public transportation	Oppose	It seems that Illinois politicians don't keep their promises to their constituents. Gas sales tax money from the Road Fund given to public transportation so that the riders' fares won't be raised. Why should tollway users help pay for public transportation? Now a 0.25% additional sales tax added to the consumers' purchases to also fund public transportation. Again, users of public transportation riders won't have a far increase. Some things won't be forgotten when it comes time to vote in the next major election.
08/01/26	Sirrion Dixon	60133	X				X	X			Oppose	You're already raping us in fees after we pay 20% taxes please relax
08/01/26	Doc Voelker	53594			X		X			Most other states pay for ~ 40% of the interstate's. Believe IL should do the same	Neutral	IL pays ZERO taxes toward the interstate through ways, not cool. Also seems CHI is a choke point , I80 should totally bypass south by Watseka, decrease CHI traffic bring more economic impact further south
08/01/26	Jayesh patel	60185	X	X					X		Support	
08/01/26	Joel Ashman	60185	X				X			Proper police forces to minimize dangerous conditions	Oppose	Imagine someone from out of state considering moving here only to analyze tolls, property taxes, fuel taxes, and sales tax — all at the high end or the highest of any states. Then they look at the quality of those services and realize they are still underfunded. Can you blame them for opting not to come? Strongly oppose further toll increases until it's proven the system can be managed properly.
08/01/26	Billie	60016			X		X		X		Oppose	Tolls were supposed to be for 20 years only haha you guys are corrupt and the roads still suck were does our money go?
08/01/26	Smith Mitchell	60555	X			X	X				Oppose	This is ridiculous - This will increase tolls by over 50% and cost commuters literally hundreds of dollars. With 1.7 billion in revenue the tollway is banking half a billion dollars a year at nearly 35% profit margin. Turns out that's not enough. With over 5 billion in the bank. 10 billion in debt, taking out an additional 6 billion in debt AND create a blank check to raise tolls every two years. Profit has continued to grow year after year. Save money, pay off the existing debt and then perform targeted projects rather than this sweeping effort that's truly just a slush fund for endless construction and alleged improvements that do very little for drivers. The tollway is drowing in income and wants to take more just because they can. All for the sake of "technological upgrades"? On a road? Really? More like "money pit". This is a classic case of "money is available let's spend it. In fact, let's spend even more than we have." Unilaterally increasing revenues by 800 million dollars just because you feel like it. When does it end? Never. What a grift. Strongly oppose.
08/01/26	Mike Pirrello	61115					X		X	Affordability	Oppose	Already the highest taxed, fee driven, free loading state in the U.S.
08/01/26	Lisa Kimball	53546					X		X	No toll fees	Oppose	The Illinois tollway was to stop charging tolls years ago. It is a mismanaged highway system. Many other states maintain their roads without charging tolls. The state leadership is doing a poor job handling their budget. I oppose any increase increases.
08/01/26	Linda Muscat	60118	X		X	X					Oppose	While 45 cents per car increase is high, and I would prefer a smaller increase, that is not my main concern. A 30% increase for commercial vehicles is far too much! This huge, unreasonable increase will drive commercial traffic off toll roads onto other streets which can cause many issues. I am against the 30% commercial increase. It's too much.
08/01/26		60137					X	X	X		Oppose	
08/01/26	Jennifer Chartrand	60131					X		X	Don't raise tolls	Oppose	We already pay so much. I have Ipass stop raising the tolls
08/01/26	Margaret Bradley	60014	X		X		X				Oppose	Increase id too much! Also, there is NO transparency about the cost of the current tolls when going through them, and that needs to be changed!!
08/01/26	John Bradley	60014	X		X		X				Oppose	This increase is too much money - how about getting rid of some of these tolls???
08/01/26	Ally Mitchell	60532	X		X		X				Oppose	This is the worst. Things are fine how they are!
08/01/26	Chris Jewula	60639	X		X		X				Oppose	Toll amount should be clearly posted at all toll points as it is otherwise deceptive to motorists.
08/02/26	KarenH	60194	X			X	X				Oppose	

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/02/26		60025			X		X			More police presence on the roads.	Oppose	the proposed increase is way to much in these times for daily users.
08/02/26	Bruce Flowers	60634	X		X		X				Oppose	Gee, I'm glad tolls are temporary!!!! Being retired on a fixed income I own a small fishing boat. Right now it cost me a total of $45.00 to get in & out of the state, which is ridiculous. Why can't government stop spending & taking money from Peter to pay Paul. Raising taxes is not the answer.
08/02/26	Rafael Rodriguez	60651	X		X				X		Support	I support the illinois tollway proposal and iam a proud local 150 operator and chicago resident and this proposal benefits Avery illinois resident less pot holes better safer roads faster commute to our destination whith out speeding it avoids accidents 30 to 45 min a day that we can use to spend more time whith our love ones ..less gas consumption less ware and tare better roads safer roads for our kids and grandkids how can you put a price on that my friend pls support the future God bless you all
08/02/26	Brett Olson	60548	X			X	X				Oppose	Tolls are high enough, the tolls were supposed to go away decades ago when the interstate was built and the state is not using the funds appropriately
08/02/26		60193	X		X		X				Oppose	The Elgin O'Hare 390 tollway is expensive so I avoid using it. Subsequent toll increases shouldn't be based on inflation because not everyone gets raises to keep up with inflation. Toll increases should be based on the Consumer Price Index.
08/02/26	Caroline Franek	60517				X	X			I only take it to get places faster	Oppose	I haven't gotten raises to match inflation. I can barely afford rent, I want to purchase a house but am constantly outbid. If you don't address the cost of living then you can't keep adding more costs to us. There should be rent freezes and increases in pay. As a teacher I make insanely less than most other people around me.
08/02/26		60067	X		X	X					Oppose	
08/02/26	Jose Domingo	60453-3878	X				X			Between the Hindsale Oasis and O'Hare has been repaired then torn apart with no clear purpose	Oppose	
08/02/26	John Mamakos	60185			X	X	X				Oppose	Why don't you awful politicians learn how to quote projects better, and work with the funds you have, rather than raking the public over the tax coals every year.
08/02/26	Steve	60134	X		X		X				Oppose	Pay for road updates with the lottery and the egregious taxes you charge us on income and everything we buy in Illinois.
08/02/26	Debbie Flanagan	46143	X				X			What happened to license recognition and no stops to pay and reduced congestion?	Oppose	How can you honestly say the rates have not increased in years? The fees are astronomical. Why doesn't the toll road share funds with EZ pass? Why haven't the lottery ticket sales contributed to improvements? Who at the top owns the Tollway? Why isn't it state or Federally funded as a part of the countries infrastructure. Illinois taxes are out of control and this roadway can't capitalize on those funds? Sounds shady.
08/02/26	M. Ann	60477			X		X			Fiscal Responsibility	Oppose	According to U.S. News & World Report, Illinois ranks #50 out of 50 U.S. states in fiscal stability. In 2025, the Illinois tollway system made $1.7 billion from tolls. The Road Fund is giving public transportation $1.5 billion dollars in gas sales tax money that was intended for highway construction. Something does not seem right. I hope other tollway drivers realize that the wrong people are spending their hard earned money when it comes time to vote.
08/02/26	John Donato	60638	X			X			X		Support	I support this program as it's critical to maintain a good, and safe system for the motoring public. Making improvements reduces congestion which then enables me to spend less time in traffic and more time with my family.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/02/26	Richard Stofen	60565	X		X		X				Oppose	I'm a non-working senior who uses several of the toll-ways primarily to occasionally visit family and friends. The wear and tear of our road systems are primarily caused by heavy multi-wheel commercial vehicles. So any assessments should be measured out accordingly even though I know those fees will be passed onto consumers of their products. Your proposal assesses commercial vehicles a flat rate increase of 30%. The increases you will be assessing me range from 30% to 90% with no opportunity to pass it along for someone else to pay. You state in "Benefits for Communities" - "The Driving Connections will help alleviate traffic for Illinoisans - allowing people to spend more time with their families and less time on the road." I don't think that will be the case.
08/02/26	Cassaundra Rouse	60422	X	X			X				Support	
08/02/26	Robert Brzezon	60622	X		X			X			Support	As a frequent user of the Illinois Tollway, I strongly support the Driving Connections Capital Program and the toll increase needed to fund it. Whether traveling to Schaumburg for client meetings, Naperville to visit family, or Midlothian to see my parents, I have consistently found the Illinois Tollway to be a safe, reliable, and well-maintained transportation system. I understand that the Tollway is self-funded and has not raised tolls in nearly 15 years, despite significant increases in the costs of engineering, labor, and materials. A toll increase is necessary not only to maintain the high-quality system we rely on today but also to ensure it can meet future transportation needs. The program's focus on reducing congestion, improving reliability, and strengthening the region's transportation network will benefit travelers across Northern Illinois by making trips safer, smoother, and more predictable. For these reasons, I fully support both the capital program and the proposed toll increase.
08/02/26	Omer Osman	33308	X	X				X			Support	A healthy Infrastructure is tge foundation for economic progress. This plan along with tge 2019 RBI will maintain Illinois leadership position as a leading Infrastructure and transportation state for decades to come
08/02/26	Douglas Gerber	60067	X		X		X				Oppose	. What formulas are used to calculate and justify this rate increase? . Will the above formulas be shared with Watchdog groups to protect tollway consumers from overstated cost estimates? . Why should leisure tollway drivers pay the same rate as commuter tollway drivers? . Will this increase pay for the destruction of the old tollway cash collection infrastructure? Rates should have dropped when tollway cash collection employees and systems were retired? . Why are tollway efficiency gains through technology not decreasing the toll rate?
08/02/26	Alison Victoria Wright	60102	X	X			X				Oppose	Will start not using tollways if cost increases.
08/02/26	Larry Ivory	61615	X		X	X					Support	
08/02/26	Carl Vande Voort	60542-2105			X	X	X				Oppose	Why does the tollway need an increase? What did they do with all the money they saved when all toll stations that were operated by a live person closed!!
08/02/26	Jane Walsh-Gawlik	60056-1411	X		X		X				Oppose	26.5 billion dollars will probably increase significantly before the project ends. As in all highway projects, traffic will be impacted and terrible for the length of the project, yet, our tolls will keep going up, as you have planned, without the benefit of smooth moving traffic, as we see now in the current project. 15 years is a long time to wait for a promise we can't sure will actually be accurate. It seems our tollways are in constant repair and new construction. If this project goes through, I could be dead before I'd be able to see clear moving traffic. It's too bad we don't have a real transportation authority that would have focused on public transportation decades ago.
08/02/26	Isaac Carrizales	60430	X	X	X						Neutral	
08/02/26	therese karabin	61019-9534	X			X			X		Support	Don't mind paying a little more for better roads.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/02/26		60477				X	X			Fewer road construction projects	Oppose	The Illinois Tollway should pursue cutting expenses in order to keep toll rates unchanged. For example, the Tollway should have been able to reduce expenses by discontinuing staffed toll plazas in 2020. Tollways seem to have more frequent road construction than Illinois interstate freeways that appear adequately maintained. Frequent or long-term construction projects on toll roads make travel more difficult, so the quantity of construction projects should be reduced.
08/02/26	David Lamb	61115	X				X			Unfair pricing -see below	Neutral	However, The Current Rate for a boat trailer with 2 axels is CRAZY EXPENSIVE - at the same rate as a commercial semi truck. I have to avoid the toll road when towing this boat at these unfair gouging prices.
08/02/26	Darius Donaldson	61613	X			X			X		Support	Thanks
08/02/26	Farai Kasambira	60644	X		X	X					Support	
08/02/26	Scott Stack	60803		X	X		X				Oppose	I absolutely do not support a rate increase of any kind. The state just legalized cannabis a few years ago and is making plenty of money through the legalization of a drug. This is simply a lie told by the corrupt and greedy politicians of Illinois to make us think we need a rate increase. Any politician that votes for this will not get my vote come reelection, and I will activately let others know to vote the same way. It's real simple: vote for a rate increase and you lose my vote.
08/02/26	Scott Flamm	60441	X		X		X				Oppose	As someone who drives the tollway daily, the tollway seems to be doing just fine with funding. Also weren't the toll roads only supposed to be temporary until the cost was paid off? Maybe start with a lesser amount per passenger vehicle if you are going to raise rates. For me that equals a .90 a day minimum and increases with inflation adjustments in the future. C'mon read the room and understand the economic times we are in as a state/country.
08/02/26	Joanne Paske	61016	X			X	X				Neutral	I do not agree with automatic increase every two years without a public hear the increase that are propose is higher then the average pay wages. 8% for commercial vehicles is too high. What plans do you have in collecting unpaid fees? Have you ever consider changing the closed lane with baskets to electric tap and go to keep the unpaid fees down? Please update the website. It's not friendly.
08/02/26	Kelly Gaffor	60142-6374	X			X	X				Oppose	In this economy it's irresponsible to raise toll rates this high! This is literally highway robbery! I pay 4 tolls to work each day and 4 tolls from work each day. This will cost me in excess of $1200 per year EXTRA! This is insanity and I vehemently oppose it!!!
08/02/26	Patricia Rios	53704-1109	X		X		X				Oppose	As someone who grew up and lived in the Chicago burb then city proper before moving to Wisconsin (but I still visit family in Chicago frequently), it's imperative to not use taxpayers as unlimited sources of funding. It seems more feasible to limit the increase to no more than 15% (instead of 45%, which is too much). Thank you.
08/02/26	Denise Wilson	60097					X		X	Not increasing tolls!	Oppose	Tolls were to go away not continue to increase...what have we paid for all these years. Tolls should not be supporting city buses and trains. Let those that use that service pay to keep them going.
08/02/26		48823			X	X	X				Oppose	
08/02/26	Kimberly Wilber Mader	60565	X		X	X					Oppose	I have commuted from Naperville to Des Plaines for over 20 years. During that time, there never been a time when I294 has not been under improvement/construction. I have not experienced an improvement in my commute at all. In fact the exact opposite where traffic has worse, frustrating and unpredictable. During that time, I355 and I88 were also under construction. I understand the need for improvements but a justification for improved commute time and predictable commute time is totally inaccurate. It basically seems like a lie to me. To have an increase in tolls is like a double slap in addition to the longer commute times. Tolls were supposed to be temporary yet Illinoians have been paying them for many, many years! I am defnitely not in favor of the project or the increased tolls.
08/02/26	G	60422	X	X	X						Neutral	

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/02/26	Kevin Coulter	60517	X		X	X					Neutral	I would be in favor of the toll increases if: 1) The minute a speed limit reduction takes place for construction, all work is being done full crews 7x24 weather / worker safety permitting. 2) Increased and strict enforcement of those who are not displaying their plates properly to bypass tolls - intentionally modifying plates, illegal covers, not cleaning them, or not displaying them at all. 3) NO amnesty for those who skip tolls. 4) Tell us what the warranty is on the work. 5) Redesign of the 88/355 interchange should come out of the salary/pension whoever designed it in the first place. 6) Guarantee that when completed entire system can be driven at speed limit at any time provided no lane blockage. 7) All speed limits should go +5mph, 88 west of 39 should be 80mph (but strictly enforced)
08/02/26	Valerie Koerner	60513			X		X		X		Oppose	people will not be able to afford to use the tollways as well as fuel their cars to go anywhere
08/02/26	Lisa Goodwin	60190				X	X		X		Oppose	My commute is 90 minutes, predominantly on i90. This is a significant increase in the money I have to pay in tolls. I do not think the tollway is using the money responsibility.
08/02/26	Joe Bauman	60123	X			X	X				Oppose	I recently attended the Belvidere Forum regarding the proposed toll increase and build out proposal. I was disappointed at the format that did not allow for questions or answerers. Only comments. How can we get answers if no questions?? I did note that of the 20-25 people that spoke, over 20 had financial interests in the building portion of the projected project proposals. These included operator and laborers union, engineering firms and planners. All in favor of the increase. Actual comments from users appeared to be 4. Two were against, a third was ok with it and a 4th for it as a retired operating union member. I decided not to speak as I could see that I would get no answers. I would recommend you change the format and do more evening forums so more users can attend. Middle of day makes it tough for them. I did decide to send my points directly to you. Here they are. 1) Automatic increase every two yrs. Bad idea and against it. Perpetual increases do not take into account present status or financial conditions. Increase may not be necessary due to high revenue or operational margins being higher. Regardless of factors, it increases. We already see this with gas tax in Illinois. No one responsible and point at others. In its short history we are now 1-3 in gas taxes in country. True, revenue is way up; but actual construction vs revenue is down. I don't see a lot being done local or state roads other than the Kennedy reconstruction. Also, officials need to take responsibility when in charge of a board. Pointing to a previous board to say they did it is a cop out. Present board needs to approve an increase/decrease as part of their responsibility. Bottom line it is wrong to install permanent increases. 2) .45 increase and 30% on trucks. I am not in favor as too high. I could go with a lower increase of .10-.15 cars and 10% trucks. Tollway is presently has revenue at all time highs, this would provide additional revenue for planned projects. This allows it to fund the necessary projects. Many that use tollway, need it for work. Does cost them additional money to pay for all this in tolls and gas taxes. Unlike public transit that has no increases. (Yes, I know you are not responsible) Extra revenue doesn't necessarily mean a better system. It has to be spent wisely. 3) planned projects. Not against proposed plan; but was surprised at a few. Tristate seems have become a perpetual project. Currently have on going projects in central portions and propose to start (again) on north section. I was also surprised that 490 bypass was included again in funding. This was included in previous plans and funding. Saw agency just released another $175M in contracts in this project. Now appears to be looking at additional funding to complete. Why? Cost overruns? Poor planning cost wise? Too many unknowns in project planning? If this is the case, I can bet that some of those who spoke at the forum
08/02/26	Bill Murphy	60532	X				X			The 88/355 interchange has been an embarrassment for years.	Oppose	My opposition comes from the 60% toll increase for passenger vehicles and the automatic increases every two years. Drop the automatic increases and drop the passenger increase to 30% and I'll change my vote to "approve".
08/02/26	Elias Gonzalez	60618	X		X	X					Support	
08/02/26	Aaron Thomas	60005	X				X			Quicker routes	Oppose	Illinois already made a record income of $1.28 billion dollars in 2024. This is not just a toll increase, but an increase on my cost living! In my opinion all tolls should be decreased to $.25 per toll.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/02/26	Catherine Thomas	60005			X	X	X				Oppose	I oppose this proposed toll increase of .45 per toll and the increase on trucking 30% in 2027. This will be more of a financial burden on us. Illinois was never meant to have a permanent toll road system but when it started in 1973 the goal was for it to be temporary. I also oppose the automatic adjustments every two years moving forward that should be brought to the public for review every two years.
08/02/26	Karen Horwath	60532	X				X			No automatic toll increases. The tollway should have to make its case for each increase.	Oppose	Opposed because of the increases every two years and the huge toll increase (60%) for passenger vehicles. Since I live at the 355 & 88 interchange, My family see a big increases in our ipass account since we have little non-tollway choices. Almost all our local trips include a toll charge,
08/02/26	Bill Horwath	60532	X				X			An accounting of the current funding and surplus. Seems like a smaller project could get completed with current funds.	Oppose	The public hearings were more for the construction unions to show their support for the project, everyone else was at work. It looked like someone provided construction workers with a script to read and time off to attend. The lack of a question and answer session made the hearings useless and were kind of disrespectful to the public. The hearings were just a regurgitation of the website info and the poorly reported articles and news reports by our so-called media outlets.
08/02/26		60101				X	X			Affordability	Oppose	
08/02/26	Diana	60101			X		X			Affordability	Oppose	
08/02/26	Toby Cantwell	61611	X				X			Law enforcement visibility	Oppose	I haven't drove in the Chicagoland area in a while, but I believe there's still enough traffic to cover the cost. A nickel or dime rate increase might not be bad but if we could get a grant from the federal government, that would be even better. The state of Illinois people are already taxed on the gas to drive our cars thank you for your consideration in this matter
08/02/26	Scott Drafall	60110	X				X	X			Neutral	Standard inflation stands at 3-4% per year. I would be for an increase in tolls 3-4% every year on January 1. This is something we consumers can always be prepared for and a mass increase would not stop us from taking the toll roads.
08/02/26	Raymond Young	61108	X		X		X				Oppose	I oppose the "Driving Connects" program. It is too much of everything! Money, concrete, steel, land, etc. We just don't want it or need it. I oppose the toll increase, especially automatic toll increases. If you think an increase is needed you need to present justification for the increase. And you need to operate the system more efficiently. The users are out of money.
08/02/26	Brian C.	60187	X		X	X					Support	Full support of the Tollway to make decisions for it's betterment to users. As a frequent user, the needs for continued maintenance, safety, and travel time reliable is fully understood to require tough decisions such as these rate increases.
08/02/26	S.L. Uhlarik	60076	X			X	X				Oppose	Nope. These proposed increases are way out of line given the current economic realities. Does anyone remember the quaint original concept that the tollways would become freeways within a fixed number of years (which long ago passed)? And now you propose to build in AUTOMATIC increases every two years, on top of a huge immediate increase? Talk about a disincentive to carefully monitor and control the tollway budget and expenditures! Enough of the politics, personal enrichment, inefficient management and lack of responsible oversight of the Tollway Authority. This proposed increase is unjustified and unnecessary and should not be adopted.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/02/26	Paul	60555	X		X		X				Oppose	The proposed private-vehicle toll increases in the Tollway's "Driving Connections" initiative are excessive (57% - ?!!), and dubious for 5 reasons: First, the timing suggests that this price hike is yet another example of the "just-blame-inflation gouging" that is all too common nowadays, whereby private & public sector entities take advantage of the current inflationary climate to increase prices far above inflationary levels, under the rubric of inflation. Ie., taking advantage of beleaguered consumers who have acquiesced to price hikes. Second, the Driving Connections price hike is open-ended, being pegged to inflation in a few years. Of course, if inflation moderates by then, then the Tollway will miss its revenue targets and request another toll hike from the State. Third, the Tollway has boasted in the past that it achieved an operating surplus of nearly a half-billion dollars in 2024! While they are to be congratulated for exercising such financial prudence in a spendthrift state, it seems counter to increasing revenues dramatically further. Fourth, Driving Connections smells like another handout to northern Illinois' politically powerful construction industry. As the ILEPI admitted about a prior ("Move Illinois") funding program: "The economic impacts associated with Illinois Tollway projects have been especially pronounced for the state's skilled construction workforce. Average wages for directly employed construction workers have increased by more than 61% since 2012, outpacing inflation." Driving Connections will increase their wages even higher, by some undisclosed percentage. Fifth, specifically how will the Tollway spend driver dollars? Driving Connections' program goals are vague and littered with ambitious/ambiguous buzzwords that sound like an AI-generated PowerPoint presentation: "prioritizing investments in high impact needs...and making it multifunctional" (Strengthen the System), "streamlining access between diverse regional economic centers" (Drive Economic Growth), "ensure that prior investments deliver lasting impact" (Maximize Prior Investment), "smart planning, strategic partnerships and collaborative projects...such as the Corridor Opportunities for Regional Enhancements" (Expand Regional Access), and, "more sustainable travel experience—integrating technology with infrastructure to broaden mobility choices...improving customer facing technologies, and funding sustainability" (Transform with Technology). These are meaningless platitudes -- corporate jargon meant to dazzle citizens. Finally, the Tollway - a nearly $2B agency - undercuts its message of professionalism and public responsibility by hosting this public comment form on Survey Monkey. Financial documents show that ~20% of its budget is spent on consultants...who rely on Survey Monkey??!!!! Sincerely, Paul
08/03/26		60451	X				X			Everything is within reason	Oppose	I understand prices have gone up on everything, the increase of these tolls are absolutely outrageous!
08/03/26	Kimberly Mensah	60506	X		X		X				Oppose	I submit my position as opposed to the proposed Illinois Tollway increases. While it has been stated that the increase would be used to fund a proposed capital program, understanding the specifics of how the funds are to be applied has been left vague. For instance, part of the proposed increases are adjusted rates every two years beginning in 2029 based on the market inflation and not on budget proposals for specific projects within the program. If those funds will be used to pay for work on the tollway, how will any surplus of funds be applied or distributed? Additionally, there isn't a breakdown of the specific projects within the program which these increases would be put towards. Until there is more transparency regarding how the funds of these proposed increases will be applied, it is unfair to those who use the tollway to shoulder more cost than they may have to.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Kimberly Mensah	60506	X		X		X				Oppose	I submit my position as opposed to the proposed Illinois Tollway increases. While it has been stated that the increase would be used to fund a proposed capital program, understanding the specifics of how the funds are to be applied has been left vague. For instance, part of the proposed increases are adjusted rates every two years beginning in 2029 based on the market inflation and not on budget proposals for specific projects within the program. If those funds will be used to pay for work on the tollway, how will any surplus of funds be applied or distributed? 08/03/26	Sean Ross	60188	X		X	X					Oppose	I am old enough to remember when the tollway was established had a supposed end date for when they were collecting the tolls. I assume the revenue stream was too hard to pass up. Between property taxes, state income taxes, recent sales tax increase, living in Illinois is becoming unsustainable. Right the budgets in Springfield...where is the waste? I have never run my business the way this state does!
08/03/26	Jamey L Martin	60540	X				X			Less government interference	Oppose	Stop raising tolls!
08/03/26	Maggie	60610	X		X		X				Oppose	I cannot afford to have an increase in price for these roads.
08/03/26	Kathleen M. Mikols	60491-9340	X		X		X				Oppose	Money is super tight. While I understand roads need repairs 355 is expensive as it is. I see no reason to raise tolls at this time.
08/03/26	SG	60453			X	X	X				Oppose	I am opposed to the toll increase due to the lack of information communicated regarding the funding methodology and lack of transparency use of current toll collections. First, how much of the new requested increase will go towards the new roadway projects versus overhead and waste. In other words, other than a reasonable cost of living increase, any new toll request should go towards capital and expense of the new roads, not increased administration, overhead. Second, the graph showing the efficiency of current funds ($/mile) does not indicate the total numbers of miles. The size of the system (i.e. number of bridges, versus flat lane road) would make a difference with fixed costs. In order to be reasonable for this type of increase request, I would expect to see number of employees per mile, (efficiency), total salary per mile (is the system paying market rate), overhead per mile (administration costs) to see if the system is using current toll collections efficiently before asking for a substantial, and forever increase. Third, I am totally against asked for the forever increase. Although it can make it easier for future planning, any agency needs to continually reevaluate and demonstrate that additional funds are necessary versus being lazy and just expecting more money to come in the future, no matter how or where it is spent. Forth, what is the need for communications and fiber with the system? Finally, it was mentioned that the part of the funds goes towards sound barriers. In no way should a toll that pays for the roads go towards building sound barriers as that does not benefit the driver. Over my years of driving the system, I have seen fields/farmland converted to residential right next to the existing road. If anyone builds a home near an existing busy tollway, the cost of sound barriers needs to be paid for by the developer/homeowner. That should not be covered by the tolls, which is only for the roads.
08/03/26	Areta Grayer	60411	X				X		X		Oppose	The tolls are illegal already. And should be accessible to all regardless of your economic status..the cost is to high already.
08/03/26	Mark	60143			X		X			No construction	Oppose	Absolutely do not increase tolls. These roads have been paid for years ago

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	John Smith	60156	X			X	X				Oppose	The money that was already in the fund was given to shore up the CTA in Chicago. Drivers never should have to pay for a service that they never would use. If additional revenue is needed why not open all roads in and around Chicago metro to generate funds. With the current toll system there would be no additional slow down and revenue could be raised from all drivers.
08/03/26	Norman R Corsi	60423	X				X			Eliminate the tollway system entirely	Oppose	I am retired and living at a fixed income. Your rate increase proposal limits my usage of the Illinois tollway system that I use to go to various healthcare facilities. Figure out a way to pay for your pensions without burdening the taxpayers. I oppose this increase. Norman R Corsi
08/03/26	Elizabeth Grogan	60516	X	X	X						Support	
08/03/26	Michael Hartman	60060	X				X			Frequent plowing	Oppose	I do not feel this increase is necessary. It appears to be a backroom deal cut to make the special interests happy to support the use of fuel taxes to support the mismanaged transit systems. This increase will also affect what we purchase due to the commercial vehicle increase.
08/03/26	Laurie Salvano	60021	X		X		X				Oppose	Illinois has one of the highest gas prices in the country, the highest property taxes, and it's so expensive to live here. Do not raise the toll. Stop increasing our costs. Thank you for asking for our opinion, I hope it makes a difference.
08/03/26	LJ Winn	60614	X				X			Working machines. Change to drive through systems instead off individual stops with broken arms	Oppose	Where does this money go? I dont see improvements just more traffic and less efficiency
08/03/26	Nancy Conley	60565				X	X			Gets me to 90/94	Oppose	I do not understand this huge increase. There is a current reserve and the money is going to support other programs. I do not trust the system this money will go to roads, Illinois has a track record of not using money for what it is designed for. Illinois has a lack of transparency on budgets and programs.
08/03/26	Manar Nashif	60124	X			X		X			Support	The increase allows for ensuring that the Illinois Tollway is able to, among other items, address critical system needs, address traffic issues and support growth in our region.
08/03/26		60123			X		X	X			Oppose	
08/03/26	Roger Dewey	61021	X		X		X				Oppose	If I can't afford to drive on the toll roads, all the other factors well maintained roads or road side help means nothing. Driving in and out of Chicago adds a major cost when driving the toll roads. I just visit Chicago and don't know how people who live there can afford using tolls every day. I'm retired and on a fixed income and I'll drive to quad cities instead driving to Chicago suburbs to shop because the tolls are an extra cost.
08/03/26	Ryan Ivanov	60004			X		X		X		Support	
08/03/26	Josiah F Carroll Jr	34223	X				X			Expanding use to nationwide tollways	Oppose	The tolls were instituted to pay for the tollways years ago and then to maintain them. Certainly, there has been more than enough revenue collected since the institution of tolls. On-going tolls should be only to maintain the toll roads.
08/03/26	Brendan Ahern	60451	X		X		X				Oppose	The daily commuter in a passenger car should receive a minor rate increase but semi-tuck with multiple axles should be bearing the higher rate increase due to additional axles and weight.
08/03/26	Maggie Kasdorf	60657			X		X	X			Support	
08/03/26	Robert Fetta	60195	X				X			1. Not paying more 2. Not paying more 3. Not paying more	Oppose	Ridiculous. It already costs me over $8 in tolls to drive 45 minutes and back to visit family. Legitimately, I don't want to see anything from Illinois politicians about how Trump is making things more expensive after this. Raise the CTA fare instead, since we redirected funds to help them. https://www.cbsnews.com/chicago/news/illinois-transit-transit-funding-bill-passed/?hl=en-US#:~:text=The%20bulk%20of%20the%20funding%2C%20%24860%20million%2C,bill%20sponsor%20Rep.%20Eva%2DDina%20Delgado%2C%20D%2DChicago%2C%20said.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Edward Balfe	60137	X			X			X		Support	I use the Tollway must days all year round. Keep up the good work. This transportation infrastructure has a positive impact to the Chicagoland economic engine.
08/03/26	Savannah Murillo	60140	X		X	X					Neutral	
08/03/26	Austin Braffet	60145			X	X	X				Support	
08/03/26	Conrnor Overacker	60913	X	X	X						Support	
08/03/26	Justin Morton	60013	X	X	X						Support	
08/03/26	Ullises Santana	60018	X		X		X				Support	
08/03/26	Daniel I Luna	60609	X		X	X					Support	
08/03/26		60062	X				X			less construction delays	Oppose	You only sent this notice AFTER the public forum in my area had been held. Disingenuous at best on your part. The increase is outrageous. Tolls will now be eight times higher than when we moved here and neither inflation or our income have kept any where near that pace. You got rid of tollworkers (good, but that lowers expenses). So who is raking in all the money?!? I am looking at management (including CEO's of construction contract winners.)
08/03/26	Gregory V Norris	60416			X	X	X				Neutral	
08/03/26	Michael Camacho	60652	X				X		X		Support	Do it!
08/03/26	Ryan J Murphy	60053	X	X			X				Support	
08/03/26	Edwin Martinez	92234	X	X	X						Neutral	
08/03/26	Everett Mathis	60620	X		X		X				Support	
08/03/26	Yvette A McGee	60607	X				X		X		Neutral	If it benefit are need on safety road and accessibility to make road smooth to drive on without pot holes to be safely
08/03/26	Aurelio Romero	60632-3105	X		X			X			Neutral	
08/03/26	Ryan Small	61108	X		X	X					Support

08/03/26	Jose Avalos	60623	X		X	X					Support	I’m not the biggest fan of price increases but things have to get done and to me it justifies the increase for better and safe roads for everyone
08/03/26	Juan M Avila Jr	60617			X	X	X				Support	
08/03/26	Lara Kretschmer	60192				X	X			Less construction	Oppose	Illinois already taxes the living daylights out of us. The roads already suck, no tax increase will fix that. I say NO to the increase.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Adalberto Huizar	60103	X	X	X						Support	
08/03/26	Kenneth D Bunton	53181	X		X		X				Support	
08/03/26	Larry Perry	60624	X		X	X					Support	
08/03/26	Jeff Engel	60152	X		X	X					Support	
08/03/26	Juan M Carranza	60544	X		X		X				Support	This will be a great project. It will help get people go to their destination faster, safer and creat good Union jobs.
08/03/26	Herbert W Schrader	61111	X			X		X			Support	
08/03/26	Gerald W Braffet	60115	X		X	X					Support	I don't like tollway increases but can acknowledge that the increase in materials and energy means it costs more to do these jobs. I love what was done with 294 and traffic and would like to see less traffic congestion on all tollways.
08/03/26	Michael Fanella	60156	X			X	X				Support	
08/03/26	Benito Sanchez	60123	X		X		X				Support	
08/03/26	Klaus Ficzko	60103	X				X	X			Neutral	
08/03/26	Dean Argiris	60102	X		X				X		Support	I was one of those individuals who thought that the Tollroads were paid for by my taxes, then I realized all the complexities that go in to maintaining and modernizing our infrastructure. The cost of materials gets higher, populations grow, and as a result our roads get more use and wear and tear. Knowing that the Tollway is 100% self-funded by the tolls paid by users has made me supportive of the system and its needs. When they completed I-90, the frustration of morning and evening commutes went down drastically with less traffic jams.
08/03/26	Eugene Jordan	60408	X		X		X				Support	
08/03/26	Peter A	60517	X		X		X				Oppose	I

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Frank DiGiovanni	60411	X		X	X					Support	The increase will allow for the continued maintainence and expansion of the toll roads, so that individuals who choose to use the toll roads can have a safe commute to and from work. Also, the work performed on the roads is performed by the various trades of Labor, Operating Engineers and Finishers.
08/03/26	Richard J Pieruccini Jr	60103	X	X			X				Support	
08/03/26	Steven A Marano	60068	X				X		X		Support	
08/03/26	Roberto Gonzalez	60630	X		X		X				Support	
08/03/26	Latasha Turner	60652		X	X			X			Support	More jobs for labor
08/03/26	Terry W Jackson	60430	X			X	X				Support	Better roads make everyone's life better , easier driving experience less time behind the wheel less stress (potholes) and the list goes on .
08/03/26	Michael Johnson	60617	X		X		X				Neutral	
08/03/26	Mario Castro	60554	X		X	X					Support	Build for a better tomorrow
08/03/26	John B Barry	60450	X	X		X					Support	
08/03/26	Darrion Brooks	60103	X		X	X					Support	
08/03/26	Shaun Farmer	60442	X		X	X					Support	
08/03/26	Tim Meehan	60042	X		X	X					Neutral	
08/03/26	Spencer Fischer	63080	X		X	X					Neutral	If it helped the people, positive. Help Pritzker, all negative. I've been doing trades around Chicago since before there were tolls and through all the corruption. 30+ years doing the hardest trades, doing what broom pushers and most others feared or wouldn't. Have been through the laborers unions and others only to get no retirements what so ever. My father taught me young, companies take care of you, or you don't take care of them. It's only about use and abuse. And I've never been much for knee pads and chapstick. The "skeleton crew road crews" consisting of sons, nephews, and friends of friends have been a joke everywhere for easily 20 years.
08/03/26	Erik Garcia	60110	X	X			X				Support	let's get this show going
08/03/26	Thomas C Chirillo	60655	X		X	X					Support	
08/03/26	Hector A Perez	60085	X				X		X		Support	
08/03/26	Juan I Arellano	53405-3145	X	X			X				Neutral	There are millions of dollars collected in paid tolls to fix roads/highways every year. Why should the daily highway commuter pay for the proposed toll increase; when the state and federal governments can allocate funds to this project? Yes, it will create jobs for some time, but after that the daily highway commuter will be affected permanently.
08/03/26	Leopoldo Vargas	60016	X		X	X					Support	If Illinois need to increase the toll to support road conditions and support union workers at the same time 15 years of work I think that's a good idea
08/03/26	Amber Owens	46319	X		X		X				Support	Support it if tolls don't skyrocket bcz of it
08/03/26	Maikel E German	60586	X		X		X				Neutral	
08/03/26	Charles A Moravec	60452		X	X		X				Neutral	I understand that major QUALITY work comes with a price tag…I support my brothers and sisters in all local unions and trust there craftsmanship…and yes major work will keep us all working for many years…what I don't trust is our people in office to do the right thing…that's to use TOLLS collected for the TOLL ROAD ONLY…that's why I'm in a neutral position…I was gonna select oppose but people have family's and I understand that people need to work…thank you
08/03/26	Tracy Walton	60619		X	X		X				Neutral	
08/03/26	Darrin J Mitcheff	60408	X			X	X				Support	The tollway is a major road for me to travel for my daily commute. It is very important that the roads are in good condition and traffic is flowing.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Bret Angelos	60453	X		X	X					Support	Well maintained roads are safer roads. The Tollway needs to build on the success of its prior projects and connect more communities.
08/03/26	Aleksandra Djurdjevic	60506	X	X			X				Oppose	Tollway is already expensive and i dont want another increase in price if possible at all. Everything is expensive and prices keep going up all the time and our wages stay the same. Please dont increase the price.
08/03/26	Ricardo Bonilla	60107	X		X		X				Support	Union jobs
08/03/26	Edward Marshall III	60187	X				X		X		Support	
08/03/26	Rosamelia M Sifuentes	60804	X		X	X					Support	
08/03/26	Todd Sullivan	60046	X		X				X		Neutral	N/A
08/03/26	Michael P Bzdyk	60467	X		X	X					Neutral	
08/03/26	Joe Riley	60404	X		X	X					Support	
08/03/26	Thaddeus Wilkins	60430	X			X			X		Support	Ease and predictability of getting to and from work.
08/03/26	Fernando Peñanegra	60632			X		X		X		Neutral	
08/03/26	Mike Shay	60440	X	X		X					Support	The Tollway is an important and integral part of the physical (and digital) infrastructure of the region, state, and nation. It's continued operation and quality are inportant to the future.
08/03/26	Alejandro Herrerapena	60445	X		X				X		Support	Yes.,I support because more money for the state and more opportunities...
08/03/26	Diana Y Bridges	60660	X	X		X					Support	
08/03/26	Christopher Claudio	60651	X		X		X				Neutral	
08/03/26	Mike Greenan	56431	X	X	X						Support

08/03/26	Jack hardekopf	60504	X		X				X		Support	Might get more people to use public transportation like in Europe.hope can upgrade rail, bus services
08/03/26	Kevin Artl	60565	X	X		X					Support	•Good morning. My name is Kevin Artl, and I serve as President and CEO of the American Council of Engineering Companies of Illinois. •ACEC Illinois represents more than 220 engineering firms employing approximately 16,500 people across our state. Our members range from large national firms to small, locally owned businesses that plan, design and help deliver the infrastructure Illinois residents rely on every day. •On behalf of those firms, I am pleased to express our strong support for the Illinois Tollway's Driving Connections capital plan—a proposed 15-year, $26.5 billion investment in northeastern Illinois and the broader regional economy. •Also want to thank the Tollway for inviting ACEC Illinois to participate in the Stakeholder Advisory Group and the continued engagement we have Director Rouse, Manar, Karyn, John and the entire Tollway team.. We appreciate the opportunity to offer the engineering industry's perspective and the Tollway's genuine effort to listen to communities, businesses and other stakeholders. Helping small businesses grow •The Tollway's previous capital program accomplished much more than rebuilding roads, bridges and interchanges. It created meaningful opportunities for Illinois engineering firms and other local businesses to grow. • •That has been especially important for small and emerging firms. Tollway projects have allowed these businesses to gain experience, develop employees, expand their technical capabilities and build the qualifications necessary to compete for larger and more complex projects. •Those opportunities create jobs, strengthen our infrastructure workforce and give Illinois a deeper and more competitive pool of businesses capable of supporting public agencies across the state. •We thank the Tollway for recognizing that a capital program should invest not only in infrastructure, but also in the people and businesses responsible for delivering it. Benefits beyond the Tollway's lanes •The Tollway is a critical part of Illinois' surface transportation network. It connects workers to jobs, businesses to customers, freight to markets and Illinois communities to the national economy. •A system this important requires sustained investment to replace aging infrastructure, modernize interchanges, improve safety, reduce congestion and prepare for future demands. •The benefits extend well beyond just those 6 or 8 driving lanes. Driving Connections is also an investment in job creation, economic opportunity, stronger communities and resiliency. •90 Report last week—robles •We have seen the broader economic impact of Tollway investment along the Jane Addams Memorial Tollway. Following the I-90 improvements, the surrounding area experienced a $650 million increase in assessed value and 6.4 million square feet of new industrial, commercial, retail and residential
08/03/26	Curt Tomac	60545	X	X		X					Support	
08/03/26	Salvador D Garcia	60408	X		X		X				Neutral	Some of these tolls are outrageous

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Dr. Rohan Gayle	60543	X				X		X		Support	I support the toll increases because it necessitates a safe roadway, and it helps in funding critical infrastructure and enhances safety for the patrons that travel the roadways. I also support this effort because it's a user-pay approach that promotes economic growth for neighboring communities and businesses as well.
08/03/26	Roy A Augustine Sr	60538	X		X	X					Support	Keep union jobs flowing
08/03/26	Gregorio Carrasco Martinez	60060	X		X	X					Neutral	
08/03/26	Christine J Miller	60653	X				X		X		Neutral	
08/03/26	Rafael Zarate Jr	60438	X	X			X				Support	
08/03/26	Robert L Tillman	60628	X		X		X				Neutral	
08/03/26	David Donovan	60646	X			X			X		Support	As a person with a larger family including young drivers, I'm concerned with safe roads. Maintenance and upgrades keep our roads safe for everyone. This program will do just that. It will also provide opportunities for communities to grow which will create jobs that are badly needed at this time. I live in the city of Chicago where a lot of the infrastructure is unfortunately crumbling. The Tollway has always been a safe roadway and I would hope we keep it that way.
08/03/26	Mene D Whatley IV	60628	X	X			X				Neutral	Roads infrastructure is crucial
08/03/26	LaDon P Turner	60651	X		X		X				Support	
08/03/26	Jose G Gomez	60085	X		X		X				Neutral	
08/03/26	Everardo Garcia	60632	X		X				X		Support	This is something important for all of us
08/03/26	Mark Lawler	60115	X		X		X				Support	
08/03/26	Joe Webber	60471	X		X		X				Support	
08/03/26	Dan Bullman	46989	X		X	X					Support	
08/03/26	Karen H	60643					X	X	X		Oppose	No more tax hikes
08/03/26	David Torres	60617	X	X			X				Neutral	
08/03/26	Armando Granados	60123	X		X	X					Support	N/a
08/03/26	J	60126	X		X	X					Support	
08/03/26	Matt Smith	60193	X		X	X					Support	The Illinois Tollway is a leader in the transportation industry in the Midwest and the Driving Connections program will allow the agency to remain at the top. The commitment to maintenance, travel times, services and safety are stellar. Most importantly, I feel the new program will help the Tollway maintain a reliable level of service which is so difficult in the Chicagoland area. I feel as a driver that I can rely on the Tollway to get me where I need to do safely and efficiently with minimal delays or substandard conditions. This is very important to me as a driver for me and my family.
08/03/26	David Torres	60617	X	X			X				Neutral	
08/03/26	Thomas Hough	60657	X			X		X			Support	I strongly support the Illinois Tollway's proposed toll increase and capital program because it provides the funding needed to improve roads, reduce congestion, enhance safety, and keep the region's transportation network reliable for the future. Investing in critical infrastructure today will benefit drivers, businesses, and communities across Illinois for years to come.
08/03/26	Joe Raimondi	60101	X		X				X		Support	
08/03/26	Desmond V Beamon	60619			X		X	X			Support	More union jobs for us laboresr hopefully increase in pay cause we wirk very hard physically and under payed
08/03/26	Joe Schuler	60622	X		X				X		Support	
08/03/26	Alberto Aguilar	60060	X		X		X				Support

08/03/26	Robert L Redding Jr	60649	X		X			X			Support	
08/03/26	Blessing Onuorah	60477			X		X		X		Oppose	I strongly oppose toll increase because road should be affordable to everyone. Don't monetize everything so that poor masses can still afford some road trips even with the high gas prices please.
08/03/26	Jafet r Reveles	60440	X		X	X					Neutral	If state plans to increase the toll rate then the their should be a stipulation that the tollway money only goes to construction projects and maintenance. It should not go to fund a budget deficit in Chicago or state pensions.
08/03/26	Ernesto Alvarez	60126	X				X	X			Support	Chicagoland is the United States hub for trains, planes, and automobiles. This is essential not only for the immediate area but for transportation and delivery around the country. Goods may arrive or depart on trains or planes but are always transported on the roadways, along with people and services in the area and beyond. Yes I do support the building of infrastructure to promote jobs, accessibility, and leisure to build a better future.
08/03/26	Willie E Williams	60478	X	X	X						Support	Looking forward to getting it done

08/03/26	Edwin E Medrano	60618	X		X		X				Support	
08/03/26	Brian Manning	60005	X	X			X				Support	As an semi-regular commuter on the Jane Addams - and a frequent user of other Tollway facilities for personal trips - I appreciate the investments the Tollway has made to ensure their driving surfaces are well-maintained, the payment system has become less disruptive, and connections to local destinations have become more robust. I also appreciate that the Tollway has been a good partner to local communities, understanding that roads must first and foremost serve the communities in which they are located, even when those roads principally move mid- to long-distance traffic. I look forward to more meticulous, well-informed decision-making that understands the economic symbiosis of enabling a robust transportation network without diminishing the character and desirability of Illinois communities.

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Josephine Mensah	60506	X		X		X				Oppose	
08/03/26	Margaret Ann Marie	60477	X				X			Honesty	Oppose	It is a shame that Illinois politicians talk about helping working families, but in reality only care about big corporations like construction and engineering companies and unions. Not every worker is in the construction business or belongs to a union. Tolls will be increasing 45 cents in January. Sales tax in northern Illinois has been raised .25 percent. Illinois politicians' actions speak louder than their words. I am hoping that the voters in Illinois remember this when it comes time to vote. I know that I will.
08/03/26	Ruben Ruben Cruz	60632	X		X					Open more lines in the free way.	Support

08/03/26	Patrick A Healy	60068	X	X		X					Support	
08/03/26	Richard C Lenart	60638	X		X				X		Support	Improvements are important
08/03/26	Joe Emry	60126	X			X	X				Oppose	While I understand there is sometimes the need to increase tolls, I cannot support a plan that automatically increases tolls every 2 years. As for the current proposed increase, I do not support increasing tolls because as I understand it, the only reason it is being proposed is because funding that had previously been going to the tollway is now going to public transit. This proposed toll increase is simply a roundabout way of having non-transit users in the suburbs finance transit in Chicago, which is something I cannot in good conscience support.
08/03/26	Rigoberto Carlos	60103	X	X	X						Support	We all know that every needs maintenance and upkeep and as population grows then our mode of transportation needs to grow with it

08/03/26	Brock Ogborn	46322	X		X		X				Neutral	
08/03/26	Edward J Paganelli	46307	X		X	X					Support	This would pretty much save me half my life if we had leas traffic.
08/03/26	ALBERT DICKERSON Sr	60652	X		X		X				Support	
08/03/26	Patrick C Briggs	60626	X				X	X			Support	Road construction has always been a major driver for union jobs throughout the United States. I'll always support improving infrastructure and increasing the amount of laborers that have gainful employment.
08/03/26	Keith Cottrell	60525	X		X	X					Support	
08/03/26	Danielle Gaynor	60455	X		X		X				Oppose	Use the money you've taken from me for 20 years of daily commuting to and from work. Where have those millions gone? You can't keep raising everything when people can barely eat. Based on the road layout, the tollway is my only reasonable option timewise. There's no reason for tolls at all anymore, the roads are no better than regular expressways. They've been paid for. Eliminate all tolls.
08/03/26	J. kredens	60803	X				X			I can't support such an increase in costs	Oppose	The raise is way too much. I'm on a fixed income and it becomes too expensive to travel to see relatives on the tollways. My son also uses it for his business daily. This is way too much of an increase!!!
08/03/26	Debra Posch	60148			X	X	X				Oppose	I travel often and gas prices are high enough. The Stare should use their Motor Fuel Tax first r maintenance. Whe does the State keep raising taxes on the residents who live here?
08/03/26	Gerald McCue	60851	X		X		X				Neutral	
08/03/26	Femi Matimoju	60617	X			X	X				Oppose	This is absolutely a bad timing increment, considering the much we currently had to pay for gas due to the war with Iran.
08/03/26	Maria Garcia	60629	X		X		X				Support	
08/03/26	Michael Magnuson	60067	X		X					Speed enforcement	Oppose	Taxes are already too high and the suburbs are subsidizing Chicago. That is wrong. Stop the annual grants and payments to NGOs that rely on Illinois funds. They need to self- support.
08/03/26	Arnol J Cabrera	60459	X	X	X						Neutral	
08/03/26	Rodolfo Jaime	60085	X	X			X				Support	
08/03/26	Linda Cordin	60609			X	X	X				Oppose	Highway robbery!! Listen to the people who use it regularly...you may lose money instead of making money!!
08/03/26	Maurilio V Valencia	60014	X		X	X					Support	
08/03/26	Pablo J Rodriguez Jr	60402	X		X		X				Neutral	
08/03/26	Kathleen Jones	60451	X			X	X				Oppose	We are way over taxed in Illinois already. Our taxes are mis-managed by those in power and we need to reign in spending before we add additional tolls.
08/03/26	Isaac P Carrizales	60430	X	X	X						Neutral	

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Logan Gunder	60103	X			X	X				Oppose	The 390 tollway from Lake Street to 53 is already very expensive. The daily round trip working 5-7 days per week plus the price of gas is outrageous. Effectively doubling the toll with the proposed increase will make this route unaffordable for me and my neighbors in Bartlett, South Elgin and Hanover Park that commute to Schaumburg and the city.
08/03/26	Jill Kramer	60521-4239	X		X	X					Support	To the Illinois Tollway Board: I support the proposed toll increase. I use the Illinois Tollway every day to commute to work and regularly travel it to visit friends and family. The Tollway provides a reliable, safe, and efficient transportation system that saves me time and improves my quality of life. Maintaining and improving this system requires ongoing investment, and I believe the proposed toll increase is a reasonable way to ensure the Tollway can continue providing the high level of service that users depend on every day. Thank you for your consideration.
08/03/26	Arturo P Arreguin	60107	X					X	X		Support	Laborer strong local 68
08/03/26	Erik Lundgren	60622	X		X	X					Support	
08/03/26	Jessica Faulkner	60616			X		X		X		Support	
08/03/26	State Senator Andrew Chesney	61032	X				X			Please see comments	Oppose	I am writing on behalf of the residents of Illinois' 45th Senate District to ensure their voices are heard regarding the Illinois Tollway's proposed rate increase. The message I have received from constituents over the past several weeks has been clear and consistent: they overwhelmingly oppose this proposal. No one disputes the importance of maintaining safe, reliable roads and investing in critical infrastructure. Illinois motorists expect a transportation system that is well maintained, and I support responsible investments that keep our roadways safe. However, those investments must be balanced with the financial realities facing the families, workers, commuters and businesses that rely on our tollways every day. Illinois already carries one of the highest tax burdens in the country. Families continue to face rising costs for groceries, housing, utilities, insurance and other everyday necessities. Employers are struggling with higher operating costs, and many commuters are already stretching their household budgets. Against that backdrop, asking Illinoisans to absorb the largest tollway rate increase in state history sends the wrong message. Over the past several weeks, my office has heard from thousands of residents through calls, social media, emails and responses to our districtwide survey. Their concerns have been remarkably consistent. They believe this proposal places yet another financial burden on taxpayers who already contribute more than enough. As elected officials and public servants, we have a responsibility to listen to the people we represent. The residents of the 45th District have spoken, and they deserve to know their concerns are being taken seriously. I respectfully urge the Illinois Tollway to reconsider this proposal, explore cost-saving alternatives and work toward solutions that maintain our transportation infrastructure without placing additional financial strain on Illinois families and employers. Thank you for your time and consideration. I appreciate your willingness to review the concerns of the people I represent, and I hope their voices will play a meaningful role as the Tollway moves forward with this decision. Sincerely, State Senator Andrew Chesney 45th District

2026 Illinois Tollway Proposed Rate Increase

ONLINE PUBLIC COMMENT FORM REPONSES *(June 18, 2026 - August 3, 2026)*

Date	Name *(optional)*	Zip Code	Which of these factors is most important to you when traveling on the Tollway? (choose 3)								Which best summarizes your position on the proposed toll increase?	Comments *(optional)*
			Well maintained roads	More access points (entrance and exit ramps)	Less traffic	Predictable drive times	Affordability	Connections to buses, trains and airports	Driver services (roadside help, rest stops)	Other (please specify)		
08/03/26	Anthony Kusch	60512		X	X	X					Support	
08/03/26	Dominic Rizzo	60176	X	X	X						Neutral	
08/03/26	Robert Lamar	60130	X		X		X				Support	
08/03/26	Michala	60004	X		X		X				Oppose	
08/03/26	Diane	60457			X		X			Price	Oppose	
08/03/26	Cathy Knight	60076	X			X				Meaningful Signage	Oppose	I believe independent oversight is needed over the Illinois Tollway System. Huge Projects are built with minimal consideration of impact on local traffic, local business and driver tolerance or the multitude of nearby tollway projects that drivers have to navigate from March-November. The governor should have tighter reins over this agency but no prior administration has ever suceeded in this area (or even tried). I am a lifelong Illinoisian - I have lived through many tollway projects (IL 53 expansion, building and expansion of IL 355, building of new IL Rt.45/Grass Lake Rd, Lake Villa, never-ending IL 294 tollway projects). I have NEVER seen a comprehensive short-term/long term budget of the Illinois Tollway system. I am appalled at seeing how Some projects have been administered - just having to drive through the above mentioned projects. Driving on IL 294 south of O'Hare airport is a dangerous disaster that has been going on for years; no end in site, no public announcements (TV, newspaper, their own websight) about this project. I am disgusted with how one lives through a 2-3 year project, then 3 -4 years later the same roadway is torn up and the project starts all over again (IL 294, IL I-80) I don't believe in giving the Illinois Tollway System a rate increase with no boundaries without more public transparency or oversight. To me, the Illinois Tollway system is a huge bureacratic slush fund that needs more transparency and independent oversight before it is given more taxpayer money.
08/03/26	Pat Jones	60435	X				X			Lower tolls	Oppose	The Tolls are already too high the original reason for tollways has been hijacked into a for profit business as opposed to a way to make better roads. It's shameful that working people have to continue to get sold out by this state. Shame on all involved
08/03/26	Carol Poindexter	60706			X	X	X				Oppose	Typical Democrats who tie increases to the CPI, just like the gas tax. That way politicians can deny that they're raising fees and taxes. I strongly oppose this increase and indexing increases. The tollway was supposed to become a freeway decades ago. How about investing in more public transportation. So people won't need to drive? A huge increase in tolls will Push more traffic onto secondary non-roll streets and roads which are already congested.
08/03/26	Dylan D Quesada	60455	X		X		X				Neutral	
08/03/26	Angel G Camarena Gallegos	60110	X		X		X				Support

I saw the press release about the proposed increase for commercial vehicles was 30%. When I clicked the toll calculator link in the
press release to see how this would impact us, a Trucking company, the calculator showed that tolls for 5-axle large trucks are almo
st doubling in 2027. Is this accurate? Is this a calculator error? For reference, this is what I used: Entry Point I-294 NB 75th str
eet, Willow Springs, Exit Point I-94 WB Exit Russel Rd. Vehicle Class 5 Large Truck (5+ Axles), Daytime 6 am-10 pm. Calculated Rates
came out: 2026 Rates $41.30, 2027 Rates $80.55

Subject: Important Comment on New Plans

Hello,

Thank you for allowing feedback. The increase of semi-trucks / 18 wheelers on the roads has increased so much!

If they can't haul more on the railroads, then a separate designated lane or lanes for giant trucks would be great. (Very separate!)

They are dangerous and they are tearing up the roads! Road trips used to be fun and now they are terrible and exhausting! Even the best toll roads under constant construction. It is all because of these trucks and these companies should pay for this!

Our votes are to make the trucks pay for this, not all of us other commuters! Please! They make the roads unsafe for cars and their heavy weight is destroying the pavement! Please give them a separate place to drive and make their companies pay for it!

The Roman Family

This is typical IL- the tollways are constantly under construction yet the budget and funds are not properly managed. I oppose this because I have been traveling for over 25 years across Chicagoland tolls and never does it feel like construction works and rates always go up, with no clear implementation of what you say you. Will do. I oppose.

Other states have more affordable rates and passes, yet even better managed roads and toll systems. Y'all should be able to figure this out without needing to price gouge your customers any more.

I oppose this.

This is NOT an Illinois plan, this is a Chicago plan funded by all of Illinois. Hearings are not even being held outside the 4 county area.

While all the equipment is entering O'Hare Airport from the 390 use that equipment to also extend the 390 Bike Way across York Road to where a future parking lot will be built. 15,000 employees in the airport would like a chance to ride to work.

Subject: Stop the increase to our tolls

No increase to our tolls. We pay state taxes and that should be more than enough for the state to figure out what ever is needed to fund the Driving Connections," plan. The state government can figure out how to fix roads, build the bridges, and reduce traffic congestion. With AI and water price increases and social security being depleted by 2030 and the cost of living and the cost of gas and the cost of a car and no tax breaks and no oversight from the government and the elimination of snap and Medicare and no coverage for health care and education cuts and no credit card debt protection, the burden that is being placed on your average American is already being pushed too far. Enough.

Subject:	Re: Opposition to Proposed Illinois Tollway Rate Increases
Date:	Friday, July 17, 2026 8:43:19 PM

July 16, 2026
Illinois Tollway Communications Department
2700 Ogden Avenue
Downers Grove, IL

Dear Illinois Tollway Communications Department,
We strongly oppose the proposed toll increases. Before asking Illinois residents to pay more, the Illinois Tollway should demonstrate that it has thoroughly addressed waste, inefficiency, unnecessary administrative costs, and opportunities to improve operational performance. Taxpayers deserve confidence that every existing dollar is being managed responsibly before they are asked to contribute even more.

Higher tolls disproportionately burden working families, students, commuters, small businesses, and those who have no practical alternative but to use the tollway system every day. These costs accumulate quickly, effectively becoming another tax on people already struggling with the rising costs of housing, groceries, fuel, insurance, and education. Illinois should be making it easier, not more expensive, for people to get to work, attend school, and support their families.

We urge the Illinois Tollway Board to reject any toll increase until it conducts a comprehensive review of its spending, identifies measurable cost-saving efficiencies, and demonstrates a genuine commitment to fiscal responsibility. Illinois residents expect government agencies to manage resources wisely before shifting additional financial burdens onto the public.

Thank you for considering our comments.

Respectfully,

Shannon Hopp

This proposal is absolutely absurd! We all know that the Illinois toll road is a money pit that is a never ending means to line the pockets of state admins and contractors. There is nothing wrong with intermittent repairs but 26 billion is unneccessary and a fiduciary burden for all those who travel on these roads! I"m old enough to remember that the tollroads were just a 'temporary fix' and now have become a permanent drain on already compromised incomes. ENOUGH! I VOTE NO. Jean Fendt Evergreen Park, IL

To whom this may concern,
Tolls are coming in 24 hours/day. How is it that this is not enough. Who is in the charge of budgeting costs and where is the money going? No longer emply toll booth operators as well. Why would the cost for citizens double. If anything the fees should be cut by half.

Is the person in charge of organizing contracts causing this loss of funds?
Please reply, Thank you
Kathleen O'Rourke-Patrick

This is absolutely absurd! The state of Illinois and their politicians are crazy! The citizens of Illinois just continue to get taxed to death and now they what to double or more than double our cost to drive on the tollway. And the email arrived today, July 19 while the hearing in my community was held on July 15! Just another Pritzker tactic! How do we find out more about this and why do they want such a high increase in the tolls? Will they be holding another public event on this topic in the DuPage County area?

Hello Lauren & Karyn,
I got your contact information from Susan Mudd, who very much appreciated your conversations and openness to sustainability ideas, which we have incorporated into our comments. Unfortunately, I received an error message trying to submit our comments right at 12:00, so I'm hoping you can help get them into the docket.
Thank you!

ENVIRONMENTAL LAW & POLICY CENTER

RESPIRATORY HEALTH ASSOCIATION

On behalf of the Environmental Law & Policy Center and the Respiratory Health Association, thank you for this opportunity to comment on the Illinois Tollway Authority's proposed Capital Investment Program.

Before proceeding, we'd like to thank the staff of the Tollway Authority for their work across the region and their open communication with us in the formation of this program. But let's also acknowledge that this capital plan was created in no small part to justify a pre-existing legislative mandate to raise tolls. Rather than asking "how much money do we need to build the system we want/need?" the plan asks, "how do we spend the money we were told to raise?" The tail is wagging the dog.

Northern Illinois is now in the curious position of contemplating resurfacing roads in the *best* condition while allowing roads in the *worst* condition to continue to deteriorate. For example, the plan proposes to rebuild I-90 tollway, although the segment from O'Hare to Rockford was rebuilt just a few years ago. Meanwhile, non-tollway highways, such as the Stevenson and Eisenhower, are in rough shape and in greater need of repair. Since many of these inner roads are *also* used by Tollway customers continuing their journey into and out of the city, perhaps those customers would benefit more from the Tollway Authority assisting in their maintenance, rather than excessively rebuilding the toll roads.

The transportation sector is now the largest source of carbon pollution in the United States, and it continues to grow despite increasingly fuel-efficient cars. Why? Because people are driving more. Vehicle Miles Travelled (VMT) continues to grow more than population growth.

The proposed Capital Plan will exacerbate this problem.

The plan calls for the addition of at least 44 miles of new lane capacity. Adding lanes not only costs money but does nothing to address congestion as it simply induces more road travel. A travel demand forecasting model developed by RMI suggests that this new capacity will add

229-344 million vehicle miles of travel, generating an additional 1.2-3.7 million metric tons of CO2 pollution in our region through 2050.

These roadway expansions are not needed. While the plan makes vague reference to our population as a "growing region," the population of suburban areas served by Illinois toll roads have not grown as quickly as projected and remains largely flat. In fact, CMAP projects the region's population will fall between 2040 and 2050.

There are better ways to use these new toll revenues than gold-plating and widening our region's tollways at the expense of our health, environment, and budgets. For example:

1. **Bus on Shoulder** – We appreciate that the Tollway Authority has worked with Pace to make bus-on-shoulder corridors successful on the Jane Addams and is open to doing more of it. However, further expansion is not reflected explicitly in the Capital Plan. Additional investments in bus-on-shoulder capacity for PACE buses would encourage public transit, reduce congestion, and reduce carbon pollution. While the new Northern Illinois Transit Authority gets set up and works with Pace to plan new routes and frequencies, the Tollway Authority should set aside funds now for busway improvements to come. The Authority should also consider making this shoulder capacity available to private bus lines – eg. Greyhound and private workplace shuttles -- that also serve more people per lane mile and reduce environmental impacts compared to personal passenger vehicles.

2. **Metra facilities** – Taking the bus-on-shoulder idea a step further, we note that there are numerous points where toll roads intersect Metra rail lines. This suggests opportunities to invest newfound tollway dollars in developing and improving Metra stations at these intersections. A preliminary study of such potential opportunities would complement the Authority's other investments and the spirit of the NITA legislation which made these new toll resources available to the Authority.

3. **EV Charging** – Illinois is behind many other states in our electric vehicle charging infrastructure for passenger cars, buses, and trucks. Installing DC fast chargers at both the fueling and food areas of the Tollway oases would help ensure a charger is available and visible where drivers need it. We understand the Tollway Authority is now wisely requiring a few chargers at the fueling and food courts as part of the new leases. While there are now or will soon be funds available, it is time to invest in clean transportation and reduce emissions by future-proofing the sites. We can avoid the need to retrench by doing sufficient make-ready work now, so that as EV use increases there will be an equal number of chargers as fuel pumps installed and operational to serve light-, medium- and heavy-duty vehicle drivers.

4. **Shore power hookups for heavy-duty vehicles** - The Tollway Authority's plan to improve truck parking facilities creates an opportunity to think electric. Shore power hookups for diesel trucks reduce idling by powering heating, cooling, and other electrical needs without having to run polluting engines. We are aware that the Tollway has already installed shore power at Markham and that it is up and running. Trucks, buses, and other heavy-duty vehicles will also need more electric charging as the sector grows. So, investing Tollway dollars to provide this essential infrastructure at ALL its truck parking areas as they are planned/developed will encourage zero-emissions fleets to expand and reduce air pollution. Nearby communities and neighbors will appreciate the reduced noise and air pollution from shore power and electric chargers replacing idling diesel engines.

5. **Clean Construction Equipment** - The Tollway Capital Plan includes billions of dollars of construction, including bridge replacements and rehabilitation, drainage systems, miles of road reconstruction and more, most of which will be done using heavy equipment. Years ago, the Tollway committed to using cleaner equipment and requiring old equipment to be retrofitted to reduce small particulates (PM2.5) by 50%. As Illinois EPA has determined that the entire Chicago region does not comply with federal PM2.5 air quality standards, we strongly urge the Tollway to update that requirement to reducing PM2.5 by 90%. Specifically, contracts should require the cleanest diesel equipment available (Tier 4) and incentivize electric options for those types of equipment where it is now or becomes available. As projects are put out to bid, they can mandate a minimal percentage of zero-emission equipment, which can progressively increase over time as more electric-powered zero emission equipment is available (eg. 2% in 2027, 4% in 2028, 8% in 2029). The incentive structure and payments could in fact help smaller or minority-owned companies make the transition to cleaner equipment that may only be owned now by some of the larger firms. By implementing such a progressive approach, the Tollway can ensure that its jobsites become less polluting and healthier for the workers on its sites over time as cleaner equipment is required in future years.[1]

6. **Low-Carbon Materials**:

1. Almost every segment of the Driving Connections Plan includes roadway resurfacing. It is not clear from the Plan fact sheets whether any of this is planned to be done with low-carbon pavement. This would complement the Illinois Department of Transportation's program to test low carbon materials in 2027 and mandate them by 2029[2].
2. The numerous bridge replacements/rehabilitations and some of the road reconstructions will likely require rebar. We suggest the Authority, if it does not already, specify green steel made with low carbon production techniques.

In conclusion, regardless of how this funding came to be, the Tollway Authority must carefully consider how and on what to spend it. To make the most of our region's limited resources, reduce long-term maintenance needs, and better serve the people of Chicagoland, investing in transit, shore power, electric infrastructure, and cleaner equipment are preferable to expanding and resurfacing highways that are already in excellent condition. As more details come together

to flesh out this capital investment plan, we anticipate taking a much deeper dive into the specific proposals.

Completely oppose a toll increase!!!! I use the tollway weekly from Ogden to Dempster. What a nightmare over the past years. Gas pr
ices are so high and I just burn fuel sitting in painful traffic because the construction has gone on soooooooo long !! Why should w
e pay more? The tollway needs to tighten up their own office and not pass it along to working taxpayers.

Thank you for your email regarding the proposed increase of Illinois toll roads by the Illinois Tollway. Our office has forwarded your email to our Tollway liaison as any formal toll increase is approved directly by the Illinois State Toll Highway Authority's Board of Directors.

> Most urgently, the toll increase equates to a 68% increase in tolls paid during my daily commute through six toll plazas from Downers Grove to Hoffman Estates. This increases my annual commute budget by more than $600 per year! The naive answer is to get a new job closer to home. In our current job market that is far easier said than done, particularly when you work in a specialized field. Nonetheless, I am now faced with looking at my commute budget and determining if it is worth the cost or should I double my efforts to leave my current position of more than ten years to find a new job in my field with a more suitable commute.
>
> I disagree with the need or wisdom of the actions planned in the tollway's strategic plan. It may result in short-lived gains, but will increase traffic during construction, drive many commuters onto surface streets (which shifts maintenance costs to the counties), and further

Warren, thank you for reaching out to the office of Illinois State Representative Bob Morgan. We take your concerns seriously, and we thank you for bringing your concerns to our office.

I will follow up with the Illinois Tollway and circle back with you to see what the process was in order to decide where public hearings would be held.

Wishing you all the best. Have a great weekend.

Message:
The Illinois Tollway is intent on major toll increases. My first comment is the locations selected for public hearings do not seem to reflect thr demographics of the users, e.g. how many users reside around North Chicago versus in more centrally located venues in southern Lake and/or northern Cook counties.
My question is have there been impact studies of the increased tolls resulting in a marked increase of southbound truck traffic diverting onto U.S. 41 at the Waukegan tollway – 41 split, continuing south and combining with an influx from the Edens spur and then continuing down the Edens to the Kennedy and on through the Loop? If there have been studies, where have they been publicized? I don't believe that it takes a rocket scientist to project there will most likely be a substantial eighteen wheeler traffic impact to avoid the tolls and wit it increased truck accidents with passenger vehicles through the above described thoroughfares.
Thank you for your attention.

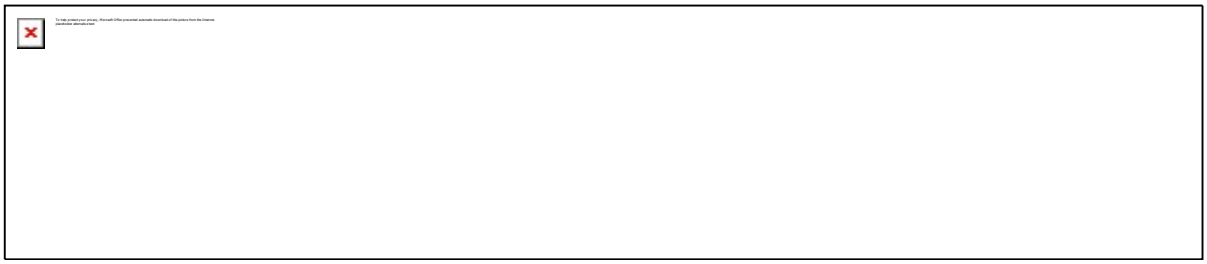
When I pressed the submit your comment here, there is nowhere to submit your comment. It goes to a webpage that has no "submit your comment" button.

My comment is that **I should not have to pay in addition to my taxes for good roads!**



I hate using the tollway and resent you. The fact that you charge $3.00/missed payment is RACKET. It should be illegal.

Lori

Subject: Re: Illinois Tollway Proposes New Capital Program and Updated Toll Rates

As it is in Illinois our taxes on everything are too high. I am now in the senior category and can barely afford to stat afloat right now. With raising the tolls and you're insensitive thinking that you're creating more time to spend with your family is ridiculous. All they are doing with raising rates is causing more people to travel in order to get better paying jobs to help support themselves or families with these continuous rising costs. Many people are moving further away to small towns to avoid high city costs but are traveling further for higher paying jobs. The costs in Illinois are outrageous and will be pushing more people out of state. Something must be done to change this. The state is pushing people to poverty especially senoirs.

Your link to provide comments does not work
I am someone who uses the toll road at about $40 per month
Gas is $1.25 higher. My insurance increased 35% even though I have not had an accident in 40 years and now you want to increase each toll by $.45
The only ones who will benefit will be the construction and concrete companies and there employees !
Perhaps it is time to leave the state as I will not get any benefit from the increase, food is higher, utilities are higher.
Cost toget to work will increase without a pay increase.
I would vote no to the increase.
Lee

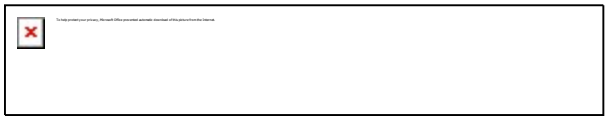
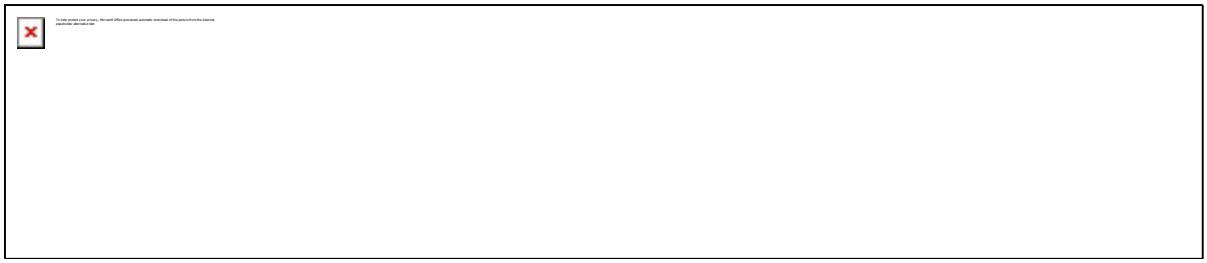
To those proposing this program,
I Derek Fritz of Flossmoor Illinois absolutely and whole heartedly am against this increase! The blatant mismanagement of Illinois reason for deteriorating roads, bridges, public transportation, electrical and water systems over the past 30. The state and local governments are so bloated with headcount and salaries, basic services have suffered.
As a solution all Illinois politicians can do is avoid making the hard choices and raise taxes again and again, because citizens are used to them always going up.
You and others like you are killing, have killed America!



Stop this plan right now!!



Derek Fritz

No no no on toll rates !!!!!!!!
I leave in the north west suburbs I am know avoiding the toll way as much as possible and so our outhers which puts more traffic in our communities.we just mega money on the 90 going from 294 to Rockford their should not be any outer major expense to raise tolls .
What blows my mind Wisconsin Minnesota, Iowa, Missouri,Tennessee,seem to manage their budget.WE CANT MORE MORE MORE.
And why don't Chicago have on and off tolls. To me that's a political problem.

This is unnecessary. The tollway Authority should have money to burn. They are paying way too much to the companies maintaining our tollways. Of course our politicians get some back through campaign donations. It is a way for politicians to enrich themselves. It should not be passed. Any decent politician should reject this proposal.

The Illinois Tollway has proposed its next long-term capital program, Driving Connections, a 15-year, $26.5 billion investment intended to improve traffic and enhance road conditions, providing Illinoisans with a resilient, modern system built to support a dynamic region for generations to come.

About the Proposal

Benefits for Communities

The Driving Connections will help alleviate traffic for Illinoisans – allowing people to spend more time with their families and less time on the road. The plan will also fuel economic development by creating thousands of engineering and construction jobs, support suppliers and small businesses while improving commerce and economic development.

Subject: Re: Illinois Tollway Proposes New Capital Program and Updated Toll Rates

To the Illinois Tollway Board of Directors,

I am writing because I am tired of watching Illinois drivers be treated like an endless source of revenue while receiving little transparency about how billions of dollars in tolls are actually being spent.

For years, motorists have been told that higher toll revenues and massive capital programs are necessary to improve our transportation system. Yet taxpayers and tollway users continue to see reports of management deficiencies, procurement concerns, cost overruns, delays, and recurring audit findings. At some point, the excuses need to stop.

Illinois drivers deserve to know whether every major project over the last decade delivered what was promised. Which projects went over budget? Which projects were delayed? Which projects required expensive change orders? Which projects failed to meet their original objectives? Why are these problems allowed to continue without meaningful accountability?

It is unacceptable for the public to be expected to simply trust that billions of dollars are being managed efficiently. Trust is earned through transparency, measurable results, and accountability—not public relations statements.

The Tollway has an obligation to treat every dollar collected from drivers as if it were your own money. Instead, many Illinois residents are left wondering whether waste, poor planning, and bureaucratic inefficiency have become accepted as the cost of doing business.

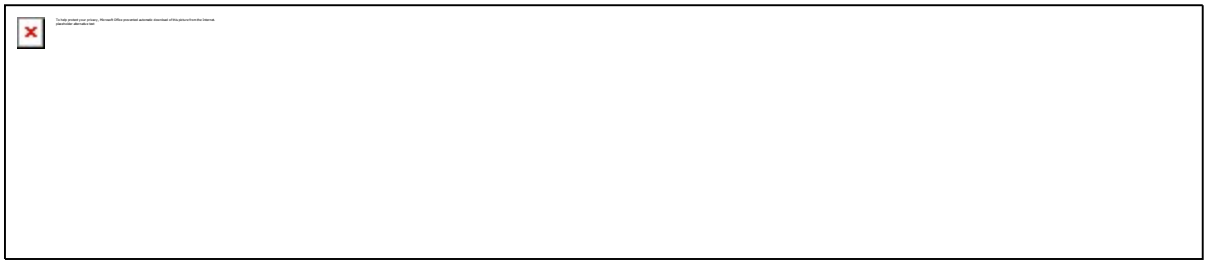
I expect the Illinois Tollway to publish a comprehensive, project-by-project accounting for every major capital project completed over the past ten years, including original budgets, final costs, schedules, change orders, performance outcomes, and an explanation for every significant deviation.

Illinois families are paying enough. Businesses are paying enough. Commercial drivers are paying enough. We deserve more than vague assurances that everything is working as intended.

The people funding the Tollway are not an unlimited source of money. We expect responsible financial management, honest reporting, and leadership that is willing to answer difficult questions instead of hiding behind bureaucracy.

It's time for the Illinois Tollway to demonstrate that it is as accountable to the public as the public is expected to be when paying every toll.

I expect a substantive response addressing these concerns—not a generic form letter.



Sincerely,

George Gounaris
Illinois Taxpayer and Tollway User

Subject: Re: Illinois Tollway Proposes New Capital Program and Updated Toll Rates

Everything has become so expensive that I avoid using the Tollway whenever possible. I used it once this year. Before, I used it almost weekly. If the hike goes through, will use the Tollway less. In the beginning, tolls were supposed to be phased out. Whatever happened to that?

Sounds like more of the governor's pie in the sky spending. If the roads were built correctly in the first place, they would not need replacement so often.

About the Proposal

Benefits for Communities

The Driving Connections will help alleviate traffic for Illinoisans – allowing people to spend more time with their families and less time on the road. The plan will also fuel economic development by creating thousands of engineering and construction jobs, support suppliers and small businesses while improving

commerce and economic development.

Joining the Conversation

The Tollway will also host public hearings in all 12 counties, where attendees can provide in-person comments.

Hearing Schedule

Funding the Capital Program

To fund this transformative investment, the Board of Directors is proposing an increase to toll rates beginning in 2027, including Increases for I-PASS passenger vehicles of around 45 cents per toll and 30 percent increases for I-PASS commercial vehicles. In addition, the Tollway is proposing to adjust rates in accordance with the Consumer Price Index every other year to provide cost predictability for customers.

Proposed Toll Rates

Make Your Voice Heard

The Tollway is seeking feedback from its customers.
Comments must be submitted by noon on August 3, 2026.

Submit Your Comment

Thank you for continuing to be a valued customer. We look forward to hearing your feedback and continuing to provide communities with safe and reliable infrastructure.

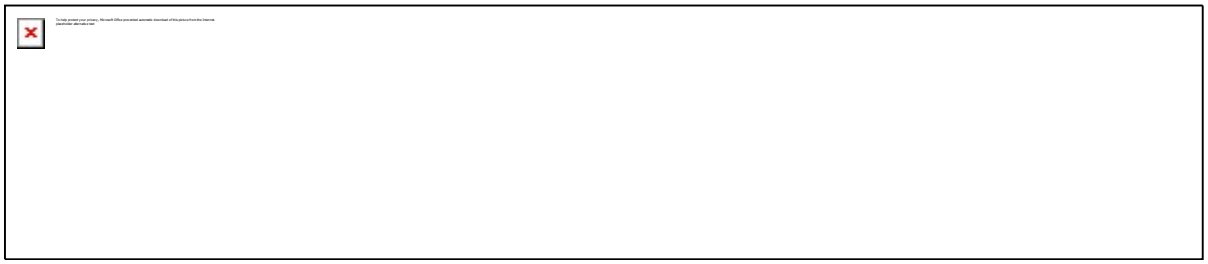
Subject: RE: Illinois Tollway Proposes New Capital Program and Updated Toll Rates



Complete BS. The tollway system was to be paid off decades ago, and not subject to eternal raises in tolls for things that were omitted while the systems were and are being rebuilt every couple years. Pritzker and the Taxocrats have already spelled out the real purpose: bailing out Brandon the CTU tool and the Crook County mismanagement of funds for public transportation at the expense of those who don't use public transportation. And even the tollway board should be able to see that whopping increases will drive traffic, especially for large trucks, off to parallel roads and streets wherever possible, just as happened when Quinn jacked the tolls years ago. The increases are done deals. Why even bother sham public hearings.

We do not need any increase in toll fees. We pay more than enough taxes to cover the increases. Besides the toll was originally to be dropped once the first road was completed. Always promises made but never kept.

Terrible idea. Tell the committee that came up with this hair brained scheme to wake up and look around. Affordability is an issue and increasing tolls is a regressive form of taxation on Illinoisians already struggling. This committee must be staffed by a group of complete morons to think this is a good idea.

----------I thought a personnel company owns the tollway, and it was supposed to drop charges years ago! If personnel company owns it, why do you up the charges so you pay for the construction? Doesn't the state own the roads so their responsibility. Seems to me were being lied at and someone is making a bundle of money!!!!!

What a bunch of bologna! You've not told me of the proposed changed. I have NOT been on I-294/Tri-state Tollway in years, a dangerous mess with relentless traffic backups. Stop the fog & pony show, who cares about your vision and all the 'I' buzzwords. Corporate America, that's all.

Finish the work at hand before starting other new 15-yr projects. I want to get from point A to point B without the gridlock toll roads.

Regards,
I-Pass auto-pay user

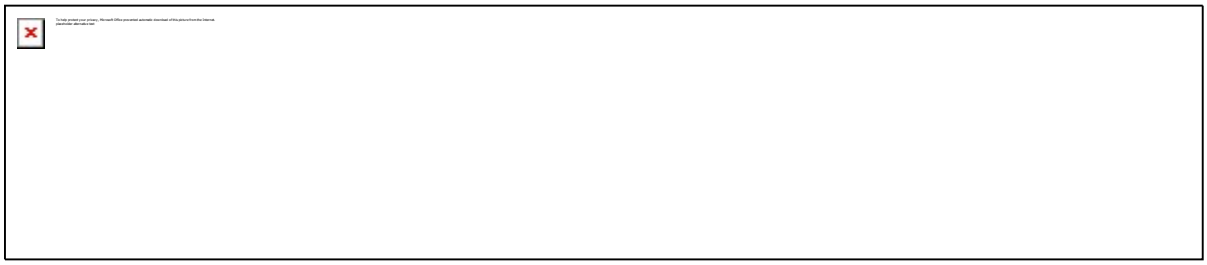
Thanks SO MUCH for sending this announcement of “public hearings” 5 whole days before the actual date of my regional hearing.



But of course in IL, everything is already decided, a fete a complet, dressed up with citizen response emails. But it’s done, along with inserting cost of living increases.

Maybe if our legislature considered its own citizens and businesses the customers for state & local governmental services, things would change. But with our gerrymandered voting districts we are PROGRAMMED to decline. As individuals, families, & businesses, we have to live within our means. Pennies & dollars count. But if you are legislators or agencies of the State of Illinois, you can budget your way into reckless debtor oblivion with funny-money budgets that have no reality compared to actual revenue.

A pox on fakey, dressed-up public input sessions.

I'm sorry times are hard right now so for Illinois to just be passing more bills that we have to pay this kind of ridiculous in my eyes

If the money will come directly out of the politicians pockets I am all for it but if it's coming out of my pocket you're just hurting the people of Illinois.

Thank you.

About the Proposal

Benefits for Communities

The Driving Connections will help alleviate traffic for Illinoisans – allowing people to spend more time with their families and less time on the road. The plan will also fuel economic development by creating thousands of engineering and construction jobs, support suppliers and small businesses while improving commerce and economic development.

Hello
To alleviate traffic congestion in Illinois, the most important measure is to strictly prohibit trucks from using the left lane on two-lane roads, and to ban them from using the left lanes on three- or four-lane roads—regardless of the circumstances. This ban must be enforced through the issuance of traffic violations and the installation of thermal cameras to penalize non-compliant trucks, mirroring practices in other states.

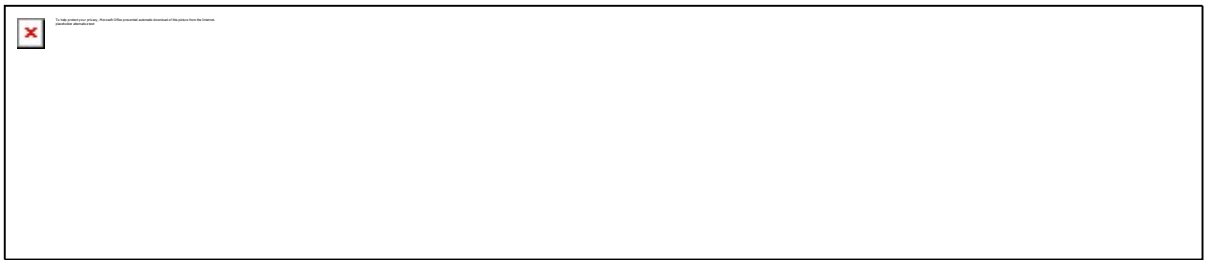
Insanity is to continue to do the same thing again and again and hope for better results.



You already raised tolls in IL, IL residents already pay more taxes that most states.

You need to cut the fraud waste and abuse which is in the 100s of millions of dollars if not billions to fund this project.

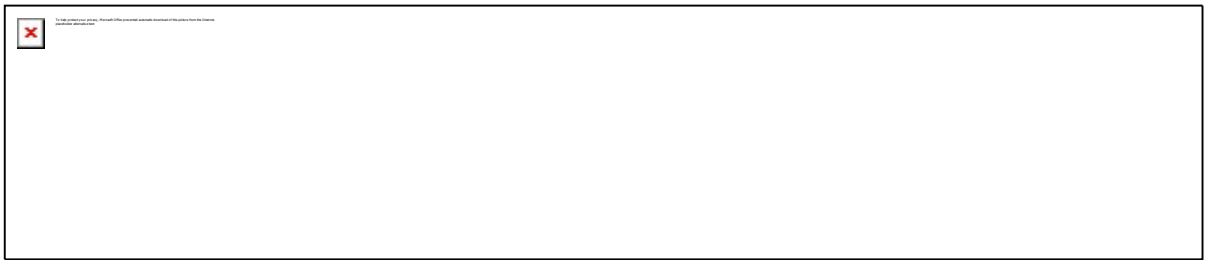
Illinois is awful!!!!



Tax Tax Tax and more Tax. Then pay those outrageous tolls!

Stop your corruption! Work for the poor citizens.

No wonder Illinois is the most moved of out state in the US!

Your proposal for the future budget for the tollways sounds very nice. However, it is next to impossible for the common people to pay the gas tolls Auto expenses that already exist. The proposed budget is already out of reach for many low , to middle income wage earners. Please consider how raising the tolls will affect the many that are low to middle income wage earners.

The Illinois Tollway has proposed its next long-term capital program, Driving Connections, a 15-year, $26.5 billion investment intended to improve traffic and enhance road conditions, providing Illinoisans with a resilient, modern system built to support a dynamic region for generations to come.

About the Proposal

Benefits for Communities

The Driving Connections will help alleviate traffic for Illinoisans – allowing people to spend more time with their families and less time on the road. The plan will also fuel economic development by creating thousands of engineering and construction jobs, support suppliers and small businesses while improving commerce and economic development.

I've really had it with the State of Illinois and all of its various governmental agencies, including the Illinois Tollway Authpority. Have you ever thought of
reducing your bureaucratic headcount, before asking the people to pay more? It seems every cousin, in-law, brother, sister, best friend, etc. can get a well paying/great benefit job with the Tollway.

I'm done with you and will initially avoid the tollway system even if it costs me time and money. I will also make an effort to get out of this corrupt,
over taxed, over regulated state, run by a bloated billionaire who has never had to work a day in his life. You and Pritzker are parasites.

The increase in toll amounts is extremely frustrating since the original campaign was the tolls would only be charged until the original roads were paid off. A 45 cent per toll increase at one time is ridiculously high. Another reason to want to move out of the state of Illinois,.

The Illinois Tollway has proposed its next long-term capital program, Driving Connections, a 15-year, $26.5 billion investment intended to improve traffic and enhance road conditions, providing Illinoisans with a resilient, modern system built to support a dynamic region for generations to come.

About the Proposal

Benefits for Communities

The Driving Connections will help alleviate traffic for Illinoisans – allowing people to spend more time with their families and less time on the road. The plan will also fuel economic development by creating thousands of engineering and construction jobs, support suppliers and small businesses while improving commerce and economic

Question/Comment:

Illinois families are already dealing with high costs for groceries, housing, utilities, and transportation. Raising tolls again would make it more expensive for people simply to get to work, take their children to school, attend medical appointments, or visit family. For many suburban and Chicago-area commuters, toll roads are not a luxury—they are the practical route to their jobs. A toll increase acts like another recurring fee on working people, especially those who have few realistic alternatives because public transit does not reach their workplace or fit their schedules.

Illinois should demand stronger accountability before asking drivers to pay more. The Tollway is proposing its first passenger-vehicle increase since 2012—about 45 cents at many I-PASS toll points—along with future inflation-linked adjustments, while advancing a $26.5 billion, 15-year capital plan. Before locking residents into higher and automatically rising costs, state leaders should identify savings, prioritize essential projects, and provide a clear public accounting of how every additional dollar will be spent. Affordability cannot be the message in Springfield while higher everyday transportation costs are the reality for Illinois residents.

Email: redrascal@msn.com
Zip Code: 60430

Question/Comment:

I am writing as a resident of Homewood and a frequent user of I-294 to express my opposition to the proposed toll increases.

For many residents of the south suburbs, I-294 is not a luxury or occasional convenience. It is a critical transportation corridor used to commute to work, attend medical appointments, conduct business, and access destinations throughout the Chicago metropolitan area. Increasing tolls places yet another financial burden on families who are already struggling with rising property taxes, insurance costs, housing expenses, utility bills, and inflation.

Illinois drivers have been paying tolls for decades. Many residents were originally led to believe toll roads would eventually become self-supporting and that toll collections would be temporary. Instead, tolls have become a permanent and growing expense. Continued increases create the perception that motorists are being treated as a limitless source of revenue.

I understand the need to maintain roads, bridges, and transportation infrastructure. However, before imposing additional toll increases, I urge the Tollway Board to pursue greater transparency regarding existing revenues, operating expenses, capital projects, debt obligations, and administrative costs. Taxpayers and toll payers deserve a clear explanation of why current revenues are insufficient and what alternatives have been considered.

Any proposed increase should be evaluated not only in terms of revenue generation but also in terms of its impact on working families, retirees, small businesses, and daily commuters. Even seemingly modest increases can add up to hundreds of dollars annually for regular users of the system.

I respectfully ask the Board to reject the proposed toll increase and instead focus on improving efficiency, reducing unnecessary expenditures, and maximizing the value of existing revenues before asking motorists to pay more.

Thank you for your consideration and for the opportunity to provide public comment.

Question/Comment:

Dear Governor and Toll road Board of Directors:
Please investigate why companies and people are leaving Illinois. I am considering leaving Illinois due to the high amount of property and sales tax I am paying. Now add to this an additional toll road increase and it will become an untenable situation. Please review and note how many companies and people have left Illinois since 2016 and ask is this toll increase needed and what will the impact be? I'm not against an increase, but the amount of the increase is in question. Further, is the increase justified?

Please consider the people of Illinois before passing any increased burdens with the toll increase. What happened to the promise of free toll roads?

Regards,
Mike Nygren

Question/Comment:

The toll authority has got plenty of revenue already with th high tolls that are already in effect. Perhaps they could look elsewhere for additional revenue like fire about 30% of their bloated employment rolls. It wasn't long ago when tollway facilities were loaded with expensive furniture and they got caught. It's ridiculous to believe this organization needs more money. When the tollways were first being built, the tolls were suppose to go away when road was paid off. Most people don't know this. And yet the tollways continue to increase the tolls and start endless construction projects to attempt to justify these hikes.
NO MORE TOLL HIKES NOW.
Michael DiVittorio

Can we please stop asking and taking money out of the Illinois tax payers. We cannot afford this time of activity. It's time for Illinois to be more efficient with the vast amount of tax dollars we take every year. Thank you

Question/Comment:

Toll roads are a public asset that government is supposed to manage on behalf of the citizens.

I understand that toll roads work by charging money for construction, growth, and maintenance because funding doesn't come from anywhere else. Contrary to popular belief, roads are not "free".

Thar means the board has a big responsibility to manage the asset well on behalf of of the citizens.

But the last action to divert some funds for Chicago public transit and now this proposed toll hike that puts increases on auto-pilot (with no further vote and accountability) is the 1-2 punch that breaks trust.

Stop the proposed toll hike. Go back to first principles and figure out how to run the public asset you steward for the public's benefit. Restore trust.

Question/Comment:

Enough is enough. I was a young working woman when the tollways were establish with the promise that they would eventually become free. At the time I believe it was 50 years. This proposed hike when the authority is collecting more revenue than ever, is ridiculous. How about budgeting to your revenue like every adult on the planet has to do each month? Illinois is breaking the back of taxpayers. Now, I will not be able to afford to visit my family once I retire if I am paying huge tolls plus the cost of goods will be ridiculous. I think it's time to leave Illinois.

Question/Comment:

After the $15k in state income taxes and another $14k in property taxes paid by our household last year, we're beyond a tolerance threshold (that's before high sales and gasoline taxes). Increased taxes since Gov. Pritzker took office have been enormous, and the increases continue without any apparent effort to responsibly address spending levels. People will continue to migrate from Illinois, and my household is closer than ever to joining them.

Stop worrying primarily about re-election and pandering to the unions you obviously covet for their guaranteed votes, and govern for all Illinoisans. Say no to this toll hike and shift to supporting commerce patrons and Illinois citizens who use roads to get to work, not beating them up financially at every turn.

Remember, they already pay the highest fuel taxes in the country.

Question/Comment:

People live on fix income and this type of tax hike will drive prices up for regular goods and services. And it's already put a strain on every day people who are on fixed income and depend on the toll roads to get back-and-forth to work. I'm not in favor of this tax hike. I would prefer government live within their means and plan accordingly based upon the money and not have this ambitious goals of taxing taxpayers out and reducing their quality of life.

From: Doug Redmond via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

The state already has the highest gas tax in the country with the stated collecting almost 50 cents a gallon (and this grows every year with no end in sight) and of course the yearly taxes for license plates, the tools themselves and taxes on electric vehicles. The Democratic party just keeps taxing and taxing and instead of looking for efficiencies or reducing labor as private sector has done, you keep raping the taxpayers. Enough is enough, stop the insanity and stop the tax.

Zip Code: 60193

Question/Comment:

Dear Governor Pritzker and Illinois Tollway Board Members,

I am writing to strongly oppose the proposed 59% toll increase for Illinois drivers.

Illinois residents are already burdened with some of the highest taxes and user fees in the nation. Imposing such a steep toll hike is unreasonable, unjustified, and places yet another financial strain on working families, daily commuters, and businesses that depend on the tollway system to operate.

A nearly 60% increase is excessive and out of touch with the economic realities facing Illinois drivers today. This proposal sends the wrong message that drivers are expected to absorb escalating costs without transparency, accountability, or meaningful alternatives.

I urge you to reject this proposal and instead pursue responsible, transparent solutions that do not disproportionately impact those who already carry a significant tax burden. Illinois drivers deserve fairness, not another substantial increase in costs.

I expect careful reconsideration of this proposal and meaningful engagement with the public before any action is taken.

Zip Code: 60491

Question/Comment:

I live in the southwest suburbs and rely on I-355 / I-294 daily for my kids' sports. An additional 45 cents per toll plaza isn’t pocket change—it adds hundreds of dollars a year. Worse, locking in automatic toll increases every two years starting in 2029 gives the Tollway a blank check. We pay our taxes, and we shouldn't be squeezed further just to fund a 15-year, $26.5 billion program while we already sit in endless construction.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Kevin Crymes
Email: kevin.crymes@gmail.com
Zip Code: 60410

Question/Comment:

Governor Pritzker,

I am writing to express my strong opposition to the proposed toll rate increase on Illinois roadways.

The Illinois Tollway system already generates sufficient revenue to cover its operating expenses. Raising rates does not address a funding shortfall, it simply extracts more money from Illinois residents who are already among the most heavily taxed in the nation. We pay some of the highest property taxes, income taxes, fuel taxes, and sales taxes in the country. Adding to that burden through increased tolls is not a solution; it is a continuation of the same pattern that has driven residents and businesses out of this state.

Illinois families deserve a government that lives within its means, not one that reflexively reaches deeper into their pockets. I urge you to reject this proposal and instead direct the Tollway Authority to demonstrate fiscal discipline with the revenue it already collects.

Respectfully,

Kevin Crymes
Channahon, Illinois

From: Diane Jefferson via Illinois Policy <action@illinoispolicy.org>

Email: 14maxine@gmail.com
Zip Code: 60188

Question/Comment:

When I read the statistics and information about the history of these Illinois tollways, I was shocked to learn that they were originally proposed and approved on the basis of an agreement that they would only be tollways temporarily. It is unacceptable that the Illinois tax and toll payers have been lied to and robbed for so long and in such a huge monetary accumulation. Especially in light of the facts that these tollways were long ago paid for from the proposed “temporary” tolls. How can Illinois government and board members and officials who are in positions for the purpose of representing best interest of the citizens continue to lie, deceive, defraud and default on the original contractual agreements on these tollways which in fact were written, proposed and agreed upon by them. It is an outrage of astronomical proportions to have already profited by such a vast amount of money to which they were never entitled, but to propose a huge .45 cent toll increase on top of all of these facts is criminal.
DO NOT IMPOSE OR APPROVE OF THIS TOLL RATE INCREASE!!!
I will do everything I can to spread and publish this information to ensure that it is as widely spread and disseminated to the public as possible to demand that this toll rate increase be halted immediately, The economic effects on the public and industry would create the loss of many jobs for working people, who are already struggling and reeling at all of the other current cost of living expenses that have skyrocketed and continue to increase. Have you no conscience or commitment to those who have trusted you to represent them fairly. Why is it always about lining your own pockets to the harm and detriment of others who depend on you for their livelihood and welfare. How dare you?!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike, its ridiculous.

Name: Andres Cerda
Email: cerda.andres04@gmail.com
Zip Code: 60651

Question/Comment:

You have created such a mess doing all these construction sites and adding more before you even finish one. Having exit blocked off just for 2 cars to he parked their and making traffic and routes longer. To make matters more severe all your delays and additional construction site being put up, has affected what small truck owner operators/businesses make to bring home and provide to their families. We make less overall for the week due to construction site just sitting their, more areas being started, and no progress being made to finish them. Now you want to take more from small business owners that run and driver commercial vehicles. This is why so many small and big businesses are leaving from Illinois due to always trying to suck the income from them like leeches.

From: Michael Breslin via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Victoria Papastathis
Email: victoriapapastathis@gmail.com
Zip Code: 60193

Question/Comment:

This feels like a penalty to drive. Expenses are already on the rise, and you're thinking about increasing the tolls? I commute to school everyday and get hit with high tolls on top of high gas prices per week. I feel like if this is meant to go towards road maintenance, these roads have been annoyingly under construction for YEARS. How much money is it really going to take to actually make some beneficial changes for our roads? This just feels like a cash grab scam and another excuse.

From: Justin Masters via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Daniel Clegg
Email: hawksmandan@gmail.com
Zip Code: 60097

Question/Comment:

As an Illinois resident and driver, I respectfully urge the Illinois Tollway Board and Governor Pritzker to reject the proposed toll increase.
Illinois families and businesses already face some of the highest taxes and fees in the nation. A significant increase in toll rates would place an additional financial burden on commuters, working families, and small businesses that rely on the tollway system every day.
While maintaining and improving infrastructure is important, any proposal that substantially raises costs for residents should be approached with caution. Before increasing tolls, I encourage the Board to prioritize efficiency, transparency, and alternative funding strategies that minimize the impact on taxpayers and drivers.
Illinois residents deserve responsible stewardship of public resources and transportation policies that support economic growth, affordability, and competitiveness. I respectfully ask that you reject this proposal and seek solutions that do not further increase the cost of living for Illinois drivers.
Thank you for your consideration.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Maria Sabacan
Email: msabacan@hotmail.com
Zip Code: 60448

Question/Comment:

A long time ago, there was a recommendation to end the tollway system in Illinois. Unfortunately, it remains in place and the prices continue to increase. With the already high property taxes and the existing tollway system, you would think Illinois would have a surplus of money but that is not the case. Where is all that money going to? If the state budget was managed properly, I believe businesses, schools, everyone would be in better shape.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Brian Crawford
Email: bsc1850@hotmail.com
Zip Code: 60137

Question/Comment:

I use 3 miles of tollway to go to work each day and that cost me $2 per day the last time I checked. Raise it some more will drive me and others to use local roads that will add to congestion and pollution.

Between going to work and occasional travel I already spend over $1,000 per year. I love Illinois, but the taxing bodies are making it hard to stay here.

Please consider not raising the tolls and look into how other states fund their roads without tolls.

I've always been curious to know what the percentage of the toll goes to the road, and.how much goes towards collection the tolls. Perhaps there is a more efficient way?

Stop the toll hike!

From: Bryan Crowe via Illinois Policy <action@illinoispolicy.org>
Sent: Monday, June 22, 2026 12:37 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Bryan Crowe
Email: bcrowe1664@gmail.com
Zip Code: 60014

Question/Comment:

You are killing us with all the taxes! Pritzker is the TAX KING! What's the matter with you people?

You lied to us when the tolls were implemented in 1965. With the promise the highways would be toll free in 20 years (1985). LIE, LIE, LIE!

We have to survive on a budget! So should you! You are assisting Pritzker in destroying the Illinois economy!

From: Joseph Kunz via Illinois Policy <action@illinoispolicy.org>
Sent: Monday, June 22, 2026 12:38 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Question/Comment:

This money has never been used properly. No we should not have to pay more than the already outrageous toll prices. This is just pure greed. The democratic party needs to stop trying to tax people for all the missing money they spend on handouts. Its simple just follow the money. And Pritzker is going to hide as always. SCREAMING IT'S NOT MY FAULT!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Corey Robinson
Email: coreycr8787@gmail.com
Zip Code: 60101

Question/Comment:

Please stop the toll hikes it is ridiculous to increase it 45 cents. Institute some sort of process where those who use the certain tollways can pay for them and not charge everyone for tollways they don't even use. You should use regular tax dollars and contact the federal government to pay for road repairs. What happened to all the money Biden and Trump gave to the states for roads and bridges? Make better deals with the construction people.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Kate Mulvaney
Email: katemulvaney54@gmail.com
Zip Code: 60646

Question/Comment:

DO NOT PASS THOS TOLL HIKE.
This is absolutely unconscionable that after an all time revenue record and in these hellacious economic times with every aspect of our lives financially suffocating us, that you would even consider this toll increase. It is beyond time to begin thinking about the people in your state instead of making more and more billions of dollars. We've been lied to since the beginning about this total road system in Illinois as we were told 50 years ago, this would've stopped being toll roads and become freeways. You cannot continue to sell out your constituents in the state of Illinois and all those who travel through.

I call on your morality and your conscience to vote against this toll hike. Do not various any deeper under more financial strain and stress.

Respectfully submitted,
Kate Mulvaney
Chicago, IL 60646

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Michael Soucy
Email: mikesoucy@comcast.net
Zip Code: 60090

Question/Comment:

Gentlemen, Please reconsider your decision to enact your proposed toll increase. While I understand that Illinois no longer receives the same level of funding from Washington that it once did, Illinois citizens still pay some of the highest taxes and tolls in the country. It's more critical to examine closely how revenue is currently being spent before imposing new tax-raising measures. Thank you in advance for your help with this matter.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Holly Jackson
Email: holly.jackson@comcast.net
Zip Code: 60004

Question/Comment:

Such a large toll hike will not only increase traffic on ancillary roads but will also increase prices for transporting goods and services. Some people living outside of the state of Illinois will likely give second thoughts to visiting here (or even passing through) simply because of the increased costs. The result: lost revenue.

The tollway authority seems to believe most citizens have deep pockets, which is certainly not the case considering what the current administration in D.C. has done to the cost of living. We all need to live within our means and that should hold true for the tollway authority as well.

From: Barbara Gadbaw via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Hello,
I currently live in Winnebago County and drive 60 miles one way to work 5 days a week to Elk Grove Village. The tollway costs me to go to work and home is $5.80 a day. I am a middle class citizen, 1 car household, and sadly, in a higher tax bracket, not by choice, but never thought the tollway would spike with such an increase in 1 year. If this plan goes through, I am one less household you'll have to worry about because I'll be moving out of state as fast as I can. Stop the toll hike and start appreciating the loyal citizens of Illinois you already have, or everyone will have the same idea and leave.

From: Darline Garippo via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

As an Illinois state organization you have a duty to remain solvent and operate in good financial standing. It is in the spirit of this obligation that I question the rate increase being proposed. How can a body already pulling in high revenue, justify such a considerable raise, and why now?
in a time when everything related to transportation costs more, and these costs are being singularly pushed onto the consumer, a toll rate change now seems irresponsible.
I strongly urge this board to reconsider, and instead look for methods other than unfair rate hikes on the pocketbooks of the working class, to justify their financial behavior.

Stop killing your everyday Illinoisan. We can't afford gas, food, groceries, rent, everyday expenses and you have the Audacity to increase how much we have to pay to simply go to work to make money that we have to the. Give a massive cut to you? How selfish and inconsiderate can you be?! The toll was supposed to be free over 50 years ago. To pay for the construction then go away. You should be ashamed of yourselves while you enjoy your taxpayer funded salaries. Shame on you. And you wonder why hundreds of thousands of Illinoians are leaving each year! Cus you're strangling us to death!

Question/Comment:

I am writing as a northern Illinois resident and business owner to demand that the board reject the proposed "Driving Connections" toll rate hikes.

A 45-cent hike on passenger vehicles and a massive 30% increase on commercial vehicles is entirely unjustified given the Tollway Authority's current financial status. According to the most recent data, the tollway reported more toll revenue in 2024 than in any year in its history, driven heavily by commercial trucking. Furthermore, the authority has collected a net surplus in tolls each year since 1973 beyond what is required to operate and maintain the system—with these net revenues peaking in 2024.

Raising rates when revenue is at an all-time high is completely detached from the economic reality facing Illinois residents and businesses. As the Illinois Trucking Association has warned, a 30% hike on freight carriers will create a domino effect, driving up the retail price of everyday goods, tools, and materials transported across our state. Additionally, implementing an automatic inflation-based "escalator" every two years starting in 2029 eliminates future board transparency and strips the public of their right to voice opposition to automatic tax increases.

With the tollway pulling in record-shattering profits, you should pace infrastructure projects within your existing historic revenues rather than overcharging the drivers who fund this system. I urge the board to vote NO on this rate hike.

Sincerely,

Andrew S Bailye

Option 2: Spoken Statement Script (For July Public Meetings)
Use these bullet points or read this short script if you speak during the public comment portion of the meeting.

"Good evening, board members. My name is [Your Name], and I am a resident and business operator here in Northern Illinois. I am here tonight to urge this board to reject the proposed 2027 toll increases.

We are being told that a 45-cent passenger hike and a 30% commercial truck hike are necessary to fund

the future. But the Tollway's own data tells a completely different story. In 2024, this authority brought in more toll revenue than in any year in its entire history. In fact, every single year since 1973, this system has collected more money than it actually needs to operate and maintain the roads. Those record surpluses peaked just two years ago.

When you have record-breaking revenues, you don't raise taxes on the working people and businesses of this state. A 30% hike on commercial trucks doesn't just hit truck drivers—it acts as an inflation tax that raises the cost of everyday items, groceries, and freight for every household in Illinois. On top of that, creating an automatic inflation escalator in 2029 to bypass future public hearings is flat-out bad policy.

The taxpayers and drivers of northern Illinois are already stretched tight. The tollway is taking in more money than ever before. Use the record revenue you already have, manage your budget responsibly, and vote NO on this historic toll hike. Thank you."

Zip Code: 60123

Question/Comment:

To the Members of the Tollway Board,
I am writing to formally log my strong opposition to any future toll increases.
Tolls are already at an all-time high, placing an unreasonable financial burden on daily commuters who rely on these roads for their livelihoods. Furthermore, the public was originally assured that these tolls were a temporary measure—implemented to pay for the initial construction of the highway—and that they would be removed once that debt was settled.
Instead of honoring that original commitment, the state has chosen to continuously extend and increase these fees. Continuing to raise rates on a highway system that has been paid for many times over is unacceptable.
I urge the board to reject the proposed hike and instead look for ways to reduce the financial strain on drivers by phasing out these tolls as originally promised.
Sincerely,
Ryan Thompson
Elgin, Illinois

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Gregory Michalik
Email: gmichalik1984@gmail.com
Zip Code: 60491

Question/Comment:

All tolls collected should be used to maintain the Tollway System. Doing otherwise would be unethical. Therefore, any toll increase should be based on projected needs and not used to fund other non-tollway efforts (like the recently transferred funds to the new regional transit system). Likewise, there should never be an automatic toll increase, each increase should be voted on as Tollway needs arise. The Tollway Users deserve nothing less.
Since the Tollway System is currently receiving record revenue that far exceeds current expenses, the Illinois Citizens do not need the added fees associated with the proposed toll increase without first using the current balance in the Tollway Fund only on Tollway Projects.

Question/Comment:

I don't believe a Toll Hike is needed. I also believe a Toll Hike is just another way to tax the citizenry and as Illinois is the 3rd highest tax revenue state in the nation behind only California and New York, this Toll Hike is just another way to raise prices to everyday folks in illinois because this hike to commercial vehicles will just raise the price of goods carried by these commercial vehicles to end up as another tax on the consumer. The Tollway authority already has enough money and they should use etter management policy to define the spending to meet the amount of m{net they already have coming in. So for these reasons I respectfully request the Tollway Board vote NO to any ratd hike at this time.

Subject: Stop the Toll Hike

Name: Elisa Huhta
Email: Lisasharpe74@yahoo.com
Zip Code: 61108

Question/Comment:

Illinois residents already pay enough in toll costs along with gas and taxes that recently increased, home taxes have increased as well. Rent has went up in the last few years .People that commute to work everyday from suburbs to Chicago will pay an overwhelming amount that does not seem practical with our minimum wage affordability, not even a middle class can afford such increases. We need people to come into the city and not have to pay so much to visit, if people see expensive tolls there will be less tourism and less money to get illinois more economically established . commercial drivers are a necessity to these small and large businesses here in the Rockford area, if tolls increase the cost of delivering will increase. Businesses here have to travel to Chicago for their inventory and delivery in small vehicles/vans, Busses and Uber as well transporting to ohare. I used to go to Chicago but I don't anymore because of how much the tolls are. This county makes less money per hr than Chicago residents, rural areas can not afford it. So I say no to the Toll hike. enough is enough. The best thing to do is make these roads freeways, to where money comes from taxes and allows so many into the state of illinois. You will see such an increase if that was to be proposed.

Zip Code: 60137

Question/Comment:

Its slready hard to live in Illinois with high property taxes, high gas cost and taxes, high grocery prices. You're taxting many of us so much it's unsustainable. Illinos will just end up using the increased toll money elsewhere (CTA or some other pet project) and we'll be taxed again with another toll hike for the "maintainence of the roads" as they always claim. STOP THIS TOLL HIKE.

Question/Comment:

At a time when gas and groceries prices are sucking our bank accounts dry, you have the nerve to try to hike tolls which will further increase the price of goods being delivered to businesses using the tollway, something that was supposed to have been made free decades ago. And at a time when the tollway revenue is already at an all-time high. It's almost being tone-deaf. I am against this fully against this rate hike.

From: Mike Howley via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

When will it stop?!?! The highest taxed state in the union. All politicians care about is funding the public sector unions and their ridiculous pensions. Most government workers would never survive a day in the private sector. We have a trust fund baby as a governor who has never had a job. Raise the gas tax, raise tolls, raise sales tax, raise property taxes…you guys are a punchline…you're the ones we in the private sector make fun of. You're all a joke

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Bryan Hagerla
Email: bahagerla@gmail.com
Zip Code: 60046

Question/Comment:

I ask you to consider halting this proposed hike on I-Pass toll fees. Residents already are facing inflation pressures on multiple fronts (food, gas, housing, electronics) and adding another increase would be unwise and even cruel during this time. Also, penalizing commuters and commercial transportation with higher tolls at a time when the economy is already fragile and residents are leaving the state would be more than most could bear. The nature of Chicagoland is the need to drive between towns and suburbs almost daily. Please consider abandoning this toll hike.

From: Esther Delos Santos via Illinois Policy <action@illinoispolicy.org>

Subject: Stop the Toll Hike

Name: Jill Sullivan
Email: jmsullivan996@gmail.com
Zip Code: 60174

Question/Comment:

I understand there may be a need for a toll increase but $0.45 is way too much per toll. Newer roads such as the Elgin O'Hare have tolls every few miles. That expressway is expensive enough and would make it unaffordable. 355 is also already pricey. Where I think tolls could be added are along the Jane Adams east bound from Route 59, Barrington, etc. where a toll is paid getting off west bound but not east (makes no sense to me).

Question/Comment:

As a longtime Chicagoland resident living out in Aurora, I rely heavily on the tollway system every single day. Whether I am commuting into the city for college and classes or traveling for work, the tollways are a vital connector that makes living in the outer parts of Chicagoland economically feasible. Please consider this group of constituents and voters in your decision making. These tollways are a backbone of our region's economy logistics, and individual drivers rely on these roads not out of simply convenience but necessity too. Not everyone can afford to live near a train line or commute without cargo. When we lived near a train line, we used it when possible, but even then it was not always feasible. Individuals with disabilities or other needs also need to be able to travel in cars without having to rely on highly tolled roads. Illinois gas taxes are already second highest in the country, these tolls add an additional burden.

The proposed 59% toll hike is completely unreasonable. It places an unfair and heavy financial burden on daily commuters who have no other efficient way to navigate the region and depend on these roads. Please reject this hike and protect Illinois drivers.

Zip Code: 60025

Question/Comment:

294 has been under construction for many years. Drivers have dealt with delays from lane closures for years. I am against raising tolls to use a road that has gotten worse over the past several years. Instead of raising tolls, they should be lowered to accommodate for the inconvenience drivers have dealt with.

From: JOSEPH COMITO via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Why!!!! Residents are more likely to support infrastructure funding if they can clearly see where every toll dollar goes.Projects completed on time and within budget. Independent financial oversight and regular public reporting. Lastly Transportation Should Remain Affordable!!!!!!
Because reliable transportation supports employment, education, healthcare access, and commerce. Keeping tolls affordable helps maintain mobility and economic opportunity for millions of Illinois!! Yes!! "Illinois needs safe, modern roads, but raising tolls should be a last resort—not the first.

Subject: Stop the Toll Hike

Name: Kevin Ciganek
Email: ciganekk@gmail.com
Zip Code: 60012

Question/Comment:

The tolls need to stop! How about the state eliminates townships instead of increasing all taxes and tolls?. It is absolutely ridiculous that the northern and northeastern counties have to pay tolls, but nowhere else in the state does. And don't try to lie to us about this being the first toll hike since 2012, we all know that every year or every 6 months or every 18 months one toll will go up $0.45 or one will go up $0.10 and nobody's ever notified of it. It but it's when you guys try to tie it to CPI to constantly increase the tolls on us that now now we must speak up. I think instead of this stupid email that nobody's ever going to read, there needs to be an actual conference room rented big enough to house 2,500 people so we can all complain to you flipping people that do nothing but raise our taxes and tolls. Have 100 such meetings and not just one, that you conveniently only put out a quiet notice 24 hours prior to it being held in a pritzker hotel basement closet, where no one will ever hear about it, not be able to attend, due to restricted access and not knowing about it.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Darlene Nall
Email: dmgnall036@gmail.com
Zip Code: 61115

Question/Comment:

Do not increase the tollway fee. This increase would definitely make my vacation destination be Wisconsin where they do not have a tollway. Illinois residents pay the highest gasoline tax and now an increase in tollway fees really does not make sense. High property taxes, high sales taxes. What is the state doing with all this money? This increase would be making it harder for residents to go to work, visit family and navigate the city on a daily basis.

Question/Comment:

I am a resident of Illinois and raised a family now with my children and 7 grandchildren growing up here also. My career in construction involved using the tollway continually and it has cost me every day of my life just to drive on the roads of my own state. I believe the state has raped the people with this project since its foundation and raising the "tolls" is tyranny. We the people are sick and tired of being taxed and re-taxed in this state.
This project has been overboard for a long time and is a big money machine coming directly out of our pockets. The commercial tolls on our system are WAY out of line and are an atrocity to us as "we" have to absorb the cost on these outrageous tolls .
I highly suggest you vote to LOWER the tolls or remove them completely like they initially were supposed to have had happen.
PLEASE VOTE NO and begin to restructure the state so it is not the most costly state in the United States of America to try to live in and raise a family in it's no wonder a large amount of people that I personally know say I am leaving here the minute I retire or as soon as I can!
I've always loved this state and don't plan on leaving but the way we have been being raped over the coals with taxes on everything and now these toll hikes etc... doesn't give a man much of a choice but to rise up and do something about it.
Anton Burks

Question/Comment:

If you exceeded what you needed then who gets the excess $$$ and if you knew how to spend it the right way and not tear up roads not needing construction you wouldn't have to hike it up so high! How about a gradual increase i mean who gets the taxes we already pay in the astronomical gas prices Hit people in the wallet more and we can vote you all OUT !!!

From: Camesha Daniel via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike!!

Name: Camesha Daniel
Email: meme7103@gmail.com
Zip Code: 60516

Question/Comment:

No toll hike!!! People are already struggling to pay for everyday needs as it is and now you want to kick us while we are down and give us more to pay for..NO!! The toll system is not even suppose to be in existence today. It was only to help pay for roads back in the day and once the state saw how much could be made it was implemented. Insane and greedy. Think of the people instead of yourselves for once

From: Jacob Swanson via Illinois Policy <action@illinoispolicy.org>

Subject: Stop the Toll Hike

Name: Drue Kampmann
Email: dskampmann@gmail.com
Zip Code: 61232

Question/Comment:

Stop taxing Illinois residents. Continued tax hikes are going to “drive” more residents out of the state. I live on border state with Iowa already considering a move after 50 years living in the state. Between income and property taxes this will only make my decision easier.

From: Cynthia Wess via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 7:36 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Cynthia Wess
Email: cwess0822@comcast.net
Zip Code: 60020

Question/Comment:

Do not do this. It has to stop somewhere. Essentially Illinois Tollway drivers would be paying twice. Once while driving and once with the costs added to products transported. The infrastructure has to be maintained and improved. However, without the overhead costs of the tollway authority with salaries, equipment and buildings, the costs would be significantly reduced. Find a way to pay for the roads through income, property and sales taxes. It would be cheaper in long run. Eliminate the Tollway Authority.

From: Scott Haertel via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Main Sstatement is the residence of Illinois was never suppose to pay the tolls after we funded to build it over 50 years ago. And the fact that it has been swept under the rug is unconscionable. Then to cap it all off it's at it highest ever in revenue of produce money, that isn't even going to the so called purpose of it. And they so Greedy they want us to give even more through the tolls and in commerce. Pure Greed and we have to put a stop to which of that the ball was dropped over 50 years ago to do & address this ever growing problem!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Arbe Callahan
Email: arbed2222@yahoo.com
Zip Code: 60411

Question/Comment:

This is why people don't like, or trust politicians. A tollway that is supposed to be free now, but isn't, continues to generate a ton of money for the untrustworthy politicians. Because of the fact that no person in politics is capable of being a good steward for other people's money, they will never stop robbing taxpayers. They waste so much of our tax dollars that they have to continue to increase the property taxes, gas, alcohol and any other source they can get out of us. I have lived here all of my life and I am patiently waiting for next year when I retire. I will be running to get away from the greediest group of politicians outside of our nation's capital. Until then, I will avoid every tollway that I can and I hope many others will do the same. Until I just read that our governor wanted a higher hike, I would have voted for him. He just lost my vote!

From: George Chalifoux via Illinois Policy <action@illinoispolicy.org>

Subject: Stop the Toll Hike

Name: George Chalifoux
Email: jakedar86@gmail.com
Zip Code: 60051

Question/Comment:

I am disgusted by the greed in our politics. Every single member of the toll board shouod be ashamed for even entertaining a tax hike. The tollway is not a revenue stream, it is infrastructure for people who are already paying more for everything.

Specifically to Gov. Pritzker- you say you stand up to billionaires when it comes to the McCaskey's and the Bears, however, you are planning to renovate the capitol for billions of dollars, thru fines and taxes, while you yourself are a billionaire. We see who you really stand for.

Time for billionaires is coming to a close. I wouldn't want to be the face of tax hikes and unwelcomed policy that hurts everyday americans.

Question/Comment:

STOP SPENDING MONEY. The roads in Illinois are in ruin & never fixed/repaired until they get so bad that something “has to” be done. When that happens the state, in particular rich Pritzker, comes to Illinoisans for yet MORE money in fees or revenues better known as taxes. Illinois has been & still us in the RED so deep we can’t get out of it. More people but more businesses are leaving Illinois so less revenue so why not put the people of Illinois on the hook for his big tax bills. Illinois needs a good solid businessman as well as a whole new House & Senate to put us back on track. Sorry to say but Bailey is absolutely NOT that person. Thx GOP for that one.

Question/Comment:

Dear decision makers,
Toll ways are not profit vehicles. We, the Illinois drivers, expect fair decision to prevent tolls increase.
Tollways make enough profit to finance their deals.
Tolls increases break my already thin budget and are not nesessary to support infrastructure.
Sincerely,
Xenia,Sap.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Eric Zuidema
Email: eric@berzt.com
Zip Code: 60503

Question/Comment:

These tolls have already increased to ridiculous levels and drivers should not be burdened with yet another unaffordable rise in costs. This state needs to get its financial house in order and prioritize its citizens instead of other causes like illegal immigrants. Perhaps, if that funding was applied to the roads, which we've already paid for several times over, there wouldn't be a need to do this at all.

Question/Comment:

The tollway has collected more money in the last year than ever before, cut the waste and overspending, inside the agency. In the last 5 years you have created more deputy chiefs and chiefs of departments than ever before and then you back fill those positions, having 2 to 3 employees doing the exact same jobs especially in Roadway Maintenance and Operation. Do some house keeping before you raise the Tolls.

Zip Code: 60506

Question/Comment:

My husband and I have lived in Illinois our entire lives and we have seen tolls go up significantly in that time. The same tolls that were supposed to be temporary.

We've had to downsize to one car between the two of us, which makes life much more complicated and difficult. Employers don't consider or care about your commute costs, between tolls and gas. When those costs go up, your pay does not. And those costs just keep going up, and up, and up. And now AGAIN???

With everything that's going on at the federal level and all of the costs going up from that, now the state wants to increase costs, too?? This is not sustainable.

Please find another way to fund these projects. The residents of IL are already having all the juice squeezed out of us. At a time when so many of us don't have anything left to give, this toll hike is going to squeeze the last drop out of some of us.

My husband works in distribution for a very large company. Truck drivers are already not showing up, abandoning their jobs, and refusing to work because of the gas prices making it impossible for them. This is causing supply disruptions all over the country. Higher tolls will only exacerbate these problems.

Please understand that people don't have savings to fall back on, and we don't all have family inheritances to rely on. We work hard for our incomes, and still struggle to pay our bills. This will make all IL residents' lives harder.

Please don't do this.

Email: johnsbrennan@yahoo.com
Zip Code: 60660

Question/Comment:

The Illinois toll system is currently producing record levels of revenue. Proposing record level too increases is not necessary to maintain, operate, or invest in capital improvements. The tollway is attempting to do too much at once, and some aspects of some projects are not necessary. Even out the investments and stop burdening computers and customers who must absorb the costs of dramatic commercial toll increases. This proposal is irresponsible.

From: Kristie Sheridan via Illinois Policy <action@illinoispolicy.org>

Subject: Stop the Toll Hike

Name: Kristie Sheridan
Email: kris99jade@gmail.com
Zip Code: 60120

Question/Comment:

I understand that there are improvements you are trying to make, but financially, we are already in a jam as Illinois/ U.S. citizens. The cost of mailing items got hiked. The cost of gas got hiked. The cost of groceries got hiked. The cost of any goods imported got hiked. The interest earned for funds in banks went down, and the interest rates on credit cards went up. We are in a climate where financial costs just keep going up without any sign of relief. We need the hiking to stop. Make plans based off of the money you are already collecting in tolls. Budget from that. If it takes longer to reach your goals then it takes longer, but please stop strangling us financially.

Question/Comment:

At some point, there needs to be accountability regarding Illinois tollways. Many residents were led to believe that tolls were intended to fund the construction and maintenance of these roads and that, eventually, the tollways would become free. Instead, toll rates continue to increase year after year.

At the same time, motorists continue to experience ongoing construction, road repairs, lane closures, and deteriorating roadway conditions. It is frustrating to pay higher fees while seeing the same issues persist.

Whenever possible, I choose alternative routes rather than using the tollway. I am not willing to continue paying increasing tolls without seeing meaningful improvements. If more drivers explored other options when available, it might encourage greater transparency and accountability regarding how toll revenue is being used.

Illinois drivers deserve well-maintained roads and a clear explanation of why tolls continue to rise despite decades of collection.

Question/Comment:

I have to drop passengers off at O'Hare Airport sometimes and I believe between the 57 and the airport and back is $12.00 It adds up over time and 294 has to be one of the worst roads to drive in the state it's constantly under construction. The state jacked up the gas tax a few years back to second highest in the nation. Use that money or don't do the project $12.00 in tolls is robbery especially since the roads up with no tolls are generally in better condition.

Question/Comment:

Stop the toll hike!! The increase will significantly hurt the average family in northern Illinois, that is already struggling to pay their own bills. Enough is enough!!

From: John Kaht via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 3:07 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: John Kaht
Email: john.kaht@gmail.com
Zip Code: 60106

Question/Comment:

It's time to end this blatant money grab & attempt to restore what little trust you might still have. The greed here is off the charts. And when prices rise, as they will, I'm sure you'll blame "republicans". As is always the case it seems in this state, we don't have a revenue problem, we have a spending problem. How about addressing that instead of picking our pockets for more?

From: Joe P via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: GEORGE CRUZ
Email: georgehcruz1@gmail.com
Zip Code: 60139

Question/Comment:

Enough with the toll hikes.
So being liars and instead drop the rates or remove them like you were supposed to.
The people are tired of all these high taxes and fees and tolls.

From: Verna Krueger via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 3:46 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Verna Krueger
Email: vernasplace@yahoo.com
Zip Code: 60016

Question/Comment:

This proposal is a disgrace to our state.

A 45 cent increase in every toll?

Here's a eye opener. Route 390, has 6 toll booths in a 10 mile stretch. Today it costs $1.90. If this is approved, one way will cost $4.60. That is an increase of $2.70, $5.40 round trip, or an extra $27.00 per week for someone commuting to work.

This will also affect visitors to our state. People living in other states may not have IPass. Its bad enough we already penalize them by doubling the toll. Now we are gouging them even more? Welcome to Illinois, the Land of Please Pay Toll.

Tolls are exclusively located in the Chicago Metropolitan area and northern Illinois. This is also the same area that has the highest property taxes and sales tax rates. Families are already struggling to keep food on the table and a roof over their head. I can't believe this is a consideration.

From: Ralph Cope via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 3:46 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Ralph Cope

Question/Comment:

STOP THE TOLL HIKE

From: Kimberly McCauley via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 4:00 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Kimberly McCauley
Email: dona_anna@yahoo.com
Zip Code: 60446

Question/Comment:

Tolls are already exorbitant. Living in the suburbs makes us trapped to get anywhere without using a toll road. There are no secondary road alternatives. For that matter, most of the state has free interstates and don't share this cost burden. With has being so high, tolls would put undue burden on those of us with low salaries.

From: Robert Ulcigrai via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 4:02 PM
To: Board of Directors; governor@state.il.us

Question/Comment:

Tolls were supposed to be over years ago, michigan has none, ohio has cheaper , so does indiana

From: Erin Hunt via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 4:14 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Erin Hunt
Email: emeraldmic21@yahoo.com
Zip Code: 60421

Question/Comment:

Good afternoon,

Not only as a regular driver in my personal vehicle, I also run a trucking company. This hike is detrimental to businesses whose sole revenue is based on delivering goods. This is why consumers and businesses are running away from this state. Vote NO on the tax hike.

From: Johnny Repp via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 4:22 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Johnny Repp
Email: jjrepp@prodigy.net
Zip Code: 60016

Question/Comment:

Enough is enough. This has gone too far just so politicians keep receiving political donations from these unions. Stop the tollway increases or get thrown out if office.

From: Charles Ponicki via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 4:27 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Charles Ponicki
Email: cjponicki@gmail.com
Zip Code: 60004

Question/Comment:

The tollway is collecting more than is necessary to operate and maintain the system. Collections are at an all time high. There is no need to burden the people of Illinois and commercial vehicles that use our roads with higher tolls. These outrageous tolls discourage commerce and make life more financially difficult for average citizens. Reform our government and reduce its burden on the taxpayers.

From: George Giese via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 4:53 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: George Giese
Email: georgegiese@yahoo.com
Zip Code: 60030

Question/Comment:

We in Illinois are being taxed to death - a death of 1,000 cuts. Everything we touch in this state has a tax on it. It's time to remember that the taxpayers of this state are drowning in these kinds of fees and taxes being levied indiscriminately. And it most affects those that can afford it the least. Please do not raise the tolls in this state.

From: Trudy Brown via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 5:05 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Trudy Brown
Email: alleykat2491@sbcglobal.net

Question/Comment:

Enough is enough, the state is taking an excessive amount, and it is not going to maintain the tollway. What and where is the additional monies going???

From: Gary Lance via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 7:04 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Gary Lance
Email: Glance3150@gmail.com
Zip Code: 61547

Question/Comment:

Stop these toll hikes

From: Theresa Garcia via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 7:17 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Theresa Garcia
Email: purify100@comcast.net
Zip Code: 60411

Question/Comment:

I request this toll hike be rejected. I pay taxes in Illinois for my home, groceries, non food items, fuel and yearly taxes, just about taxed for everything. With prices increasing its becoming burdensome, especially for those in the lower bracket income and lived in Illinois all their life for the affordability and love for their state that can have repercussions due to the effects this hike will have on all of us who use it daily, eventually will force, to move to another state that is affordable and not taxed high .

From: Joseph Quattrochi via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 7:21 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Joseph Quattrochi
Email: jmquatt@gmail.com
Zip Code: 60097

Question/Comment:

Regular citizens continue to get screwed over by the corrupt Illinois government. It's not enough that Illinois has one of the highest gas taxes you want to dig into our pockets even more.

From: Ed Diener via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 7:21 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Ed Diener
Email: edwardjdiener@gmail.com
Zip Code: 60172

Question/Comment:

Please don't implement the massive toll hike that is proposed. Already costs of living and transport is prohibitive in the state of Illinois, and this would drive up costs substantially. Thank you for your attention to this matter.

From: Monalisa Georgopoulos via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, June 23, 2026 7:25 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Monalisa Georgopoulos
Email: mgeorgopoulos@hotmail.com
Zip Code: 60630

Question/Comment:

Please stop the increase. The maintenance of the highway in illinois doesn't compare to some of the other states with smoother roads. We don't want to be taxed on high gasoline prices and then taxed with tolls. Illinois are being over-taxed and with an abundance of fees to put the cherry on top.

From: Philip Gomez via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Stop the taxation of the people of Illinois. We do not have deep pockets and cannot continue to support bad legislation by "robing from Peter to pay pay Paul."

With the highest revenue in history, figure out how to make that number work. It is your job after all, so do it.

This past and current government methodology cannot be supported. Everyone ran for election or was appointed by someone who did. And by doing so you chose to take on all past and present issues. Instead of pointing the finger at previous administrations, point it at yourselves and make a responsible decision for the people of Illinois, which of whom, gave you your job to begin with.

Vote No

Question/Comment:

Tolls were supose to go away years ago. The Public continues to be deceived and lied to. These hikes will not directly benifit the tollway system. Instead the increase will go to into greedy politians pockets to be used for buying votes, subsidizing Chicago and its failing Chicago mass transit system, state labor unions and any other place they wish to scoop money into. The state needs to open its books to the public for full disclosure of were our money is going each and every year. Vote the current party out.

Question/Comment:

For the amount of money that the state has received since the tollway system has been in place in the state of Illinois. Our roads should be in pristine shape. They are not. Far from it. The roads including the tollways roads suck. With all the yearly construction work and huge "pet" road projects they still amount to crappy roads. These roads end up destroying people cars and cost lots of money to fix with no true way to recoup the money from the state for alignments, tire repairs, suspension issues, etc. I have driven thru many other states with far better roads and less wasteful speading. I have driven thru Indiana, Ohio, Pennsylvania, Florida, Georgia, Kentucky, Texas, Arizona, Tennessee, Washington, Michigan. These states have smoother, better functioning roads than Illinois. I have even come across strangers who when the find out that I am from Illinois have told me that they have visited our not so great state and that our roads are terrible. I couldn't agree with them more. The state/Tollway board just keeps taxing the citizens to death or at least enough to make people leave and move to another state. You are hemorrhaging the drivers who must use these tollways to get to work on a daily basis. The tollways should be abolished. But, anything the Tollway board can get their hands on is just another way to incorporate an increase in their salary. Shame on you! People are seriously hurting out here in Illinois. Even if they are working. Many are struggling, and barely keeping their heads above water and the Tollway board wants to raise the tolls to the largest increase in Illinois history. Again, Shame on all of you! These roads suck even after months long/ years long are constructed from politically connected firms, The Tollway board is greedy, The gouging gas tax every July is seriously an over reach. Yeah, Illinois is a terrible state to live in. So much wasteful spending on so many levels in this state. The proposed increased by the Board should be thrown out. A HARD NO!!!

Subject: Stop the Toll Hike

Name: David Hahn
Email: ROOSTER72462@GMAIL.COM
Zip Code: 60443

Question/Comment:

Tollways were to be gone decades ago. Instead the rate has increased to a point where yearly revenue far exceeds necessity. It begs to have the question asked, " Where has all the money been going all these years when there wasn't supposed to be any more tolls to begin with?" The State has even slashed jobs with automated open road tolling, which ironically gained more money for the State with a system that's not supposed to exist.

Maintenance costs? Try contracting to companies that do quality work. There's already potholes on the extremely recent and ongoing work on 294. That's epically laughable if it weren't so outrageously ridiculous.

No increase ever again. This cash cow needs to go away, not be fed more. The State's horrific mismanagement can no longer be funded by the people.

Subject: Stop the Toll Hike

Name: Hannah Gilk-McClellan
Email: hmicaiah71@gmail.com
Zip Code: 62058

Question/Comment:

Please do not raise toll prices! IL residents are already feeling the squeeze of inflation and high prices - particularly with our high gas taxes in the state. An increase in toll fees will be felt immediately by all drivers in that part of the state, and then secondarily by anyone buying goods transported by truck in the state - regardless of where they live. Higher toll fees and the inability to pay tolls at the toll, forcing drivers to pay online, get a toll pass or pay an exorbitant price for a mailed invoice is bad for IL residents all around. Please reject this toll increase.

Question/Comment:

PLEASE!!! Stop taxing Illinois residents every chance you get! The tollway system was never meant to collect revenue for this long. As a former resident of Chicagoland/daily tollway user, it's infuriating to see yet another proposal to extort money under the guise of "improvement". The lack of fiscal responsibility from our state's government officials is mind-boggling! We are and will continue to feel the negative effects of the continuing tax hikes (fuel, property, utilities, food, paint, entertainment...the list never ends), if you pass this increase in toll rates. PLEASE REJECT THE PROPOSED TOLL HIKE AND STOP RAISING TAXES/FEES EVERY CHANCE YOU GET!!!!!!!!

From: Mike Morin via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

To the Members of the Illinois Tollway Board:

I respectfully urge the Board to reject the proposed toll increase for passenger vehicles and commercial traffic.
The Illinois Tollway's own financial reports show that current toll revenues already generate far more money than is needed for day-to-day maintenance and operations.

According to the Tollway's 2024 financial information:
• Total projected revenue was approximately $1.64 billion. • Maintenance and operations expenses were approximately $451 million. • Net revenue remaining after maintenance and operations exceeded $1.19 billion. • Even after debt service payments of approximately $529 million, the Tollway still retained more than $660 million for capital projects and reserve accounts.
Similarly, the Tollway's audited 2023 financial statements reported:
• More than $1.6 billion in operating revenue. • Approximately $416 million in maintenance and operating expenses. • Net operating revenue of approximately $1.19 billion.

These figures demonstrate that maintenance and operating costs represent only about one-quarter of annual Tollway revenue. The remaining funds are directed toward debt service, expansion projects, reconstruction programs, and other capital initiatives. While infrastructure investment is important, it is difficult to justify additional toll increases when the Tollway already collects nearly four times its annual maintenance and operating costs in revenue.

Many Illinois residents were originally promised that toll roads would eventually become self-sustaining and that tolls would not become a perpetual source of increasing revenue. Yet motorists continue to face higher costs despite the Tollway generating substantial annual surpluses above operating needs. Before imposing additional financial burdens on commuters, families, and businesses, the Board should:

Demonstrate why existing revenues are insufficient.

Explain why current capital plans cannot be prioritized within existing revenue streams.

Provide a transparent accounting showing how every additional dollar from the proposed increase would

be spent.
Explore cost reductions and project prioritization before increasing tolls on Illinois drivers.

Illinois motorists have already funded the Tollway system through decades of toll payments. Given the Tollway's strong revenue position and significant margin above maintenance costs, I respectfully request that the Board reject the proposed rate increase and focus instead on responsible stewardship of existing revenues.

Thank you for your consideration.
Sincerely,
Dariusz Pietrzykowski

Question/Comment:

I drive the skyway, tri-state, and veterans memorial tollway. Those tolls are way to expensive. The roads are either always under construction, or have way to much damage like the rest of the highways in the state of ILLINOIS. Now if you used that money from the tolls to replace and repair the roads that would be great. However I feel there hasn't been any improvement and yet the cost keeps going up for tolls.

Zip Code: 60442

Question/Comment:

Illinois residents already pay some of the highest property taxes in the nation. Most of that in the counties with these toll roads. This economy has already seen a monumental increase in the price of groceries. Illinois families cannot afford higher tolls on top of increased goods prices that will be caused by increased tolls. Businesses cannot afford the additional transportation costs while trying to maintain pricing. Gas prices are not going down and the tollway has been netting a profit for YEARS. Use the current and future toll profits to fund expansion projects. If those projects have to be longer to completion then that means longer times employed for Illinois workers. Stop the rate hike! Illinois can't afford the added costs.

Question/Comment:

The mismanagement of toll funds has always been a blight on our government budgeting, but to propose such a drastic, unscionable toll hike at a time where people are already struggling is beyond unthinkable. It not only hurts drivers (especially commuters) who are suffering from ridiculous gas prices, but it strikes everyone on Illinois by increasing transport costs - another cost that will be on to taxpayers and not businesses, usually with interest. Anyone who supports this hike should and will be publically and loudly identified as actively committing economic violence against Illinois residents. TLDR: Knock it the fuck off because we're all paying attention.

Question/Comment:

As an Illinois resident, I do not agree with the proposed toll increase. The revenue generated currently exceeds the needs and only provides yet another slush bucket that Illinois can conveniently reappropriate to supplement other short fall budgets as it just recently did with the overfunded Road Fund. And I strongly oppose any automatic increase that is being proposed. These policies do not build trust and allow the residence or taxpayers any say - just automatically raise costs even when not needed. These things are not done in good faith. They're a sneaky and lazy way to just increase revenue.

Zip Code: 60030

Question/Comment:

This is not a good option, you are taking in more revenue than ever before for a system that was supposed to stop charging us 50 years ago.
I know it is Illinois and all bureaucrats in Illinois just spend. Try cutting some of the redundancy and try using other vendors, not the same old cronies. I would like to see a road go in and not have to be replaced in two years…by the same company! Work smarter. And you are doing all of this on the backs of the working class, knock it off!

Question/Comment:

So many of us are suffocating over rising property taxes, rising gas, rising food cost, rising electricity cost, rising Nicor cost to heat our homes... Everything! I have a college degree, I work 40 hours a week in a corporate position. I make 60k with my base salary AND bonuses combined. I pay all of my taxes, pay my own health care expenses, many out of pocket as my HSA is already bled dry for the year WITH my employer contribution. I do not take handouts. I am paying off my college degree 15 years later still without ever asking for "forgiveness". I am drowning. My community is drowning. There is no transparency in government spending - My lawmakers make 3x my salary while telling me giving more is necessary. When do our lawmakers stop giving themselves pay raises to foot the bill instead? NO MORE COST INCREASES. NO MORE TOLL INCREASES. STOP TAXING US MORE AND MORE. I AM BLED DRY, ILLINOIS. YOU TRY LIVING ON 3200/MO AFTER TAXES AND HEALTHCARE AND TELL ME I HAVE MORE TO GIVE.

Question/Comment:

Stop stealing from We The People immediately!
We will seek the death penalty against any and all corrupt officials!

Hold up Emergency!
We can't even own any crypto currencies.
Cause it keeps getting stolen!
Between the thefts and being scammed.
I'm down over $ 100,000.00 from 2024.
Then as I was trying to recover the funds.
I just kept getting scammed and stolen from more. Then with this bitcoin garbage and the crypto currency industry.
It's literally crazy cause you can't get your funds back.
After they were stolen or after a scam.
Big changes need to happen!
Big security problems and way to many back doors. We need to be able to call crypto payments back quickly!
Or else these scammers will just continue to terrorize us.
Plus with all of the cash they are getting.
Will be used for evil bad things and terrorism!
I withdraw my support for the letter below.
Until all of these problems are fixed!
Also all of these companies are guilty of aiding and abetting these criminals, scammers & terrorists!
Any platforms that allow criminals to run false scam ads, fake profiles etc.
Plus they provide no assistance for their victims!
I have been scammed and stolen from people on Facebook and Instagram!
They are mostly responsible for this mess!
I can't afford to lose this money!
I lost my life savings my 401k destroyed my credit. They also stole my identity and i heard they are committing crimes around the world using my name. I've also had major problems with the companies and exchanges below.
Cashapp.com they wouldn't allow me to do any chargebacks etc.
I lost alot Crypto.com I had funds stolen from their exchange and their wallet Onchain.
Then when I needed help.

I then discovered they had no telephone support! Had to use email for support.
After losing about 40k That ran through crypto.com using DEFI & OnchainWallet. Plus Bitcoin.com wouldn't allow a chargeback. -5k Coinbase.com had thefts from within their exchange and their private wallet.
We urge you NOT to support (GENIUS) Act.
We need to eliminate all cryptocurrencies!

Sincerely,

George Budinger

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Ken Farley
Email: KFARLEY1951@GMAIL.COM
Zip Code: 60548

Question/Comment:

The spread between monies collected and cost associated appears to be widening by a lot. I do not think an increase is warranted at this time. What does need addressed is that a car towing a small boat or utility trailer is charged the same as a medium size truck. For example at the Farnsworth toll plaza a car or light truck with Ipass pays .75. Add a small single axle trailer the toll goes to $4.75. In all fairness, there needs to be a reasonable rate established for this type of tollway user.

Subject: Stop the Toll Hike

Name: Elizabeth Curtis
Email: betsy.curtis@gmail.com
Zip Code: 60137

Question/Comment:

I am writing as an Illinois resident to express my opposition to the proposed increase in Illinois tolls. Many Illinois families are already facing higher costs for housing, groceries, insurance, and other everyday expenses. Raising tolls would place yet another financial burden on commuters who often have little choice but to use toll roads to get to work, school, medical appointments, and other essential destinations.

I understand that maintaining and improving our transportation infrastructure requires funding, but I urge your administration to explore alternatives that prioritize efficiency, responsible spending, and other revenue options before asking Illinois residents to pay more.

Please consider the impact this increase would have on working families, retirees, and small businesses that rely on our tollway system every day. I respectfully ask that you oppose any unnecessary toll increases and seek solutions that keep Illinois affordable for its residents.

Thank you for your time and your consideration of my concerns. I appreciate your service to the people of Illinois.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Patrick Kenny
Email: PK1144@AOL.com
Zip Code: 61072

Question/Comment:

This proposed toll hike is completely unnecessary and the expenses versus revenues of the tollway authority shows that there should be a cut in tolls and not an increase. JB Prickzer will use the excess toll revenue for any other purpose he sees fit. He already stole fuel tax revenue to pay for the premiums for state workers health care. Illegally diverting monies that are supposed to go to the repair or replacement of roads in Illinois.

Question/Comment:

The toll way when created was promised to be free. It is already taking in more revenue than it costs to operate. I disagree with the state taking more of my money in taxes to disburse and distribute in ways that they deem "useful." The state does not know where the most useful place for my money is. I do not believe it should go to this project. I believe the state taxes are already too high pushing out businesses from this state and ultimately detrimentally affecting it's residents. Do not raise the toll tax.

Question/Comment:

To the Members of the Illinois State Toll Highway Authority Board:

I am writing to urge you to reject the proposed toll increase currently under consideration as part of the "Driving Connections" capital program.

The Illinois General Assembly authorized the Tollway Board to increase passenger tolls by approximately $0.45 per toll, raise commercial tolls by approximately 30%, and implement recurring inflation-based increases beginning in 2029. However, legislative authorization is not a legislative mandate. The responsibility now rests with this Board to determine whether exercising that authority is justified and in the best interests of Illinois residents.

For decades, Illinois motorists have financed the Tollway through user fees with the understanding that tolls exist to build, maintain, and retire debt on the tollway system. The Illinois State Toll Highway Authority was created as a self-supporting entity financed through toll revenue and bond financing, not as a perpetual mechanism for ever-expanding revenue collection.

Illinois drivers already shoulder one of the nation's highest overall transportation tax burdens through fuel taxes, vehicle registration fees, and tolls. Before asking working families and businesses to pay even more, the Board should demonstrate that every reasonable efficiency has been exhausted, existing revenues are insufficient, and alternative funding strategies have been fully evaluated.

The proposed increase would raise passenger tolls for the first time since 2012, increase trucking costs by approximately 30%, and establish automatic inflation adjustments every two years. While these measures are intended to fund a $26.5 billion capital program, they also commit future Illinois drivers to permanently escalating costs without requiring future legislative approval.

As members of the Tollway Board, you have both the authority and the responsibility to ask difficult questions:

* Is every proposed capital project essential?
* Have operating costs been independently reviewed for efficiency?
* Can portions of the program be phased to reduce the burden on taxpayers?
* Why should Illinois families accept automatic toll increases long after today's projects are completed?

Public confidence depends on transparency and fiscal restraint. A toll system that continually expands its revenue base without a clear long-term strategy for stabilizing costs risks becoming a permanent financial burden rather than a user-funded transportation system.

I respectfully request that the Board vote against the proposed toll increase and instead direct staff to develop alternatives that prioritize operational efficiency, responsible debt management, and protection of Illinois motorists from another significant increase in the cost of simply getting to work, school, and home.

Illinois residents deserve modern infrastructure, but they also deserve accountability. Fiscal discipline should come before higher tolls.

Respectfully,
Nathan Shock

Question/Comment:

This toll hike is not necessary!!!!!!! I just bought a house in a different state,(not mentioning it) In that state,the roads are 100% better from pavement quality, to striping,to road signs. Interstates are in pristine condition.....shoulders,overpasses,center medians,etc. This state has as much traffic,including trucks.They also have a very similar climate than Illinois. They have a fully operational DOT just like Illinois as well. The only difference.....this state does not have any tolls.The only toll is on the roadways near the capitol.They are pricey,BUT,this is only in a small portion of the state. Everywhere else.....NO TOLLS. Also....property taxes embarrass Illinois. I pay 2500 annually for a house on 7.02 acres. I am 10 minutes from town,and within 30 minutes of retail,hospitals, and restaurants. I was born in Illinois,and also am a 26+ year employee with IDOT.The State of Illinois is nice.....the people that run it are HORRIBLE!!!!!!!!! In a few years,I will be leaving Illinois,and retiring in a much better run area. Sorry to say,but it's a fact to anyone that does research comparing expenses in different states in the U.S.. ILLINOIS,ALSO CHICAGO ARE HUGE EMBARRASSMENTS!!!!! Thank you.

Question/Comment:

To pay for new infrastructure that benefits all motorists in the northern Illinois region, please continue to raise the tolls, particularly on commercial tolls.

I recognize that doing this hike incurs the risk of making goods more expensive in the region to compensate the greedy corporations that use the motorways but don't appreciate the public good that their taxes pay and the ways they too benefit from not having to lay down roads themselves to build their industries. In order to combat that, offer an alternative funding method or a penalty for corporations who raise their prices. Here are my proposals:

Alternative funding method:
1. Hang three local CEO's with net worth over 10 million (any large number will do) by their feet over a pool of starving sharks. If they don't agree to fund the projects in their entirety out of their own fortunes, then all three of them will be lowered into the water to be the sharks next snack. If they come to an agreement, you are good! Let them know that if 1 of them agrees, then that CEO is safe and the other 2 will be fed to the sharks. Not only does this lower the number of parasitic members of society, it also gets your state funding and would effectively make the roadways free for all Illinoisians.

2. Penalty
Tax at 100% all income made above 5 million in a year. This is more than enough money for any family in the state to live comfortably. Anyone who threatens to raise prices or is found hiding their wealth out of state/leaving the state is subject to execution by hungry shark pool.

I hope these ideas are helpful as we plan for a sustainable future that eliminates the primary driver of climate change and wealth inequality: greedy CEO's.

From: James O\'Day via Illinois Policy <action@illinoispolicy.org>

Zip Code: 60193

Question/Comment:

Why should we give them more money when they have been making a profit for the last 50 years? How about dealing with LESS profit so the rest of us don't get pushed into poverty from the price hikes for everything under the sun due to rising transportation costs. Numbers don't matter - people do. It's time for the government to remember this.

Question/Comment:

This is just another tax that the people have no voice in. Tolls are already too high and there is already a quite healthy net profit from tolls in Illinois. This should be put on a statewide referendum for the people of Illinois to decide and not just another tax to raise money at the ITA's whim. Please reject the toll hike and help the people of Illinois monetarily as the hike will also increase costs for anything that is shipped across the board. Thank you.

Zip Code: 60544

Question/Comment:

The Illinois Tollway Authority needs to put their focus on lowering their operating revenue! Since the 80's, the Tollway Authority's operating revenue has increased at a much higher rate than the maintenance and expenses, and then around 2005 is started skyrocketing. The tollway should prioritize their operating revenue rather than just simply charging more for tolls to hide their expenses

From: Timothy Sargent via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Roberta Cinnamon
Email: rrljcinnamon@gmail.com
Zip Code: 61483

Question/Comment:

Obviously the Toll Board is not operating according to its own promises to public motorists and commercial truckers. A financial audit and change of board membership is overdue. It appears they are following in the footsteps of previous governors and Madigan which led to prison terms. The state of Illinois is being raped by government officials and boards. There is no pride/honesty by many people and their actions.

From: Linda Kehoe via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

This is ridiculous! Consumers in IL are being gouged with taxes. Il has second highest property taxes in rhe country and the second highest gasoline taxes. Pritzer diverted road funds to help Chicago. Every day I read taxes going up and why do they think the average American citizen can absorb these increases.

I commute to rockford occasionally and pay the tolls. If you want to raise the tolls, fine, but I am willing to backroad to visit my family and not pay a dime.

Email: bdkrma911@gmail.com
Zip Code: 69586

Question/Comment:

You barely ever raise the till on cars! Raise them, leave the trucks alone. This will cause me, and many others just to avoid toll roads all together, forcing us onto surface streets and residential neighborhoods, is that what you want? Me, with a 60000lb excavator driving past your house? Raise this like you want, that's what you're going to get. Stop using commercial vehicles as a cash cow! Also..when you raise rates on commercial vehicles, guess what happens? THE COST GETS PASSED ON TO THE CONSUMER! Guess again what that is...INFLATION! I know you're just going to raise the rates despite anything, because citizens voices don't matter, just as voting means nothing, you'll just do whatever you want anyway, just know...more trucks on surface streets and more inflation.

Email: freeman.russell@sbcglobal.net
Zip Code: 60126

Question/Comment:

IL Tollway Board of Directors and Governor,

Respectfully, this is an absolutely terrible idea. Illinois is already one of the most expensive states to live in and we do not get a lot of return on that investment. We pay the highest property taxes, highest gas tax, high state income taxes, high sales taxes. The gas tax has been conveniently set to automatically increase each year much like you plan on now doing with tolls. This is kind of a lazy way to increase revenue regardless of it hurting the state overall. Consumer prices in the state are going to drastically increase because of increased costs in transporting goods due to the huge increase in toll pricing. Illinois is chasing away big businesses already in the state. Creating an environment that is not hospitable to attracting new businesses, and is losing residents to other states. All that will be left in Illinois is the very wealthy and the very poor. Even the Chicago Bears are leaving the state! Thank you for allowing me to voice my opinion.

Zip Code: 60656

Question/Comment:

Given the fact that the tollway authority has taken in more revenue every year since 1973 than it needs for maintenance, etc., it makes no sense that it now wants to raise the rates. I do *not* support this rate hike at all; instead, it sounds like the tollway authority needs to be a better steward of its already more-than-enough revenue.

Zip Code: 60193

Question/Comment:

The Illinois Tollway is NOT short-funded! The tolls do NOT need to be hiked up! This hike in tollway taxes is a hide-out for gathering more money from citizens.
Driving in Illinois is getting totally ridiculous in cost between tolls and gas taxes, etc.
It was a wake-up call for us as we drove to see family in Indiana and paid almost $1.00 less for gas and other items.
Governor Pritzker likes to tell us that we are in great shape with our budget, that he is working for the citizens...then hikes come in "behind the scene" places like this!

This is totally unacceptable to Illinois residents and to truckers who have to transport or goods and is causing an even great financial burden on citizens.

Please do NOT approve a toll hike!

Thanks for your efforts.

Sincerely,

Virginia Wachsmuth
Schaumburg, Illinois

Question/Comment:

When will the poor fiscal management of the Illinois Tollway Authority and the other State agencies stop???? We as taxpayers have a budget to live on why can't the State of Illinois operate on a balanced budget?? Our budget includes the rising taxes created by the Governor and then passed by the rest of the bureacrats in this state. No wonder Illinois is losing residents, business and tourism with the taxes. Is now the time to add this 59% hike for the tollway??
Use some common sense and become fiscally repsonsible with the taxpayers money. As a Illinois resident, I am tired of hearing all the excuses and cover up of the reason to increase taxes or fees.
You have a budget, live within it like we as citizens have to do

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Nana Agyeman
Email: Nomordrama365@yahoo.com
Zip Code: 60069

Question/Comment:

I hope this message finds you well. I am writing to express my strong opposition to any future toll hikes in our region. As a concerned constituent, I believe that increasing tolls places an unnecessary financial burden on commuters and families who rely on our roadways for their daily activities.

Many residents are already feeling the strain of rising living costs, and further increases in tolls would only exacerbate this issue. It is essential that we prioritize the economic well-being of our community and explore alternative funding solutions that do not disproportionately impact working families.

I urge you to consider the voices of your constituents and advocate against any proposed toll hikes. Together, we can work towards a more equitable solution for our transportation needs.

Thank you for your attention to this important matter.

Sincerely,
Nana Agyeman

Email: justaddwaterlandscapes@gmail.com
Zip Code: 60193

Question/Comment:

Enough. Tolls were supposed to come off roads when things were paid for. These increases are aimed at the NW Suburbs where over 90% of tax payers are white.
.45 per toll? I have 4 tolls just to get to 53.
You stole money from the taxpayers just to add a single lane on both Eastbound and Westbound 390. At the same time you pushed tolls to help pay for it. Elgin Ohare was free and too a lot of traffic of the surface streets. Adding this tax will push those vehicles that take 399 back onto the surface streets of Schaumburg, Hanover Park, and Roselle. Don't do it. If you do revenue will drop. Adding this toll hike will make 399 the most expensive per mile tollroad in the United States.

Subject: Stop the Toll Hike

Name: Mary Noto
Email: pinotbaby@aol.com
Zip Code: 60440

Question/Comment:

Dear Governor Pritzker and Tollway board,

It is with extreme concern that I ask you to reject the toll hike on Illinois drivers. Illinois drivers already pay some of the highest taxes and fees in the country.

Illinois residents are already struggling to pay living expenses and the increase in tolls will only make that struggle harder. Prices on consumer goods will also increase due to the tollway hike causing more undue financial stress on each Illinois resident.

As a struggling resident of Illinois, I ask that you please reject the toll hike on Illinois drivers.

Respectfully,

Mary Noto

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Chris Middleton
Email: chrdra69@gmail.com
Zip Code: 60030

Question/Comment:

This is just another way to stick it to the working class(that you say you care about. Which is CLAERLY a lie). And now the residual effects from this will not only be higher costs on tolls(of which were supposed to be temporary in the first place and not used as a bank account to "balance" your budget). But the cost of goods will increase. Which will take even more money away from my family. So it's not just going to be a 45 cent increase. It will be much more! Along with the price of gas, you are putting TOO MUCH on our backs. What happened to having the billionaires pay more?? Oh, that's right, you ARE one, I forgot that's why they Don't pay!!

Subject: Stop the Toll Hike

Name: Leslie Turner
Email: captles@gmail.com
Zip Code: 60137

Question/Comment:

I urge you to vote against the raise in tolls for both private and commercial vehices. There are many reasons to keep tolls as is. The best is that the ITHA is not a profit organization. It takes in more tolls than are needed to maintain the systems road and administration. Another is that by increasing tolls on commercial verhicles ultimate increases prices on goods and services for Illinois residents, making the raise a double hit for residents who use the tollway - increased tolls and increased prices. Do not raise toll rates. Thank you.

From: Dana Hough via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Dana Hough
Email: dndhough@att.net
Zip Code: 60156

Question/Comment:

I currently pay $725 a year in tolls, with the proposed increase that number will escalate to $1400. Our state already has one of the highest fuel tax rates in the country and now you want to hit us again with an insane increase.
I would pause additional toll ways like adding interest 55, this would spread the toll burden on southwest commuters meters heading towards this city. They are the only ones who can bypass the till system.
In additional the increase is proposed offset the CTA transit short falls. Here there needs to be an increase to close the funding short falls.
Let's stop taxing the good citizens of Illinois at every turn. We are on the list of the highest tax in the nation. From sales tax, gasoline tax, property tax and the list goes on.
Stop the madness and reject the proposed rate increase.

From: Robert Mason via Illinois Policy <action@illinoispolicy.org>

Email: kurtdeckelman@hotmail.com
Zip Code: 60439

Question/Comment:

Absolutely ridiculous!!!! Illinois is one of the highest taxed states already and the Illinois Tollway Board wants to increase tolls! You need to work within your budgetary means like all households in our already highly taxed Illinois. Citizens like myself are fed up with tax and spend liberal policies which make Illinois less affordable to live in each and every day! Just another tax hike which will enable more citizens decide to move to another state with lower taxes and greater affordability versus unaffordable Illinois! Do you job and operate within your current budget as revenues have been increasing steadily anyways with the current toll rates! Your reasons for hiking the toll rates equates to total BS.

Zip Code: 60070

Question/Comment:

Do any of you actually drive on the tollway? When it is under construction, which btw, is ALL THE TIME, it is a nightmare to drive and trips take twice as long to get out of the Chicago area. It's time to start investing in road materials that actually last longer than 5years and get it done once and for all. Also, most of the time the lanes are reduced and there are no workers in sight. Why are there not crews on the road 24/7 until its done? And stop raising the toll rates for something that was supposed to finished 50 years ago. Paying yourself more to get less done is not pretty and highly dishonest and annoying. I have lived here my whole life and there is never not a time when all major arteries are not torn up somewhere. Make better choices...this is one reason people cannot wait to get out of this state. Believe me, if I could I would.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: David Napientek
Email: vpnap85@yahoo.com
Zip Code: 60181

Question/Comment:

This is ridiculous. This toll increase is not needed, as you all know, and then you want to increase it yearly like the gas tax, why? There is no good reason for this. Free in 73, didn't mean 2073 or 2173, it meant 1973. You're already sitting on a pile of cash and don't need anymore. This is just going to lead to higher prices in store too, since you want to tax the trucking industry into oblivion. When you're #1 in taxation, people leave, and so do corporations. Stop needless spending. Act like it's your own bak account and live within your means for once!

When toll revenue is at an all time high, and more that what is necessary to pay for road upkeep, what is the justification for this massive increase?

From: Amy Domke via Illinois Policy <action@illinoispolicy.org>

Email: Madomke@aol.com
Zip Code: 60010

Question/Comment:

Stop the tollway increases. Our taxes are outrageous. You are pricing everyday people out of this state. I do not agree with a tollway increase. I do not agree with another gas tax increase. It's time for the state to reduce its frivolous spending and take ownership and responsibility for it's overspending and start caring about the hard-working Illinois residents that are being taxed out of the state.

Question/Comment:

ABSOLUTELY DISGUSTING! YOU DO NOT NEED TO RAISE TOLL PRICING!
Tollway reports highest net revenue on record in 2024
Operating revenue
1.7B
Maintenance & expenses
421.56M
Net revenue is the difference between operating revenue and maintenance and operating expenses.

Question/Comment:

"only 0.45" is a really clever way to say "a 50% increase on most of the tolls". Even more silly is "rates increase every 2 years to allow price stability" as if 12 years of not raising the rates wasn't stable. You all make MORE than enough to maintain these roads, a billion traffic cones to do nothing but cause traffic for 5 years can not possibly cost more than your record breaking revenue brings in per year for these tolls that were promised to be temporary to begin with.

Subject: Stop the Toll Hike

Name: Dottie Masterson
Email: dottie_easton@hotmail.com
Zip Code: 60068

Question/Comment:

I recently discovered that there is a toll hike proposal being considered by the board. On a tollway system that was supposed to be free decades ago, and that is taking in more revenue now than ever. We are a small business with trucks on the road every day. This will add to our already higher costs from state gas taxes, etc. which will require us to increase our prices to consumers and lower the wage increases we can give to our employees. Illinois needs to control what it spends and stop taxing Illinois residents to death. We have some of the highest tax burdens with fees, gas taxes, sales taxes, property taxes and tolls. With no one in government acting responsibly to manage the budget. These increases have to stop or the Illinois economy will continue to shrink as residents leave for other states. This will hurt our business and many others. We want to keep doing business in Illinois, please stop making it hard to do that.

Question/Comment:

Stop the toll hike

From: Brigette Douglas via Illinois Policy <action@illinoispolicy.org>
Sent: Friday, July 10, 2026 11:12 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Brigette Douglas
Email: bdoug1005@sbcglobal.net
Zip Code: 60643

Question/Comment:

Do not raise the tolls on the expressway as this impacts mostly the middle class whom use the system to get to and from work. With all other costs skyrocketing (gas, property, food, etc.) these additional increases are causing additional hardship to those who can least afford it. This will also cause additional traffic on streets as more people will use those to avoid the increase. Public transportation doesn't go to some of the outlying areas which the tollway transitions. There has got to be other options.

Question/Comment:

We love visiting our friends, family, and all the sites around Chicago. We enjoy going downtown for a meal, play, concert, or to spend a couple of days just walking around.
This weekend we will be visiting the Obama center. We don't have tickets to the museum it are looking forward to see the grounds and have lunch before heading back to Indiana.
As it is, Chicago is an expensive town to visit. Add in the high cost of gas, (thank you Trump), parking, entertainment tax, hotel taxes, etc. and it's getting harder to make the trip.
Please come to some other solution.
Thank you,
Pam Weingart

Question/Comment:

I urge you to reject the proposed 59% toll increase for Illinois drivers.

Illinois families are already facing some of the highest taxes and fees in the nation. A toll increase of this magnitude would place an additional burden on commuters, working families, and small businesses that rely on the Tollway every day.

Illinois drivers have heard promises before. In 2012, the Tollway approved its first passenger vehicle toll increase in nearly 30 years, raising I-PASS tolls from $0.40 to $0.75 (an 87.5% increase) to fund the "Move Illinois" capital program. Drivers were told the 'temporary' increase was necessary to rebuild and modernize the system, yet those higher tolls never returned to previous levels after the projects were completed.

Before asking drivers to pay even more, the Tollway should demonstrate that existing revenues have been managed efficiently, provide a full public accounting of how current toll dollars have been spent, and explore cost-saving measures instead of imposing another significant increase.

Illinois residents deserve transparency, accountability, and relief—not another permanent increase in the cost of simply getting to work, school, and home.

Please vote against this proposed toll hike.

Question/Comment:

I am tired of the ever-increasing taxes and fees, and this one is even more egregious because the tolls were supposed to go away entirely and yet they are just a new candy jar for government to reach into. This madness must stop. No toll increases! Go back to the original promise to remove them. Stop spending, find ways to make do like all of taxpayers have to.

Question/Comment:

Hiking the tolls in the current economy is a terrible idea. There should be no need to increase tolls after recording record breaking annual revenue numbers recently. The roughly 17 year, 20 billion dollar project justification has zero truth, from personal experience as a lifelong Chicagoan. Revenue is up and road conditions are down, the Tollway has proven that increasing revenue will not improve the roads.

Question/Comment:

07/13/2026
To the Office of the Governor / Illinois General Assembly
State House
Springfield, IL 62706
Subject: Opposition to Toll and Tax Increases Facing Struggling Illinois Families
I am writing to express my strongest opposition to the recent tax hikes on tolls and the continuous rise of taxes in Illinois. Our state already has some of the highest tax burdens in the nation, and these constant increases are making it financially impossible for hardworking residents to survive.
My family is currently at a breaking point due to the following compounding crises:
Elderly Caregiving: I am the sole caregiver for my 94-year-old father who suffers from dementia, and my 90-year-old mother who is confined to a wheelchair.
Lack of State Support: We receive zero financial assistance from the state because we are told our income is "too high," forcing me to quit my job to provide full-time care.
Sole Income Strain: My husband is a truck driver, meaning our family relies entirely on his wheels to make a living. Higher toll taxes directly penalize his livelihood and our primary income.
Medical Debt: I am currently recovering from sepsis, which required a 9-day hospital stay and 30 days of intense antibiotic treatment, leaving us with mounting medical bills.
Educational Costs: My daughter is a proud survivor of classic Hodgkin lymphoma and was recently accepted into the nursing program at UIC. This education is incredibly expensive, yet vital for her future.
We have no extra income, yet our taxes go up every single year. It is absurd and deeply unjust to demand more money from families who are already drowning under the weight of medical emergencies, caregiving demands, and inflation.
I urge you to halt these toll and tax increases immediately and start delivering relief to the citizens who keep this state running.
Sincerely,
Kathryn M Morrison

Question/Comment:

How can you in good conscience think of raising yet another tax in Illinois. The tollways were supposed to be free by 73 yet again, your response to your own inability to maintain and reduce spending is to tax tax tax. The roads are horrendous. You've wasted millions of dollars over the last few years on 294 alone, tearing up the road in the summer to only lay inferior asphalt before winter to then tear it up again. You reduced toll collectors on 294 yet still want to raise tolls, it's severe mismanagement and gross negligence. Especially including automatic increases in the future. This is criminal. You cannot approve this.

Subject: Stop the Toll Hike

Name: Michael Lloyd
Email: mjlloyd2@gmail.com
Zip Code: 60462

Question/Comment:

If tolls are being raised on drivers then fares should be raised for commuters. Illinois took funds that were supposed to be used for roads to bail out transit without requiring an increase in transit fares. More Illinoisans drive than use transit. It is not fair to place additional costs on users of one form of transportation for ver another. Just because special interest groups don't like cars doesn't mean drivers should be punished for using the most flexible form of transportation we have.

Zip Code: 60169

Question/Comment:

We the drivers who pay the tolls to get to work & pay higher prices for goods that increased because of commercial price hikes DEMAND that you REJECT the price increases. It is unfair to put another burden on your constituents who are already taxed on multiple levels within the city and state.

The main I90 going into the city & coming out has been a tangled mess for decades. There has been little improvement over the years to deal with the influx of traffic & the logistics of getting in & out of the city. Why is the extra revenue not being used to solve this. Many cities have dealt with these problems efficiently and creatively.

You as our governer should be striving to do what's best for us & making our lives easier. That does not involve creating additional revenue streams in a scenario where the current revenues well EXCEED operating and maintenence expenses since the last hike in 2012.

I DO NOT support the price increase and you should not approve it!

Question/Comment:

please reconsider
Commercial buck passing will redistribute the cost to end users who already can't afford what there purchasing and private folks will take the affordable route aka side streets. A family with a car and a small single axle trailer with jet ski from Lockport illinois on I355 to Torrance ave. is $13.10 one way 2 tolls plaza 99 and plaza 43
this is price today
This cost is over 1 Dollar per Minute a family of 4 will not afford this round trip
this example is correct and not the cost of semi truck that delivers the jets to factory dealer for resale to the family which can be 4 times the cost of personal vehicles these fees will be added at sales desk and the family won't buy the jet ski

Question/Comment:

There is no need to further burden the citizens of Illinois with yet another fee increase. Quit being beholden to the unions in this state and instead help the working citizens of this state. There is already a large surplus in the road account. This is nothing more than another gift to unions for their political support for the tax and spend Democrats who are ruining this state. Instead of raising tolls, maybe an increase in fares for those who use public transportation would be a better idea to keep public transit funded instead of making those who don't use it pay for those who do just to keep the unions happy.

Question/Comment:

Governor Pritzker,

I am writing to express my strong opposition to any increase in Illinois toll rates. It feels as though taxpayers are continually being asked to cover the cost of growing government spending, while meaningful efforts to control expenses are rarely discussed. Like many Illinois residents, I work hard, pay my taxes, and already face rising costs for nearly every aspect of daily life.

Before asking families and commuters to pay more, I urge your administration to prioritize finding efficiencies, eliminating waste, and exercising greater fiscal discipline within state government. Raising tolls should be a last resort, not the default solution whenever additional revenue is needed. I hope you will consider the cumulative financial burden that repeated fee and tax increases place on working Illinoisans and reject any proposal to increase roadway tolls.

Sincerely,
Jerry Cizek

Zip Code: 60120

Question/Comment:

At a time that Illinois residents are struggling now is not the time to increase the cost of using the highway system. This plan disproportionately affects northern Illinois residents. As a family of 5 we have already cut back on our leisure spending because the cost of everything, groceries, taxes, gas, and utilities have risen. Living in the Chicago land area we often use the toll system to go about everyday life and to partake in the free and low cost leisure activities of the region. With a hike in toll prices we will have to consider that added cost and stay even more local.

Subject: Please Stop the Proposed Illinois Toll Increase

Name: steve collins
Email: Steve@KeeganCollins.com
Zip Code: 60565

Question/Comment:

Governor Pritzker,

I am writing to urge you to stop the proposed Illinois toll increase. The cost of living continues to rise, and working families are already struggling with higher prices for groceries, gas, housing, and other everyday necessities.

For many of us, toll roads are not a luxury—they are part of our daily commute to work. Increasing tolls will place yet another financial burden on the people who can least afford it. The common, hardworking citizen is being asked to absorb one more increase while already stretching every paycheck.

Please reconsider this proposal and look for other ways to fund transportation improvements without placing additional costs on Illinois residents.

Thank you for your time and consideration.

Sincerely,

Steve Collins

Zip Code: 60423

Question/Comment:

Tolls are already high enough, especially considering they were intended to be temporary and end. There is already an abundance of money in the road fund, as you initially stated, the road fund doesn't need the money, you're doing the increase to buy the unions. Tolls have never gone down, despite the fact that there are no human toll collectors, so where does all the money go? Increased tolls will keep the price of food and goods at a higher cost in the northern half of IL, we already pay more in taxes than the rest of the state. Enough is enough already.

Question/Comment:

This is absolutely ridiculous! Can't wait to retire in 8 years and move to another state. It is a shame I am being forced to move out of this state just so I can retire! You might as well start taxing taxes at this rate, all while you are giving yourself cost of living increases.
I'm sure even if you get 5,000,000 messages, this will still go through. No thought to the impact this will have on the people that drive this every day to go to work, less to spend at the grocery store, less to spend on ourselves, less into retirement accounts!
Stop spending more than you have, if the average household spent the way our IL Government does, they would have to file bankruptcy!
This was all caused by past leadership, and it continues with the new.
You definitely have not learned from the mistakes of past!
That is all.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Lawrence Knott
Email: ltknott27@gmail.com
Zip Code: 60126

Question/Comment:

I respectfully oppose the proposed increase in road tolls, as it would place an additional financial burden on commuters, families, and businesses that rely on these transportation routes daily. At a time when many individuals are already facing rising living and operating costs, increasing toll rates could create unnecessary hardship and disproportionately impact those who have limited alternative travel options. Before implementing any toll increase, I encourage decision-makers to explore alternative funding solutions, improve operational efficiencies, and provide greater transparency regarding how existing toll revenues are being utilized. Any proposed changes should be carefully evaluated to ensure they are fair, justified, and in the best interests of the communities that depend on these roadways.

Zip Code: 60187

Question/Comment:

Tolls on Illinois roads were originally supposed to end when the bonds financing the tollways were paid. That was decades ago! At present Illinois drivers pay among the hightest tolls in the country and have one of the most expensive tollways (Elgin-O'Hare) if not the most expensive in the nation. STOP IT! Ridiculous costs, fees and expenses are burdening those who remain in Illinois and now a proposed 59% bump on a toll fee is absurd. STOP IT!

Mister governor, stop looking for ways and places to fund the outrageous programs and policies that should be reduced and or eliminated. lOOK FOR WAYS TO DO THAT RATHER THAN INCREASE THE DRAIN ON ILLINOIS RESIDENTS!

STOP IT

Subject: Please Do Not Hike Tolls on the Roads in Illinois

Name: Ken Wittenberg
Email: ken.wittenberg@summitmg.com
Zip Code: 60188

Question/Comment:

Dear Governor Pritzker and Illinois Tollway Board of Directors,
Can you please reconsider the significant toll hikes in Illinois. Many of us depend on the tollway system to get to and from work, to travel to hospitals and doctors for healthcare, and for traveling into the city to try and support Chicago and surrounding communities. Illinois already has some of the highest taxes in the country and this would make it even more difficult for many families who are already struggling to make ends meet. Thank you for your consideration.

Cc: Abigail Nelsom

Thank you for forwarding my request regarding IPASS/Rental Cars to Customer Relations.

Abigail Nelson reached out via phone and email to assist me. She provided me with the documentation that is needed to provide to the rental company. She also reviewed the multiple rentals I have made this year and explained the rental registration process. I will be more cognizant going forward when entering the vehicle type.

Thank you, Abby, for being personable and professional and for your quick response time and effort in helping me resolve this matter!

Have a great day and stay cool!

Sincerely,
Kris

Zip Code: 60193

Question/Comment:

We have enough inflation without the government pitching in. Tolls were supposed to phase out, but they keep on and on and on. These increases will affect transportation cost and therefore prices of food and other goods. The governor has no shame, he will blame the inflation on Trump, but the board has no excuse.

From: Scott Smith via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, July 14, 2026 10:42 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hikes

Name: Scott Smith
Email: ffsmith137@hotmail.com
Zip Code: 60135

Question/Comment:

A toll hike is an additional tax on roadway users. If voted and approved, which you can lawfully do, take it to a vote each time you want an increase. Illinoisians are sick and tired of increased taxes with built in escalators. Nobody gets a vote if escalators should be an automatic taxing policy. If the State wishes to increases taxes, it should be handled when the “need” arises and not just because the State believes they will need more later. It is a punishment levied on the citizenry when taxes increase automatically. All tax levied, including tolls, should require debate and a vote each time a “need” arises instead of a 1 time consideration where taxes keep rising infinitely.

Zip Code: 60178

Question/Comment:

Our State is the worst run state in the country. All the Politicians want to do is raise taxes on everyone. I never hear about cost reductions and efficiency plans. Our roads need improvements for sure but where has all the money collected to date gone? This increase will be carried by me the consumer. This is another reason for people who can to move out of this state. The governor should act for the people of the State instead of his desire to be president. Our whole State government has too many layers. We need to concentrate on efficiencies instead of taxing the residents. That's what a Capitalistic country is about. No Increase please.

Question/Comment:

Do not increase tolls for IL drivers who have I-pass! Hit up the other drivers if you must but why not just use these collected tolls more frugally. Too much waste in IL.

From: Mark Grasso via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, July 14, 2026 11:06 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike!

Name: Mark Grasso
Email: dirtridermg@me.com
Zip Code: 60423

Question/Comment:

I oppose the toll hike proposal. Toll road users should not be penalized for using this road system. We should not be funding projects outside the scope of repairing and maintaining our toll-road system. We should not be forced to prop-up union labor organizations. Lastly, automatic increases should NEVER be a part of government policy. We see how funds are swept of their surpluses to pay for other areas rather than being used as intended. Funding requests should be presented on an as-needed basis for public approval. I ask you to please vote NO for this rate hike.

From: Luke Bernier via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Gov Pritzker,

Since our tollway is currently well funded, is it necessary to do another tollway fare increase at this time? The sum of all these microtaxes really affect the voters whom you say you care about, the lower-income voters.

Please consider this request.

Regards
Luke Bernier

Question/Comment:

Tolls are expensive enough as is. I think you need to figure out an alternative method to funding the project. It's very discouraging to pay a toll when you're doing nothing but parking on the tollway on many occasions. It becomes a parking lot due to the abundance of traffic on it. Please take this into serious consideration and thank you.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Krystyna Prochenski
Email: z-gorna@outlook.com
Zip Code: 60018

Question/Comment:

Dear Tollway Board,
Please consider the overall effect your increase will have on the economy before deciding to approve this toll increase and to approve the inflation based toll increase. Same thing was done for the gas tax, that money is supposed to be used for roads and it is not. The increase will only be passed onto the rest of the consumers by increasing prices on food and other products that are being delivered using the toll roads. Plus people will divers to the local roads to avoid the toll, damaging those roads even more. There is already enough money in the road accounts to maintain the tolls and roads, so much so that other areas (transit) is helping themselves to the money. That should not be allowed and yet it is. So your increase will only make the balance larger for others to spend on things not related to tolls.
I urge you to be treat this as you would your own budget at home.
The consumer only has so much money to spend, there are no automatic pay increases that would offset all the other increases being forced on, taxes and such. We consumers have to manage with what we have, we cannot just put out a request for an increase to balance our household.
Thank you,
-Krystyna

Question/Comment:

To Governor Pritzker and the Tollway Authority -
I'm asking you to please have mercy on the people of Illinois and reconsider the toll increases. We realize that some of tolls are paid by out of state drivers. But what about the locals who can't afford another increase in their expenses? And the commercial toll increase will be paid by everyone in Illinois who needs goods that ship in over toll roads. Can you not see that ordinary people can't bear any more financial burden? So many of your citizens' backs are already against the wall. Please consider the consequences for the common taxpayers who are struggling. Thank you

From: Roger Yule via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Roger Yule
Email: rjyule@yahoo.com
Zip Code: 60423

Question/Comment:

I am against any further toll hikes. We already pay too much to drive the Illinois Tollways. This last toll hike was to provide money to the RTA, the CTA, PACE and METRA. I find that repugnant! Why should my driving dollars support people who use those services? The Tollway was set up to allow users to pay for the maintenance. Similarly the gas tax is to provide funding for people who drive the roads. I do not use the RTA or the CTA. Therefore I SHOULD NOT be paying for them. Those who ride those systems should pay for them. Yet you want $1.5 billion to come out of the pockets of those who drive the tollway? That is simply NOT FAIR!

You are elected. Pretty soon you will be taxing us to the point where you won't be elected. Let Chicago pay for itself, not me! Cut some of the pork from the systems and agencies of the state FIRST before you put your hand in the pockets of tollway drivers.

ThHank you.

Roger J. Yule

Email: kwier87@gmail.com
Zip Code: 60015

Question/Comment:

I am writing to express my concern over the continued increases in Illinois tolls. Raising tolls is, in effect, a regressive tax that disproportionately impacts working families, commuters, and small business owners who rely on our tollways every day.

Unlike income taxes, toll increases take the same amount from everyone regardless of their ability to pay. Many Illinois residents have little choice but to use the tollway system to get to work, medical appointments, or school. For them, these increases are not optional—they are an unavoidable additional expense that continues to grow year after year.

Small businesses, delivery services, contractors, and truck drivers also bear the burden of higher tolls. Those increased costs are ultimately passed on to Illinois consumers through higher prices for goods and services, adding to the financial pressures families are already facing.

Illinois residents already pay significant taxes, including income, property, sales, and fuel taxes. Continually increasing tolls places yet another financial burden on those who are simply trying to earn a living and support their families.

I respectfully ask that your administration reconsider any future toll increases and instead pursue greater efficiencies, cost controls, and transparency within the Illinois Tollway system before asking taxpayers and commuters to pay more.

Illinois needs policies that make our state more affordable, not less. I hope you will take these concerns into consideration as future transportation funding decisions are made.

Zip Code: 60068

Question/Comment:

Enough. we now have the worst tax burden in the country, and nothing to show for it. We have highest gas tax, sales tax, property tax and probably a bunch of others that are too numerous to mention. As a lifelong resident, the quality of life continues to decrease, with no visible improvements in our infrastructure and roads. Traffic, construction, and potholes were never this bad. Not to mention the road fund has a surplus, so why the need for the toll hikes?. I do hope this and subsequent administrations demonstrate some semblance of competency and understand that Illinois problem isn't one of revenue. Each year's revenues set records, yet the state's despondent tax payers get asked for more by people who do not seem to comprehend that the spending side of the equation is what is out of kilter. Until this happens, i will vote against any individaul, party, referendum etc that proposes any more tax hikes of user fees.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike!!

Name: Keith Lubinski
Email: Doth4713@yahoo.com
Zip Code: 60453

Question/Comment:

I strongly oppose any increase in Illinois tolls and urge the Illinois Tollway Board to reject this proposal.

Illinois drivers already shoulder one of the highest overall tax burdens in the nation. Between property taxes, income taxes, sales taxes, gas taxes, vehicle registration fees, and existing tolls, working families have reached their limit. A proposed 59% toll increase is unacceptable.

Instead of asking taxpayers and commuters to pay even more, the State should focus on reducing spending, eliminating waste, improving efficiency, and holding government accountable. Families are expected to live within their budgets, and state government should do the same.

Too many elected officials appear disconnected from the financial realities facing everyday Illinoisans. Decisions that significantly increase the cost of commuting place an unfair burden on workers, small businesses, and families who are already struggling with inflation and the rising cost of living.

Illinois does not need another increase in taxes or fees. It needs responsible fiscal management and a commitment to controlling costs before asking residents to pay more.

Vote NO on any toll increase. Put Illinois taxpayers first by cutting government costs—not increasing the financial burden on the people who already fund this state.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Philip Seils
Email: nasaguy95@gmail.com
Zip Code: 60655

Question/Comment:

I regularly use the tollway system to save time & fuel. Raising the tolls & coupling that with the horrible annual gas tax increase will make me reconsider using the system entirely. Making the local roads busier & in need of repair sooner, further increasing the decaying infrastructure in this state.
Considering Illinois is supposed to be advocating for a greener future, why are you considering deterring us from using the most efficient route possible just to fleece us of more of our money through a massive increase in tolls.
The original promise of the tolls was that they would be removed once the road was paid for, that was back in the 70s. Since then the tollway roads have always been in disrepair until the politicians & bureaucrats could no longer ignore the complaints of the drivers. It's obvious that you don't spend the tolls collected efficiently or effectively to begin with, so why should we be forced to pay more for a roadway that isn't maintained well to begin with?
Start with reevaluating maintenance contracts & staff reductions, considering the roadway is practically entirely automated to begin (this with should be easy), before you demand we pay more money.

Question/Comment:

I drive the Illinois tollway every week to see family. If you raise the rates, I will boycott the tollway completely, even if it takes me longer to get my destination.
Please consider the added expense on the everyday commuter, when things in Illinois are already expensive.

From: Russ BARTMESS via Illinois Policy <action@illinoispolicy.org>
Sent: Tuesday, July 14, 2026 5:48 PM
To: Board of Directors; governor@state.il.us
Subject: rbartmess@sbcglobal.net

Name: Russ BARTMESS
Email: rbartmess@sbcglobal.net
Zip Code: 60014

Question/Comment:

A 59% hike in tolls is unconscionable. The idea of instituting permanent future toll charges automatically smacks of taxation without representation, or at least without the electorate's ability to review the automatic hikes beforehand. The collar county taxpayers are among the most heavily taxed citizens not only in the state but in the entire country. The Tollway Authority could do a great public service and moderate the proposed increase (if at all needed) and to forego the automatic future toll increases.

Email: ift100@comcast.net
Zip Code: 60004

Question/Comment:

Funds were diverted from the highway construction fund to pay for the CTA, which hasn't had a fare increase in seven years. The ridiculously high increase in tolls is now needed to replenish the highway construction fund. Suburbanites should not have to pay for the CTA. Those of us would really like the inexpensive mass transit system that Chicagoans have. This increase is completely unfair.

Question/Comment:

Dear Gov Pritzker & Tollway Board Members,

I urgently request that you STOP any consideration of more highway toll increases in Illinois.

We cannot afford to pay MORE to simply get to work 5 days a week. For those whose jobs are not near public transportation, automobile is the only choice. You've increased the gas tax! Do you want to de-incentivize people from working? Or just drive additional people to leave the state of IL??!? And the people leaving, tend to be higher educated with professional careers in high paying industries. NOT exactly the people we want to leave our great state, right?

Please start thinking and passing bills that are PRO-BUSINESS, PRO-MIDDLE CLASS, PRO-RETAINING IL RESIDENTS. We need less government interference and fewer taxes and laws...they just hinder and hurt the small businesses and the people paying the bulk of all the state's taxes.

It's not that hard. The majority of people want to be able to afford a decent house in a safe neighborhood, work at a good paying job, send their kids to a safe school, and have basic reliable services (police, fire, utilities, roads, parks). IL has the highest taxes in many categories but is on the worst lists in many categories! WHEN DOES IT END??? WHERE DOES IT STOP?

Stopping additional toll hikes sounds like a great place to start.

Thank you for reading my concerns & taking action because of it.

Sincerely,
Debbie

Question/Comment:

What purpose does a toll hike serve that:

1. Is going into the coffers of a system that by all appearances, already has all the money it needs for maintenance and upkeep on roads, bridges, and other infrastructure.

2. Has automatic increases built in that takes the cost of utilizing these transportation nodes through stratosphere by 2050.

These is no need for any of this. Shut it down, please.

Question/Comment:

I am writing to express my vehement opposition to the proposed Illinois Tollway fare hikes scheduled to take effect on January 1, 2027. This sudden 45-cent passenger hike, combined with a staggering 30% increase for commercial vehicles and permanent automatic hikes every two years, represents an egregious financial burden on Illinois drivers.

The execution of this proposal has completely lacked transparency. Speaker Welch himself admitted that these hikes were leverage to appease labor unions after nearly $1 billion was diverted from the state Road Fund to bail out mass transit. Using the Tollway as a political piggy bank through late-night, backroom legislative deals is a disservice to the public. The Tollway is already bringing in record net revenues, so the assertion that it "lacks the cash" to maintain infrastructure without a permanent tax on commuters is fundamentally dishonest.

Illinois families and businesses are already stretched thin by persistent inflation. This hike will not only damage the household budgets of daily commuters but will heavily impact our supply chains. Increased commercial tolls mean higher costs for shipping goods, a cost that will immediately be passed down to consumers at grocery stores and retail counters.

Our state economy cannot absorb a record-breaking toll increase. I demand that the Tollway Board reject these automatic hikes and hold the agency accountable to the transparency the taxpayers deserve.

Sincerely,

Gabriel Figliuzzi

Question/Comment:

I do not support the proposed rate hike in its present form.

If you want to be fair when asking tollway users to pay more money, then equalize the cost per mile we pay when we use the tollway system. With the iPass computer system, you know how many miles I drive each time I enter and exit the tollway system. Charge me a flat 11 cents a mile. Charge EVERYBODY a flat 11 cents a mile. Right now, I already pay wildly fluctuating rates per mile of usage depending on where I exit the tollway - from 18 cents a mile to 4 cents a mile - and this is all withing local driving between Elgin and Chicago.

In summary, use the computer system that you already have more intelligently in order to equalize rates per mile of tollway use FOR EVERYONE - including commercial vehicles and out-of-state drivers just passing through Illinois.

I will support paying more IF it is equalized across all tollway users.

Question/Comment:

Dear relevant parties, the increase and proposal to increase toll way taxes offers real issues for local small business and the success going forward. Clients can only absorb so much of an increase in operating expenses, at some point the cost of service becomes too high. A TAX INCREASE ON TOLLS IS NOT A SOLUTION! Better management of allocated funds and a more representative tax could be fair but this tax is a miss use of power. Please stop putting small business down at the expense of new projects, we will not survive as a city if we absorb all our businesses!

Question/Comment:

Dear Illinos toll board,

Rising tolls are not the real problem—wasteful state spending is. Instead of fixing bloated budgets, unnecessary projects, and poor financial oversight, the state keeps turning to drivers to cover the gap. That is not a solution, it is a failure of responsibility.

People are being forced to pay more while waste continues unchecked. Every dollar lost to inefficiency is another dollar taken from working residents through higher tolls. This pattern shows a lack of discipline and accountability.

Cut the waste, audit the spending, and stop using toll increases as a crutch. The public should not be paying for mismanagement.

Sincerely,
Kyle Hill

Question/Comment:

The Toll Authority claims that "the extra money (collected after the rate hike) is needed for major infrastructure upgrades." But the Authority does not detail what those "upgrades" are, and more importantly, why those upgrades are so critically essential that they plan to increase toll rates nearly 100% for many toll users (like me). The Authority say's the new rate per mile will be 11 cents. But I already pay up to 18 cents per mile when I go from Rt 31 to Barrington Rd to see my doctor. Who's fooling who? Not only is there no accountability here but there are falsehoods and smoke and screen promises that NEVER pan out. I've come to the conclusion that the Illinois Tollway Authority is a rogue out-of-control taxing body with absolutely no accountability to the citizens it is mandated to serve.

Question/Comment:

To Governor Pritzker and tollway board,

Illinois drivers already pay some of the highest taxes and fees in the country.
Our gas and property taxes among the highest in the nation. No wonder many Illinois residents moving out into states with less tax burden. Around 80K Illinoisans moved out of the state last year alone. Same road 294 when crossing into Wisconsin is free, and road quality is better than paid toll road 294 in Illinois. This is clearly points to a mismanagement of the process. Still, if you want to adjust tolls for inflation, it is OK. But sudden 50-100% increases per toll plaza are big burden to those who travel the most - commercial traffic. It will be more expensive, so, all goods and food will become more expensive as a result, making Illinois less attractive to young professionals, who already figured out the failed state of Illinois.
Sincerely,

From: Douglas Adams via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Dear Governor and Tollway Authorities,

I am writing to express my strong opposition to any proposed toll increases and additional property tax hikes in Illinois.

Illinois residents are already facing some of the highest tax burdens in the nation. Families are working hard to make ends meet while dealing with rising costs for housing, groceries, utilities, insurance, and other everyday expenses. Increasing tolls and property taxes would place yet another financial burden on hardworking citizens who are already stretched thin.

The people of Illinois should not be expected to continually pay more while struggling to keep up with the cost of living. Every additional increase takes more money away from families, retirees, and workers who have earned it through their hard work and dedication.

I urge you to oppose any efforts to raise tolls or property taxes and instead focus on finding ways to manage existing resources more efficiently. Illinois residents deserve relief from rising costs, not additional financial burdens.

Thank you for your time and consideration. I hope you will stand with the people of Illinois and oppose these increases.

To: Board of Directors; governor@state.il.us
Subject: Toll Hike

Name: Gale Barma
Email: Gbrb89@comcast.net
Zip Code: 60585

Question/Comment:

Do not vote in favor of a toll increase. We do not need to increase tolls to alleviate overspending in Illinois. Tolls were supposed to be eliminated when I was a teenager and before 355 was ever built. Now it is proposed to increase indefinitely?! NO NO NO. The tollway isn't a convenience during rush hour nor when an accident happens. A toll hike does not improve congestion whatsoever. The burning of gas sitting in traffic costs drivers more money so we are already paying at the pump. I oppose a toll hike. Vote NO for a toll hike.

To: Board of Directors; governor@state.il.us
Subject: mebasak@aol.com

Name: Margaret Basak
Email: mebasak@aol.com
Zip Code: 60448

Question/Comment:

We are very opposed to the toll increase. We travel I-355 a lot and it is already $1 per toll… more than other tollways. These additional taxes and toll increases eat into our financial resources & limits our mobility and ability to see family. Additionally, our daughter is trying to buy a house along 355 & homes prices are already high but increased tolls will make getting to work even more expensive as well as home prices. We encourage a REJECTION of toll increases.

From: Laura Larson via Illinois Policy <action@illinoispolicy.org>

Email: forevrtru@gmail.com
Zip Code: 60586

Question/Comment:

There are so many businesses that travel through Illinois that use the toll roads. With the increase many people will stop using the tolls and start using side roads. The upkeep of infrastructure affected by using other routes or completely going around Illinois and finding other ways of transportation will cost even more money to the state and citizens. Are the politicians actually even thinking of long-term effects from the shortsighted thoughts?

Question/Comment:

Hi.

I am writing to extend my support for the toll hike. I am an urban planner by trade and am familiar with how expensive our addiction to the automobile is and how much of my money goes to subsidizing the road network instead of something more efficient like public transit. That said, I 100% support the toll hike and hope you do more to make automobiles infrastructure self sufficient since the same argument is said for public transportation.

Thanks,
Kyle

Question/Comment:

I am very concerned about this proposed price increase. I understand that you want to update our highway system, but read the room: we are living at a time when most Americans are expected to continue living and pay for the same life they've been living at a much higher rate. Our governor has been very critical of this Presidential administration and its complete disregard for the everyday lives of the average American... and then THIS is proposed? Are you completely tone deaf? Hypocritical? Or just stupid? That is an honest and fair question.

Why in the world do you feel the need to take away even MORE money from us? For years, we as Americans have been asked to do more (or at least the same) with less and to somehow figure it out. Because we can't just demand more money from our employers. We can't just raise our rates at our own discretion. So now I say to you: figure it out.

You, as our leaders, should never ask anything of us that you aren't willing to do yourself. Lead by example. Find the money somewhere. Earn your paycheck, because asking for bailouts in the form of tax raises is embarrassing to you. I am completely against this. I'd suggest looking deeply into a lot of contracts within the state and seeing if maybe we can cut some of the corruption to find some money to actually benefit the citizens. That might be a god place to start.

Shame on you. Do better. Be better.

Zip Code: 60655

Question/Comment:

I am writing to formally express my strong opposition to the proposed toll rate increases and the implementation of automatic, inflation-linked toll adjustments.
At a time when Illinois residents are already managing high costs of living and economic uncertainty, this proposal places an unnecessary and significant financial burden on families and businesses. The Illinois Tollway recently reported record-high revenue, which suggests that existing funds should be more than sufficient to manage infrastructure maintenance and capital improvements without forcing further tax-like increases on the public.

From: CJ Johnson via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

IL must stop raising taxes as the solution to it's financial problems. Instead, work on process improvements to find efficiencies like businesses have to do. In addition, stop and find fraud, and stop increasing the handouts. We're such a high tax state already.

Zip Code: 60482

Question/Comment:

Please do NOT vote to increase the toll on the Illinois tollway system. There is no need, outside of political interest (read: votes), to increase the cost of doing business. If the unions want to keep working, start using the gas tax money as it was intended and repair the roads, bridges, and infrastructure around the state. The people of Illinois can't afford another hand in their pocket. The governor has already taken most of the cash that should be there to support our families.
Also, why is the authority starting yet ANOTHER tollway project when they haven't completed the two currently underway?
Tying the toll increases to inflation every other year is also the cowards way around justifying increases. It is a typical Pritzker move, matching his gas tax hikes. Then again, the tollway authority is nothing more than a group of yes men that do the governors bidding, while appearing to be independent. It fits in with Illinois being one of the most corrupt states in the USA.
So, start thinking about who you are hurting. The unions don't need more money, they have plenty of work. The state doesn't need more money, they would just waste it on more redundant programs. The legislature doesn't need more money, they are overpaid as it is for a part-time job. Keep the money in the resident's pockets. Vote NO on toll increases!

Question/Comment:

I am a 75 year old person who has worked since I was 14 and must continue to work due to the outrageous inflationary periods that have happened in the US. This last 10 years I have been working as a Licensed Clinical Professional Counselor. In order to continue to get clients I have four offices which I pay a fair amount to other people so they can also work (past their mid 60's) in an area where we know people use therapy. In order to get to one of the first three of my locations, I have to pay tolls on 294 or go to an odd traveling method which takes me twice as long. The same is true for at least three of my office mates. I understand that Tolls allow the highways to be kept up, but wouldn't we be better off having a few more trains (as in Europe) where some of us could do our paperwork for a similar amount of money. Please reconsider this outrageously high amount of Toll money. And, realize that there are places where people can work (who need to work) which need to be near a highway and they need to take the highway with its tolls since our train and bus system leaves a lot to be desired here in the US. We should be encouraging the possibility of better public transportation rather than more tolls and more car expenses.

Zip Code: 60714

Question/Comment:

I commute on the tollway daily from home to work and back. I pay roughly $1,000 per year in tolls. With inflation, the cost of gas, groceries etc this hike is yet another financial burden placed on the backs of Illinois residents. Please do not increase the price of tolls, or better yet figure out some sort of a tiered approach to ORT so us people in simple passenger cars who use the tollway daily commuting to work and back home aren't being gouged by yet another hike in a daily commodity.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll hike

Name: Ken Frost
Email: frosty-dude@att.net
Zip Code: 60137

Question/Comment:

The tollway authority has more than enough funds to maintain and improve existing roadways as well as expand the system! It is solely a way to bail out mass transit with another inept bureaucracy on top of it! That's bad enough, but they make increases automatic on top of it so like the gas tax they don't have to look bad voting for an increase again!! Like the highway fund, the tollway fund is a slush fund for Illinois politicians to cover more spending that has little or nothing to do with the fund's original intent!

Question/Comment:

Illinois is already paying higher taxes than other states. So many of my friends and family have left Illinois due to high taxes and have moved to Northwest Indiana. They are paying less in taxes, have better homes and schools, less crime and living a better quality of life because they have better leaders. The leadership in Chicago and Illinois has been horrible for the people who live there. I will fight all taxes that hurt Chicagoans. Who ever heard of a 57% increase!!! Or a tax to drive into and out of the city!!! This is ridiculous. Wake up Governor, you are not making the right decisions !!!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Jim Lyman
Email: Jimlyman@gmail.com
Zip Code: 60093

Question/Comment:

The tolls on the toll road was originally set to expire. This is just another tax on the citizens of the state of Illinois. The concept of automatic toll increases is crazy. It takes away any incentive to be more efficient. Look what happened with the extra dollars that were collected for the roads through the gas tax. It did not go for its intended use, it went to balance the budget with an additional $800M in taxes included.

We need to be smart and address the real issues of out of control spending.

Jim Lyman

Subject: Stop the Toll Hike

Name: Michael R denyko
Email: denyko60527@comcast.net
Zip Code: 60527

Question/Comment:

Illinois needs to become a state with a favorable working environment to attract companies who want to reside here. We have lost 27 large companies in the last 6 - 8 years. WHY? At the rate we are loosing corporations to other states, the only corporations left will be "Homeowners Corporation" (people living in Illinois) of Illinois. And that population is shrinking too. Sad leadership.

From: Larry Wolles Larry Wolles via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Jerry Cizek
Email: jcizek3rd@comcast.net
Zip Code: 60555

Question/Comment:

The proposed toll increases (automatically adjusted to inflation), is unwarranted and not driver friendly. It will also cause goods shipped on trucks using the tollway to be more expensive. Illinois residents will be hit twice in the wallet.

Say NO to this consumer unfriendly proposal.

From: Mike Loftus via Illinois Policy <action@illinoispolicy.org>
Sent: Monday, July 20, 2026 4:00 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Mike Loftus
Email: troftee@gmail.com
Zip Code: 60540

Question/Comment:

In a state where the Governor frequently speaks about the high cost of living, it is difficult to understand why toll increases are being proposed, especially when they place an even greater financial burden on Illinois residents. A 50% increase is significant, particularly for working families and those who rely on toll roads every day.

Rather than continuing to increase costs for taxpayers, the state should focus on reducing unnecessary spending and improving fiscal responsibility. Many Illinois residents are struggling with inflation and rising expenses, and they deserve policies that ease—not add to—their financial burden. State leaders should prioritize responsible budgeting before asking taxpayers to pay more.

Question/Comment:

To the Illinois Tollway Board of Directors and Governor Pritzker,

I respectfully urge you to reject the proposed toll increase.

I am not writing as a transportation expert, an elected official, a contractor, or a lobbyist. I am writing as one of the thousands of Illinois commuters who fund this system every single day.

For me, using the Tollway is not an occasional convenience—it is an unavoidable part of earning a living. I commute from Lansing to Schaumburg for work, paying six tolls every day at $0.75 each. With a typical work year of 48 weeks, I currently pay approximately $1,080 every year in tolls before considering fuel, insurance, maintenance, registration, or the many other costs associated with owning a vehicle.

The Illinois Tollway repeatedly describes itself as a “user-funded system.” I agree.

But a user-funded system creates obligations in both directions.

The user has an obligation to pay.

The Tollway has an obligation to demonstrate that those payments produce measurable improvements.

That is where this proposal falls short.

The Tollway’s public materials claim this increase will reduce congestion, lower fuel consumption, decrease vehicle wear and tear, improve road conditions, and allow people to spend less time on the road and more time with their families.

As someone who drives these roads nearly every day, that has not been my experience.

For years, commuters have navigated construction zones spread across multiple corridors simultaneously. Rather than reducing congestion in the near term, these projects have often created it. Stop-and-go traffic has become routine. Commutes have become longer. More idling and more braking inevitably mean greater fuel consumption and additional wear on brakes, tires, and suspension components. Every extra minute spent sitting in traffic is another minute taken away from my family.

The Tollway tells commuters these projects are intended to eliminate those burdens. Yet many of us have spent years experiencing those burdens become worse, not better.

Likewise, the claim that improved road conditions save drivers money does not reflect what I continue to encounter. Uneven pavement, potholes, rough transitions, and deteriorating surfaces remain common throughout portions of the system. I pay over a thousand dollars each year just to access these roads and still pay out of pocket for repairs caused by the roads themselves.

The Board also continues to frame the Tollway as though it is simply one transportation option among many.

For countless commuters in northeastern Illinois, that is not reality.

Across much of the Chicagoland region, virtually every major north-south and east-west highway requires tolls. While toll-free routes technically exist, they often require substantially longer travel times. Based on my own commute, avoiding the Tollway can add hundreds of hours of driving over the course of a working year. That is not a practical choice for most working families. When the only realistic way to get to work requires paying tolls, those tolls cease to function like an optional user fee and instead become an unavoidable cost of earning a living.

If Illinois believes those costs must continue to increase, then Illinois should also acknowledge the financial burden it places on commuters. There is no Illinois income tax deduction, no commuter tax credit, and no meaningful financial relief for the thousands of workers who have little practical choice but to pay these tolls every day.

I am also concerned about the public comment process surrounding this proposal.

Organizations that stand to benefit financially from a $26.5 billion capital program are actively encouraging their members to submit comments supporting the proposal. They have every right to advocate for their interests.

However, the Board should not confuse support from those who will directly benefit from this spending with support from the commuters who will ultimately finance it. Contractors, consultants, suppliers, and labor organizations understandably view this proposal as an investment in future work. Daily commuters experience it as another mandatory expense added to an already rising cost of living. Those are different perspectives, and both deserve to be weighed accordingly.

This proposal is not fundamentally about forty-five cents.

It is about trust.

Illinois commuters have upheld their end of the bargain for years. We have continued paying tolls. We have accepted years of construction. We have accepted the inconvenience with the understanding that today’s disruption would become tomorrow’s improvement.

Now the Tollway is asking us to pay even more.

Before asking Illinois families for another dollar, the burden of proof belongs to the Tollway—not the commuter.

Demonstrate, with measurable evidence, how previous toll increases have improved travel times.

Demonstrate where congestion has been meaningfully reduced.

Demonstrate how roadway conditions have improved.

Demonstrate that the billions of dollars already collected have produced the benefits commuters were promised.

Do not ask the public to finance another generation of promises before fully demonstrating the value of the last one.

Respect is earned through accountability.

Trust is earned through results.

Until those results have been clearly demonstrated, I respectfully urge the Illinois Tollway Board and Governor Pritzker to reject this proposed toll increase.

Respectfully,

Isabella Biagiotti
Lansing, Illinois

As a life long ILL resident I strongly oppose the proposed toll hike.

From: Deep Modi <deepmodi303@gmail.com>
Sent: Tuesday, July 21, 2026 2:02 PM
To: Board of Directors; Regnery, Christi
Subject: Please Reconsider Invoice Fees

Hi,

I am an Ohio resident and recently drove to Chicago to pick up my family from the ORD airport. I was completely unaware that I needed to pay the tolls within a specific timeframe to avoid additional invoice fees.

My actual tolls totaled **$8**, yet I received an invoice for **$36,** due to invoice fees. I have already paid the full amount, and I am not writing to request a refund.

What should have been a happy trip to welcome my family turned into a frustrating and disappointing experience over a relatively small toll. While $24 may not be a significant amount on its own, the experience it created was far more impactful. It left me feeling that the system is designed in a way that catches occasional and out-of-state drivers by surprise rather than helping them comply.

I respectfully ask that the Illinois Tollway review this policy. At a minimum, please consider making the payment requirements much more transparent for visitors and occasional drivers or providing a grace period for first-time invoices. I believe many Americans, especially those traveling from other states, have experienced the same frustration.

Illinois is a destination that welcomes millions of visitors every year. The toll system should leave travelers with a positive impression, not one of confusion and unexpected fees.

Thank you for taking the time to consider my request. I sincerely hope the Board will review this policy and make changes that create a fairer and more transparent experience for everyone.

Question/Comment:

I am against the proposed toll price hikes.
Research done by the Illinois Policy Institute shows the system is taking in more toll revenue each year since 1973 than it needed to operate and maintain the system.
The proposed fee hikes would continue long past the Driving Connections capital plan.
I also am against the automatic toll fee increase tied to inflation. This just gives the board an easy out, avoiding explanations to the public as to why an increase is necessary.
I urge the board to reconsider this excessive increase in vehicle tolls.

Question/Comment:

Dear Toll Authority and Illinois Legislators:
We taxpaying residents of Illinois are tired. Instead of making common sense reductions in the State and municipal budgets, you've treated it as an open check book. Our schools are failing our young people, elderly folks are being priced out of their homes because they cannot afford the continued rise in property taxes, and, despite tolls on the roads for several decades, many of our state highways are in terrible shape. My family intends to move to a resident and business-friendly state at some point because of this nonsense. If you are having that much difficulty with budgeting, feel free to reach out. I'd be happy to eliminate the waste. PS Toll revenue should ONLY go towards expenses related to road improvement, not to cater to the demands of a union and/or municipality that cannot control its spending.

Question/Comment:

Hello,
I am writing to urge the Illinois Tollway to not allow toll hikes at this time. Americans are having difficult times paying basic bills with low wages and high cost of living. Increasing tolls will increase the cost of travel even to work making it less manageable for the common American. Please consider not allowing this increase.
Kindly,
Elodie

Subject: chris.m.reyes@live.com

Name: Christian Reyes
Email: chris.m.reyes@live.com
Zip Code: 60542

Question/Comment:

I am writing to oppose the proposed toll increases under the Driving Connections capital plan.
The Tollway has collected far more in tolls than needed for maintenance and operations for decades, and Road Fund revenues have already been outpacing road spending. Before asking drivers to pay more, including automatic inflation increases every two years starting in 2029, the board should explain where existing surplus revenue has gone and why current funds aren't sufficient for these projects.
I ask the board to reject this toll hike and provide a clear public accounting of Tollway finances before any future proposal.
Thank you for considering my comment.

To: Board of Directors; governor@state.il.us
Subject: Tollway

Name: Linda Pretet
Email: Klpretet@sbcglobal.net
Zip Code: 60175

Question/Comment:

Illinois taxes residents too much and a toll increase is one more way to take money for wasteful spending and lining pockets of the few people connected to Pritzker for favors and pay outs. Do not raise the tolls which impact the working people the hardest. It will be one more reason for people to move out of Illinois. Oppose the toll hike. Out taxes were already raised a few weekends ago.

From: John Newman via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Give Illinois residents a break and do not pass this toll hike. I understand these projects are important but between the sales tax hikes and other taxes that get added to various items such as liquor tax or smoking tax we pay the highest taxes in the country when it comes to those areas. People are moving out of Illinois and why…because of this kind of stuff. Start helping Illinois residents instead of hurting them. Issue bonds or cut some higher paid salaries in government. Find other ways to fund these projects. We already pay high tolls. Where is that money going? Toll booths were supposed to be terminated years ago after certain projects were completed and we are still paying them. There should be plenty of money from the current tolls that are in place. That money should have been invested and could easily have helped pay for some of this. If you have to raise toll how about 10-12 cents instead of 45 cents. Maybe raise the toll charge similar to how it was done with stamps. A penny or two each year. Instead of working on all of these highway projects at once how about trying to complete one project as soon as possible. This would alleviate congestion everywhere.

Question/Comment:

This toll hike shouldn't become the burdon of Illinois constituents paying the the price for IL lawmakers pandering for labor union support. During last year's mass tranist bail out, IL lawmakers redirected ~ $1 billion a year from the Road Fund toward "Chicago-area" public transportation, a move opposed by construction unions objecting to losing that road money. Once again, Illinois Democratic corruption at it's finest. Pritzker has zero business accumen, coudn't even figure out to keep the Bears in Illinois.

Zip Code: 60544

Question/Comment:

Hello,

I'm generally supportive of the state's agenda, but I have to say I do not support toll hikes linked to inflation, especially when the tollway authority takes in more revenue than it spends. Wasn't the tollway supposed to be free after 1973 when it was paid off? Do some better fiscal management to fund things in our state instead of fleecing people with higher tolls - which will hurt low income people more than everyone else.

Thanks.

Chris

Question/Comment:

I am strongly against this huge toll hike. This will be a huge cost to businesses and people who live in this state. It appears that the state of Illinois is terrible at reducing the tax burden for it's citizens and continues to find ways to keep costs going up. How about we look for ways to reduce costs for the people who live and do business here? Apparantly that is not in the governor's vocabulary. This is ridiculous and another reason why many people continue to leave this state. Also another reason why the governor will not have my vote to reelect him for Illlinois governor.

Question/Comment:

The rich has left, the middle class is leaving all because of taxes. The taxes that is being raised is on our lively hood. Now you want to tax people going and coming from work. Insane! The 294 tolls supposed to been removed in the 90's and yet they are still here. WE CAN NOT AFFORD MORE TAXES.

Question/Comment:

Enough with raising taxes and fees. Find solutions to curb spending. The tollways are not piggy banks. They more than pay for themselves with the fees that you already collect. You're just using this money to fill gaps elsewhere and that's not fair to the motorists who use these expressways.

Name: Shirley Tracey
Email: traceyshirley28@gmail.com
Zip Code: 60089

Question/Comment:

The tolls were supposed to end decades ago, yet they keep getting higher. Illinois already has a huge tax bill due to the irresponsibility of its politicians. There is no transparency in how much is being paid as there are no signs letting drivers know how much they are paying. Illinois has the lottery and gambling establishments all over the place, in fact, it is getting difficult to go anywhere without gaming inside. Illinois also has a high tax on marijuana. I'm not sure why we can’t pay our bills, other than our leaders giving themselves raises like they have no bills. Our governor, who wants to run for president, is not much better than our current president in terms of responsibility. He wouldn’t even let another democrat run this term! He will not get my vote for all the above reasons and more. STOP THE TAXES! Spend within the budget!

Subject: Stop the Toll Hike

Name: Colin York
Email: colinjyork@gmail.com
Zip Code: 60511

Question/Comment:

I currently use the tollway everyday to get to and from work. The tools that I am already paying are a financial hardship, and any future toll increases would lead me, and I assume many others, to leave earlier and find alternative that do not involve prohibitively expensive tollways. If you make them too expensive, people will stop using them. This will hurt the people at the bottom the most, while the rich will still be able to pay, and it pushes the tollway towards a class segregated transportation system. Wages do not keep up with inflation, and there is absolutely no reason to prioritize making sure that tolls do. Stop hurting the working class.

Question/Comment:

To whomever it may concern:

Stop it. Just stop it.

I understand that you are using every rationalization you can to justify increasing the financial burden carried by the shrinking middle class. I fully understand that this is part of a deliberate nationwide plan to destroy the security and livelihoods of millions of Americans in order to permanently alter our political system.

Illinoisans are quite literally being forced out in order to attempt to spread leftoid fruitbat ideology to other States, because we know that people often tend to vote the same way they always did..

It's hardly just about tolls either. My property taxes, with no warning or rationale, rocketed skyward by twelve thousand dollars last year. You are willfully, and with malice aforethought, turning this once wonderful State into an economic Hellscape. I'm not a true believer by any means, but if there is such a place, I hope that's where you find yourselves.

I will be retiring soon, and this benighted State is simply no longer an option

Have a NICE day,

Lord Jim

Question/Comment:

Illinois Tollway Authority, I am personally asking you to reconsider the proposed tollway use revenue hike schedule to take place soon. As a Tollway user I rely on the tollway to get to and from work assignments and other obligations. As a senior, I've seen monetary increases in many areas of my life making it difficult to balance life priorities and obligations. The proposed tollway usage fees will force me to stop using the tollway system because I will not have the ability to pay increased use fees. This action will force me to use surface streets and roadways thereby increasing my travel times to circumvent utilizing the tollway. I ask you to please consider the many seniors who utilize the tollway system and the perhaps consider a reduced "senior" fare as an alternative. Thank you for allowing me express my concerns.

Question/Comment:

When I first started driving, about 40 years ago, I remember being told that tolls were temporary - just a way to pay for the construction of the roads.

Now that we have open road tolling, drivers can 'pay' without even thinking about it. It seems like lawmakers are thinking, 'wow, our hands are already in their wallets and they don't mind, maybe we can dig in a bit deeper?'

Stop it! Illinois will be empty sooner than you think.

Question/Comment:

The idea that you can just continuously and constantly raise toll rates on Illinois drivers is ridiculous. The thought of being able to just do this without giving any thought to the needs of the people the situations that they are living in on a daily basis the outrageous expenses we already paid just to be a part of this state is absurd. Please reconsider this plan. Please reconsider this on the efforts to appeal to the Illinois people and to show them that you understand that their needs go beyond just roads. That their needs are far more significant than just paying for upkeep of roads that frankly could be maintained better and cheaper than we allow them to. Do the right thing for the financial stability of the people of this state.

Question/Comment:

Dear Governor Pritzker and Members of the Board, I am writing to express my strong opposition to the proposed toll hikes being considered by the Illinois Tollway Authority. As a resident and daily commuter, I am deeply concerned about the financial burden this will place on working families and small businesses across the region. Asking drivers to pay up to an additional ~$329 per year—with passenger tolls jumping by about 45 cents per toll and commercial rates by 30%—is unacceptable. Illinoisans already face a high cost of living and some of the highest combined taxes in the country. It is incredibly frustrating to see funds diverted from state roadways for mass transit bailouts, only to have the Tollway Authority attempt to recoup that money directly from drivers' pockets. Instead of balancing the budget on the backs of commuters, I urge you to look for internal cost efficiencies and protect drivers from shouldering the weight of these financial shortfalls. I strongly urge you to reject the proposed toll increases. Thank you for your time and for considering my position on this critical issue.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Agata Milon
Email: agatamilon@hotmail.com
Zip Code: 60457

Question/Comment:

I am writing to strongly oppose the proposed Illinois Tollway toll increase.
Illinois residents are already burdened by rising taxes, fuel prices, insurance premiums, vehicle expenses, and the increasing cost of everyday necessities. Raising tolls would place yet another financial burden on working families, commuters, and businesses.
Many residents rely on the Illinois Tollway every day to get to work, school, medical appointments, and other essential destinations. For many people, there is no practical alternative. Increasing tolls would effectively create another financial burden on Illinois residents who are already paying more for everything.
Before asking drivers to pay even more, the Illinois Tollway should ensure that existing funds are being managed responsibly and that every possible alternative to a toll increase has been fully explored.
I respectfully urge Governor Pritzker and the Illinois Tollway Board to reject the proposed toll hike and consider the real financial impact this increase will have on Illinois residents, families, commuters, and businesses.
Please listen to the people who rely on these roads every day and stop the Illinois Tollway toll increase.

Subject: Stop the Toll Hike

Name: Roksolana Zhovtyak
Email: roxy.realtor.komar@gmail.com
Zip Code: 60656

Question/Comment:

I respectfully urge you to reject the proposed 57% toll increase for Illinois drivers.

Illinois residents already face some of the highest taxes, fees, and living expenses in the country. A significant toll increase would place an even greater financial burden on working families, commuters, seniors, and small businesses that rely on our roadways every day.

Before asking residents to pay more, I encourage the Tollway Authority to prioritize efficiency, transparency, and responsible management of existing funds. Any future toll adjustments should be supported by clear public justification, meaningful public input, and a demonstrated need.

Please protect Illinois drivers by rejecting this proposed toll increase and seeking solutions that do not further increase the cost of living for the people of our state.

Thank you for your time and consideration.

Zip Code: 60554

Question/Comment:

Increasing the tolls to subsidize other projects in the state is not good fiscal policy. Higher tolls/taxes are not the issue in the state of Illinois, increase spending is. It's about time that Illinois realize that you cannot tax and spend its' way out of deficits! Run this tollway like a competitive business that needs to manage responsibly and to serve its' customer with a good product. Just as a business wouldn't raise its' prices to get out of a financial mess, a governmental entitiy should not raise tolls to support other spending programs in the state!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: LARRY PETERS
Email: peters.larry@ymail.com
Zip Code: 60047

Question/Comment:

For those of us who live on a fixed income this increase is one more item that is going to drive us out of the state. We cannot afford all of the increases in the various taxes and tolls that Illinois is passing on to the consumers. We need to find a way to cut costs instead of raising fees for everything.

From: Timothy Goll via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 9:44 AM
To: Board of Directors; governor@state.il.us
Subject: Illinois resident cannot afford another tax increase

Name: Timothy Goll
Email: flackbocus@yahoo.com
Zip Code: 60712

Question/Comment:

I strongly oppose the proposed toll increase. Illinois residents are already facing higher costs for housing, utilities, insurance, groceries, taxes, and nearly every other household expense. Asking drivers to absorb yet another increase is simply too much.

The Tollway and the State should prioritize existing revenues, reduce unnecessary spending, and identify other funding sources before placing another burden on Illinois residents. We cannot continue to be the default source of additional revenue every time costs increase.

Please reject the toll increase and find a solution within existing state resources.

Zip Code: 60137

Question/Comment:

I don't understand why a large toll increase is being considered when the Illinois Tollway has a surplus fund of $4.7 billion and had an operating surplus of almost $500 million in collected a record revenue in 2024. Our government officials should be using our tax dollars as efficiently as possible and to consider a toll increase when the Illinois Tollway already has a significant surplus fund and an annual operating surplus doesn't seem like good use of tax dollars.

Question/Comment:

Illinois is one of the most taxed states in the country. Property tax, sales tax, and now increased tolls. People are fleeing the state left and right, when is enough going to be enough? Manage your budget, quit giving all the money to the teachers union or those that hold office. Quit giving illegal immigrants money for college when you're losing in-state students to out of state schools and not granting those students scholarships. I have lived here all my life and I can't wait to leave. I own my home, yet have to pay a ridiculous amount in property taxes, with those dollars going to school districts and roads that are not taken care of. Quit gouging the people of this state!!!!!!

Enough already! Use what you're getting at today's rates and start being fiscally responsible. Do your job!!!

From: Brad Sholes via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 9:55 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Brad Sholes
Email: bmsholes@gmail.com
Zip Code: 61011

Question/Comment:

The toll hike is too large of an increase and on top of the large increase, future increases include having an automatic increase that provide option for public input and no accountability to future spending decisions and tax increases. Case in point, this toll increase is caused not by a need of money to fund road improvements, but because the money allocated for road improvements was redirected for public transportation. Those same funds were generated by the gas tax that automatically increases.

From: Susan Alford via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 9:55 AM
To: Board of Directors; governor@state.il.us
Subject: Don\'t increase tolls

Name: Susan Alford
Email: susanalfordz3@gmail.com
Zip Code: 61704

Question/Comment:

Tolls were supposed to go away once the roads were built. Now they are justified for ongoing repairs. Repairs constantly make driving impossible. More money is raised than spent/needed. Stop the madness.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Mario Ferro
Email: mariojferro@gmail.com
Zip Code: 60305

Question/Comment:

I am writing to formally oppose the proposed toll rate increases under the Driving Connections program, and I urge the Board to reject the proposal as currently structured.

A $0.45 increase per passenger toll and a 30% increase for commercial vehicles is a significant burden on daily commuters and will raise the cost of goods for every household in the region. But my strongest objection is to the automatic inflation-based increases beginning in 2029. Locking in indefinite, biennial rate hikes with a single board vote eliminates future public accountability. Each increase should require its own vote and its own public hearing process, which is the minimum standard of oversight for a public authority.

I ask the Board to vote no on this proposal and return with a plan that is right-sized, transparent, and preserves the public's voice on every future rate change.

Name: Mike Tripicchio
Email: dpfd140@aol.com
Zip Code: 60120

Question/Comment:

I travel the roads every day for work I pay the highest gas tax already. The state & city of Chicago run a failing mass transit system and ask the rest of the state to bail them out. The roads are always under construction and just a few short years after completion they need repairs due to failing concrete. That is not the case in Wisconsin & Indiana which have no tolls and better roads. This will only cause higher prices across the board due to increased shipping costs. Stop using this money to pay off the unions and bail out the state.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Jim Cunningham
Email: jimc@cunninghamcpa.com
Zip Code: 60134

Question/Comment:

The proposed increase is ridiculous. I am against ANY increases. NOW is NOT the time to INCREASE tolls. Inflationary pressures, annual gas tax increases, and other costs of living in Illinois are rising much faster than IL citizens' income. In addition, by increasing tolls, you are increasing the cost of doing business in Illinois. This results in giving businesses more reasons to relocate to other states and/or not start a business at all in Illinois. Increasing tolls is simply digging the economic hole deeper, making it harder on many Illinoisians to afford basic transportation and other necessities.

Question/Comment:

This tax madness needs to stop now. Illinois is no longer affordable. No to this tax or any other proposed tax. We pay too much now and get nothing in return.

From: Jose Cruz via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 10:17 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Jose Cruz
Email: jose.g.cruz@sbcglobal.net
Zip Code: 60445

Question/Comment:

This will increase my current monthly toll bill of $72, by approximately $44 extra per month (61% increase) to a total of about $116/monthly for a 50-mile round trip ride (25 miles each way).
My toll cost per year will increase an extra $528, from $864 to $1,392.
Considering how high gasoline taxes, property taxes, sales taxes and other IL taxes are already making IL one of the highest taxed states in the nation, I consider this to be overly excessive and ridiculous.
Governor Pritzker claims he's saving Illinoisians billions of dollars while adding more and more taxes and increasing costs all around. He's a billionaire so none of these increases affect him or his family.
As a hard-working and tax paying IL resident, I ask that this toll increase be rejected.

From: Edward Coleman via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 10:19 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Edward Coleman
Email: edcoleman07@gmail.com
Zip Code: 60625

Question/Comment:

Dear Governor Pritzker and Members of the Illinois Tollway Board of Directors,

I am writing to strongly oppose the proposed 57% toll increase on Illinois drivers.

Illinois residents already shoulder some of the highest combined state and local tax and fee burdens in the country. A toll hike of this magnitude, layered on top of existing gas taxes, vehicle registration fees, and property taxes, places an unreasonable additional burden on working families and commuters who have no practical alternative to driving.

I urge the Board to reject this proposal and instead pursue greater transparency and accountability in how existing toll revenue is spent before asking drivers to pay more. Illinois families deserve fiscal discipline from their government, not repeated demands for more of their income.

I ask that this opposition be formally noted in the public record.

Zip Code: 60091

Question/Comment:

Illinois need to get its costs in line with other states. Our highway construction cost per lane mile is significantly higher than other states. We have an expense problem not a revenue problem! People are leaving the state because you keep raising taxes. This is unsustainable. Do your jobs and cut expenses to fund what is needed. No one lives without a budget based on what they can afford. You budget by planning what you want then raising taxes. Stop and think about reductions in other area to pay for what is needed.

Nancie Poulos

Question/Comment:

Illinois has collected hundreds of millions of dollars from the tolls. Very little, if any of this money has been spent wisely. I DO NOT CONSENT TO THE STATE TAKING EVEN MORE OF MY MONEY VIA THE TOLLS.

From: Bruce Gagala via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 10:30 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Bruce Gagala
Email: BMG999@aol.com
Zip Code: 60516

Question/Comment:

The toll hike is an unreasonable burden on the public. The proposed increase is another step in making Illinois unaffordable. The commercial increases are also inflationary as the transportation cost increases are inevitably passed on to all consumers.
It is a misappropriation of funding to allocate previously earned tolls to public transportation and then turn to toll increases to fund roadwork thatwould have already been paid for.
Further automatic increases by pass the legislative process and are not based on proven need.
Consumers should not be forced to grant the tollway system an annuity, and they must be safeguarded from seeing excess funding reallocated elsewhere.

Zip Code: 61107

Question/Comment:

It goes without saying that living in Illinois is becoming less & less manageable with the ongoing taxes, various rates, and toll hikes. It currently being listed in the top 3 most taxed, most expensive, etc. states to live in. So please, have some heart and stop the hike.

To note, it has been shown/proven the money being taken in for tolls is partly being used to prop up other programs in the state. So, if the money isn't being used properly nor even fully from some reports (padded coffers), it further questions why yet another raise? Not to mention a lion's share of the money remains in Chicago and/or surrounding areas.

There is much more to the state of Illinois than Chicago. Raising tolls only proves further where the care and allegiance lies for the rest of the state. I can say without question, if the toll hike is enacted, it will be the last straw and we will be leaving the state.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Cyndi Dunmire
Email: Cyndi.home@gmail.com
Zip Code: 61725

Question/Comment:

I do not think toll increases should be automatic and tied to inflation. Most people do not get automatic raises connected to inflation why should a tollway system. When more money is needed, they should be able to present their facts and figures to explain why a hike is necessary.

From: John Looby via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 10:34 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: John Looby
Email: jlooby3@hotmail.com
Zip Code: 60045

Question/Comment:

Raising the tools will cause more drivers to take alternate roads to lessen the cost resulting in actually more congestiopn on the roads around Lake and Cook Counties. There ios not reason to raise with the amount of tolls now being collected and will also result inflation for goods transported by any type of vehicle. The governor is wrong that it will only be for out of state cars and trucks on the roads. Raising tolls to buy union votes is working against the citizens of Illinois and will lose the support of voters in the future to suport projects that are really needed. Vote no on Toll increases.

Name: Mario Tinsley
Email: mariotinsley@gmail.com
Zip Code: 60504

Question/Comment:

I do not agree with this toll hike. I do think it is insane to increase by this much or increase at all. If anything, we should be getting a rebate back because of the lack of progress that we have seen and all the congestion that we've been dealing with, though we have been led to believe that many of these projects would have been done already. We have only gotten an inconvenience from this, and due to us dealing with the inconvenience for many years, you're now telling us that we also have to pay even more and deal with more inconvenience. That doesn't really seem fair or seem to be what's in the public's best interest.

Email: lpecharich@comcast.net
Zip Code: 60187

Question/Comment:

In case you didn't know, tolls were created to pay for the piece of highway that was being built at the time. Once the highway was paid for, the toll was supposed to go away. But of course, that is not how things work in Illinois. Let's just keep taxing the people of Illinois because we can. STOP TAXING US! DO NOT RAISE THE TOLL!

I received the email from the toll authority telling me about the public meetings and the proposed toll increase. Someone in the marketing department thought that telling us how increasing the toll would allow us more time with our families would make me think this is a good idea. Allowing Illinois residents to keep more of their money will allow them to TAKE CARE OF their families.

Stop the toll hike. Stop taxing us. Reject the toll hike on Illinois drivers.

Subject: Please Oppose Any Additional Illinois Toll Increases

Name: christopher byrdak
Email: birdie23cb@yahoo.com
Zip Code: 60464

Question/Comment:

Dear Illinois Tollway Board Members and Governor,
I am writing as a lifelong Illinois resident and daily commuter who relies on the Illinois Tollway system to get to work. I currently drive approximately 40 miles each way on toll roads, five days a week. While a 45-cent toll increase may seem modest when viewed in isolation, for working families like mine it is yet another added expense at a time when the cost of living continues to rise across nearly every aspect of our lives.
Over the past several years, Illinois families have faced higher costs for necessities including:

Groceries and household goods
Gasoline and vehicle maintenance
Property taxes
Utilities
Homeowners and auto insurance
Health care costs
Childcare and education expenses

For many commuters, tolls are not a discretionary expense. We cannot simply choose an alternate route without significantly increasing our travel times. Toll roads are often the only practical option for getting to work, supporting our families, and contributing to Illinois' economy.
A 45-cent increase may not sound significant to policymakers, but when applied across multiple toll plazas, multiple commutes per week, and an entire year, the costs add up quickly. For workers already managing inflation-driven increases in every area of their household budget, another transportation cost increase feels like one more financial burden placed on middle-class families.
Many Illinois residents have not seen wage growth keep pace with the cumulative impact of inflation. Every additional recurring cost—whether it is a utility bill, insurance premium, grocery expense, or toll increase—reduces disposable income and makes it harder to save, invest, or prepare for emergencies.
I respectfully ask the Tollway Board and Governor's Office to consider the real-world impact this increase would have on working Illinoisans. Before approving any toll increase, I encourage you to explore alternatives such as operational efficiencies, prioritization of capital spending, and identifying other funding sources that do not place additional strain on daily commuters.
Illinois workers are already doing their best to absorb rising costs. Please do not make the daily commute another source of financial hardship.
Thank you for your consideration and for your service to the residents of Illinois.

Respectfully,
Christopher Byrdak

Zip Code: 60463

Question/Comment:

Continual repair and maintenance of the roadways are expected w/ continuous population/traffic/cost/salary increases, but the previous cost budgets obviously have not address the above issues correctly. Like other businesses, cost increases need to be evaluated with 'cost controls in place and not union controlled. I know it is difficult to project/estimate into the future, but it appears previous budgets need to be reduced in order to control costs passed on to the public. Possibly extend yearly budgets increases wider apart or less number each year.

Question/Comment:

Stop the madness. The proposed $26.5 billion capital program and 57% toll hike are a prime example of inefficient and wasteful government spending. Before this plan is approved, every major expansion project should be subject to an independent cost-benefit analysis to determine whether it delivers value proportional to its cost. Based on those findings, the program should be scaled back or revised as needed to ensure Illinois maintains safe, reliable roads without imposing what could become some of the highest tolls in the nation on drivers.

Zip Code: 60646

Question/Comment:

As a senior citizen living on a fixed income, who remembers the promises by Illinois elected officials, Illinois being of course the most corrupted of the corrupt state governments in power, that the tolls would disappear when paid off, its unfathomable that the Tollway Board would consider the mountain of price increases the Governor is pressuring you to rubber stamp. Please stand up to oppose such lunacy. JB can afford the price hikes, but what about everyone else?
John Wilson

Zip Code: 60805

Question/Comment:

My office is in Evergreen Park, Illinois, and I now reside in Indiana. I still commute regularly between the two and often have to go downtown from Indiana. The tolls are currently outrageous and another raise would be the straw that breaks this camel's back. The state of Illinois is discouraging both business and tourism, especially with collar states that can easily access Illinois, but don't want to pay excessive tolls to do so. Please reconsider as I think it's detrimental impact will outweigh this "easy" source of revenue.

Suellen Kelley-Bergerson

Name: James Hezinger
Email: jhezinger@mcartage.com
Zip Code: 60191

Question/Comment:

We are a small transportation company that is averaging $4,000.00 per month in tolls on our credit card. Because of bad transponders, this year we have received invoices from the Illinois Tollway for an additional $20,729.80. Considering we are buying Diesel and paying the road use tax, we are already paying more that our fair share. Knowing that the state of Illinois already has a surplus in collected road use tax, there is no reason for such a large increase. It is not reasonable for any business to go to their customers and ask for a 47% increase. That amount shows that the organization is not well managed. I suggest you look inward before signing off on such an amount. Sincerely, JH

Zip Code: 60521

Question/Comment:

In 1953, the Illinois General Assembly created the Illinois State Toll Highway Commission specifically to borrow money and build the original 187-mile system. The plan was funded by $415 million in revenue bonds issued in 1955. The deal, sold to the public by Gov. Bill Stratton: tolls would pay off those construction bonds, then the roads would become free, maintained by the gas tax like everything else. The original construction bonds were supposed to be paid off by 1973.

Now we have endless tolls, increases AND RECORD REVENUE for the Illinois Tollway Authority.

FIGURE IT OUT.
STOP RAISING THE COST OF LIVING FOR EVERYDAY PEOPLE.
THIS STATE IS A JOKE. ENOUGH OF GOUGING THE TAXPAYER, CUT YOUR COSTS.

From: Maryellen Uhl via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Kathy Zander
Email: kathy.allen8@icloud.com
Zip Code: 60188

Question/Comment:

I strongly oppose the proposed toll increase. Illinois families are already facing high costs for housing, groceries, utilities, insurance, and taxes. Raising tolls places yet another financial burden on working people who rely on these roads to get to work and support their families.

Many of us feel like we're being treated as an endless source of revenue. We are not ATMs. Every new fee or tax increase makes it more difficult to afford living in Illinois, and for some families, it is becoming a reason to consider leaving the state altogether.

Before asking residents to pay more, I urge you to focus on responsible spending, transparency, and ensuring existing toll revenues are being used efficiently. Please reject this toll hike and prioritize policies that make Illinois more affordable for the people who live and work here.

Thank you for considering my comments.

Question/Comment:

The last toll hike was intended for capital project which are near completion. One would think that the additional tolls (then) could now be used for capital prjects going forward.

The % increase is unconscionable and unnecessary!

Setting tolls to increase based on inflation abdicates your responsibility to the taxpayers. Unfortuneate that we cannot vote directly for tollway board members to demonstrate our support or lack thereof.

We are very disheartened, disappointed, and discouraged with our tollway representatives.

We categorically request that this increase in tolls be set aside until further analysis and alternatives are are brought to the publics attention.

Question/Comment:

Does the continuing exodus of Illinoisans to other states mean NOTHING to you? How many more increases in taxes, tolls, and other fees that you invent, do you think we can handle? Those of us who choose to remain in Illinois (so far!) do it because this is OUR home. Please consider the current financial plight of the average Illinois citizen before you so carelessly and so typically slap us with yet another increase on a service so many of us depend on. You currently collect almost 2 billion dollars a year in tolls. Where does that go? Please, give us a long needed break. Start managing the money we're already giving you - responsibly. Sooner or later the citizens are going to run out of money...and continue to run in greater numbers to other states where the cost of living is reasonable.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Eric Podewell
Email: epodewell@gmail.com
Zip Code: 60540

Question/Comment:

Tolls are already high especially the one on 355 down towards Southwest Highway. Tolls were supposed to be a temporary thing when originally proposed in the 70s. So raising tolls again and making it more unaffordable to drive our tollways will just continue driving people, including me, out of this state! Stop with the highest taxes and tolls in the country!

From: John Tenuto via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 1:12 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Question/Comment:

Please vote no to the proposed toll hike—it is simply not needed.

From: Edmund Hoyt via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 1:12 PM
To: Board of Directors; governor@state.il.us
Subject: Vote NO on the Toll Hike

Name: Edmund Hoyt
Email: ed5175@aol.com
Zip Code: 60462

Question/Comment:

The proposed toll hikes are excessive and unfairly burden those who can least afford them. This is especially concerning given the original premise of the toll road was that the tolls would have a finite life.

Further, it is unreasonable to “build in” automatic fair hikes that no longer require a board vote and justification. This is exactly how government becomes overly bureaucratic and uncontrolled taxes/tolls become the norm. Vote NO.

From: Bharat Bhargava via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Cherie Finlayson
Email: caf0423@gmail.com
Zip Code: 60020

Question/Comment:

As a life long Illinois tax paying citizen, enough is enough. Reject imposing more taxes on us and reject the insanity of automatic increases on taxes. Illinois needs to fix its spending problem before asking for any additional taxes. This Governor has increased an already bloated budget by 48% over his tenure and this is one more example that it will never be enough for him or those that dominate in Springfield.

From: John Mazeika via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 1:25 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: John Mazeika
Email: jonas9333@gmail.com
Zip Code: 60561

Question/Comment:

I urge you to reject the proposed onerous tollway hikes. Illinois taxpayers are already burdened by fuel taxes that are among the highest in our nation, as well as high property taxes and assorted fees. Retirees and senior citizens on fixed incomes will feel unduly punished by these toll hikes. Can you not find ways to cut your spending instead of increasing our tolls and taxes? Thank you for your attention to this matter. Dr John Mazeika.

Subject: Stop the Toll Hike

Name: Nicole Ricks
Email: nicole@keystoneagency.com
Zip Code: 61047

Question/Comment:

There is no need to raise the toll amount, let alone set it up to automatically increase. The high gas tax we pay is surely enough to pay for the roads and then some.

Subject: Stop the Toll Hike

Name: James Hughes
Email: ramjg@msn.com
Zip Code: 60563

Question/Comment:

The original plan was for the tolls to stop once the initial bond was payed off. It is really sad that Illinois keeps trying everything it can to drive everybody away from the state, rather then encouraging them to come in and stay and/or visit. The state seems to be opting for illegal immigrants to populate the state vs US citizens. Keep it up and the only tax payers will be state employees.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: regina Fengya
Email: Reginafengya@gmail.com
Zip Code: 62972

Question/Comment:

It's one thing to have a need for an increase but the never ending toll hikes are not acceptable. Look at the excessive toll to cross the skyway bridge after that was sold off. Illinois has a poor history of nickel and dimeing its residents on a multitude of things, just like the annual increases to the gas tax. Where are the 'rainy day' marijuana funds being used? We need to stop allowing automatic increases and dig into failing budget management and proceed like corporate anerica to engage in business process improvements that provide savings to fund other initiatives!!! Least I even mention the failed property tax issues in Illinois using inflated FMV!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Judie Reynolds
Email: Judie.Reynolds@Yahoo.com
Zip Code: 60010

Question/Comment:

We don't need a toll hike. There is already enough money collected to fund the proposed road projects. There was so much excess money in the Road Fund that the State decided to, on a yearly basis, divert a portion of the road money toward the Chicago-area public transportation, which is out of scope for the intended use of the Road Fund money. Stop the politics, keep the tolls as is and find another way to subsidize the Chicago-area public transportation.

From: Peter Pocius via Illinois Policy <action@illinoispolicy.org>

Zip Code: 61282

Question/Comment:

It's already too expensive to drive on roads that tolls were supposed to have been removed from years ago. Enough already. We've paid long enough. I already avoid travel to Chicago due to tolls. I will avoid it even further and spend my money elsewhere. Rollback tolls, don't raise them!

From: Jeff Haenel via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 2:41 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Jeff Haenel
Email: hxpress1@gmail.com
Zip Code: 60142

Question/Comment:

What is our guarantee that the money will actually be used for the tollway system? We were under the impression that the tolls already collected were for the tollway, but billions were used to bailout another mismanaged agency. Who's to say it won't happen again, just take the additional funds to pay for some other mistake. But, not to worry, the automatic increases should cover that and future toll money diversions. And the tollway users pay more and more.

From: Diane Quackenbush via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Money is tight right now for American families. Raising toll rates will hit people when they are doing their daily living. They will be trying to earn a living wage, trying to shop for food and clothing for their families and visiting with friends and family. You are hitting every Illinois family with excessive costs that will apply to their having a simple family life. No wonder we are losing so many Illinois voters to other states. This cannot be said to affect the affluent or only a few. The tolls were supposed to end in 1973. Why are there any tolls at all? Where has this money gone?

From: Jennifer Nagle via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Michael Sauriol
Email: msauriol12@gmail.com
Zip Code: 60451

Question/Comment:

How can you seriously justify asking for more money? You just raised the tolls to pay for CTA/RTA/Metra mismanagement of funds. The cost of living is already insane in Illinois. We already deal with high properties taxes, sales taxes, cell phone taxes, internet taxes, streaming taxes, utilities are insane, high interest rates, gas tax, etc. The list goes on and on. Is tax on air next? Illinois wastes more money by dragging construction projects out for decades. Drive to another state (Red or Blue) and you'll see how efficiently other states get construction projects done. You guys just cater to union labor to keep them working for a decade. Look at I-80 and I-294. Take about killing the job! Both of those are around 10yrs of construction each. We all know this money will go to fund pensions which are also unfair to Illinoisans. Put this on the ballot and you'll see how fast this gets rejected. Also, add pension reform to the ballot. That won't happen either! When is enough enough! How about you help the middle class for once. We are the ones who end up picking up the bill for everyone else. Be better at your job and stop asking "mom and dad" for money all the time!

Question/Comment:

Hello,

Everyone understands that costs go up. It's expected. Your case to raise tolls would be strengthened by explaining the reasons for such large increases. Technology has been increased but presumably it has also reduced the number of workers needed.
Share more information about the Tollway budget and needs. Don't just raise the price for over half of the state. It is likely that people avoid the Tollways when they can because the cost is prohibitive. That is not a good business plan!

From: Ronald Deger Jr. via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 3:49 PM

Zip Code: 53191

Question/Comment:

Former Illinois resident who left two years ago due to high taxes and fees in Illinois. This seems political (throw a bone to unions to keep their workers working and voting) and a easier money grab rather doing the real, necessary work Illinois needs to do to lower their costs (root out corruption, address the pension math finally, consolidate the number of taxing entities that are way higher per capita in Illinois than other states, etc. etc.).

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Nicole Cumorich
Email: nicolecumorich@hotmail.com
Zip Code: 60174

Question/Comment:

I find it hard to believe that the tolls ready being paid are not enough to sustain the road maintenance needed... not to mention the additional tax burden paid by IL tax payers. Perhaps there should be some level of accountability - let's see the math. Manage the budget and stop this senseless death by 1000 cuts in what had previously been a great place to grow up and live. That's simply no longer the case for Illinois residents.

From: David Dennis via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 4:05 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: David Dennis
Email: ddennis4597@gmail.com
Zip Code: 62367

Question/Comment:

Toll hikes are out of control when you want to use interest to pay payroll in other places in the state outside of highway department. Downstate Illinois has roads and bridges that can't get fixed due to all the money going to Chicago metropolitan area.

From: Tom Anderson via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

I find the tollway authority (a misnomer) to be completely tone deaf regarding this money grab from hardworking taxpayers. Apparently you aren't aware of the gas taxes Illinoisans already pay (2nd HIGHEST in the nation) on top of the high tolls already in place. And by any measure the only thing we get back are constant construction zones creating huge backups. This seems only to be a bone thrown to unions, because no one else benefits from these save for others with their hands in the taxpayer's pockets.

I am adamantly opposed to these increases and the audacity shown by building in automatic increases so you cowards don't face the taxpayers.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Robert Rackuzius
Email: robertrackuzius@gmail.com
Zip Code: 60513

Question/Comment:

The tolls were initially designed to be temporary. If an agency has a permanent, dedicated revenue source, there is less pressure to prioritize projects or control spending. This encourages endless construction on this road for the sake of profit. The design has never been sufficient to handle the flow of peak traffic and it never will be. Everything proposed historically regarding Illinois tolls has been built around flat out lies and empty promises. I've watched this road torn up and rebuilt over and over perpetually during the past 15 years without any permanent improvement to the commute. What a scam.

Question/Comment:

Why is there a constant need for higher and higher tolls? We already pay the highest taxes in the country on everything. It just appears that we just keep spending more and more money above and beyond what the tax base will support. When does it end? Maybe if we just spent what we have responsibly and conservatively it would change the tax and spend mentality into a more balanced approach. Please listen to the people!

Question/Comment:

I am against this toll hike proposal. First of all, it's unfair to those who cross everyday due to work or school or transportation. We already pay some of the largest taxes for a state & that should be enough to cover road expenses.
Trucks & others will find alternative routes or just skip Illinois altogether. People will find a way around this toll hike & I think you as officials that have the final say should look for other ways. Thank you.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Eileen Korenberg
Email: kkorenberg@yahoo.com
Zip Code: 60645

Question/Comment:

Enough is enough. STOP the toll hikes you never have enough money. What did you do with with the previous moneys you collected. You do not know how to spend wisely and take care of the roads properly but you know how to tax.

From: Agustin Cervantes via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 5:20 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Agustin Cervantes
Email: apayday@gmail.com
Zip Code: 60646

Question/Comment:

Subject: Public Comment: Formal Objection to Proposed Tollway Rate Hike and Capital Plan
To the Illinois Tollway Board,
I am writing to formally request that the Board reject the proposed $26.5 billion capital plan and the unprecedented toll increases. Illinois commuters are already facing record inflation and relentless highway construction. Shifting funds away from roads and asking drivers to plug the gap with historic toll hikes—plus automatic, perpetual rate increases—is fundamentally unfair to taxpayers.
The Tollway is already pulling in record revenue. Pushing a 45-cent passenger hike to cover political deals and administrative inefficiency, while subjecting drivers to another 15 years of gridlock, is unacceptable.
I urge the Board to audit its current budget, maximize existing record revenues, and protect Illinois families by voting NO on this toll hike.

Question/Comment:

Illinoisans and non-Illinoisans just passing through are tired of being ripped off by Illinois' high tolls and annoyed by the never-ending construction. Thanks to the corrupt unions and the clouted-in construction companies, the tollroads are done and redone with shoddy workmanship and materials that fail after a very short time, requiring another round of repairs. Instead of raising the tolls, the tollway board of directors should offer the road construction contracts to non-union companies that will save the state money and do the job right. Prove that Illinois is not the most corrupt state in the US by being fiscally responsible for once. The tollway board of directors needs to be reined in and their unlimited ability to raise tolls needs to be shut down. Using union contractors benefits the unions but not the drivers paying the tolls, so why not let non-union companies bid on the jobs? They'd get done in half the time and for less. Perhaps the state's plan to reduce congestion on the tollroads is to just keep raising tolls until the average driver can no longer afford them. We all wish our salaries were automatically raised to keep up with inflation, but that's not reality for most of us. Why should it be allowed for the tollway?

Question/Comment:

Enough of this stupidity.
Figure out another way to get money from the already over taxed Illinois citizens.
This has turned into nothing but a cash cow due to bad planning.
Clearly you do not have real planners within the state government.
Only thing in planning is more taxes driven by the dumdass Pritzker.
He's on his way out too.
The greed runs deep in this state.
To many hands in the cookie jar and nothing to show but a fat governor, high crime in the most strict gun enforced city of Chicago and the highest taxes on housing.
From a state that has one of the highest moving out from a state within the United States.
It's not because this state has anything to offer.
LOOK AT WHAT THE BEARS ARE DOING TOO!
JOHNSON AND PRITZKER ARE LEADING THE STATE DOWN THE TOILET.
AND THIS TOLLWAY INCREASES WILL HELP FURTHER WITH THE FLUSH.
I HOPE IT BITES EVERYONE RIGHT IN THE ASS.
GREEDY BASTARDS
FUCK YOU, PRITZKER

There is zero need for an increase. Stop hurting working people

From: Edward cappel via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 6:05 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Edward cappel
Email: edcappel@comcast.net
Zip Code: 60467

Question/Comment:

Illinois politicians do the right thing and act on behalf of your constituents. If road improvements were just that, improvements, that would be one thing. Construction on the roads has gone on for decades with no end in site and endless travel issues. Protecting the union voting blocks is tge priority in Illinois instead of hard-working Illinoisians. Stop the money grabbing reaching far into the future. These projects should have been completed years ago. And still, we have arguably the worst roads in the USA. We don't pay enough in taxes already? This is an embarrassment to a once great state.

From: Steve arquilla via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 22, 2026 6:06 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Maureen Fisher
Email: fishermaureen@sbcglobal.net
Zip Code: 60448

Question/Comment:

Illinois road tolls are already high enough. They were supposed to be paid for and tolls would stop years ago. Instead of canceling tolls, you want to raise them. Adding insult to injury you want to install an automatic raise in tolls over time that citizens do not even get to voice their opinion about. You are already collecting more money than needed in tolls and from the road fund. This increase is not justifiable. People are already leaving this state in droves because of high taxes. Looks like you want to do excess work on the roads so people can use them on their way out of the state.

Question/Comment:

Dear Governor,
I am very frustrated government. I lived here all my life. Over the years since you been in government office the tax and cost of taxes has gone up.
The tollway in general is a business to you. You place your values not on the people that live here but on the friends you are committed to.
The tollway is already too expensive,
You are giving relief to those people that already paid into the system,
No tollway hike.
You figure out a way to balance the books so no hike in tolls increase,
You are not serving the people when you do,
Thank you
Kimberly Mulvaney

From: Rick Avgerinos via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Rick Avgerinos
Email: ravger@yahoo.com
Zip Code: 60175

Question/Comment:

You need to take a step back and provide clear answers about why the agency needs more money, where the existing record-high revenue has gone and which projects truly require raising the cost travel for Illinois residents before you push through a gift for labor union interest at the expense of the rest of the taxpayers. There is also an ancillary hit to taxpayers in the form of higher prices for goods whose cost will be increased to pay for transportation costs born by the trucking industry.

How about taking a page from the private sector and building a legitimate business case instead of a PR dog and pony show filled with union shills.

Rick Avgerinos
St. Charles IL

Email: Jgag3@aol.com
Zip Code: 60045

Question/Comment:

My husband and I are both old enough to remember the promises made when tolls went in at 10 cents then went to 25 cents. We were told the roads would then be paid for in short order and “you won’t ever be asked to pay again”. This madness will never stop. Illinois and its unfunded pensions and some of the highest property tax rates in the country have bankrupted not only the state in obligations that can never be met but also residents. Someone needs to say the quiet part out loud. No amount of money now can fix Illinois problems. Please vote no to this increase and bring in responsible and accountable government. It gets harder each day to find reasons to stay.

Question/Comment:

Stop charging people of Illinois more money in tolls. I would love politicians to live off an average salary and then keep paying all the increased taxes and hikes everyone does in Illinois because government spends our money like crazy!! It gets tiresome.

From: Kevin Jennings via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Kevin Jennings
Email: kevinjennings222@sbcglobal.net
Zip Code: 60152

Question/Comment:

First off, the tollway was only supposed to be temporary when initially proposed (
("Toll Free in '73!"). Secondly, we have endured toll increase after toll increase! This with: "From 1973 to 2024, the tollway collected nearly $20.7 billion more in tolls than it needed for maintenance and other expenses apart from major capital projects." And, "The tollway authority took in nearly $1.44 billion in tolls in 2024, the most in any year since tolls were first charged in 1959."
(https://www.illinoispolicy.org/toll-free-in-73-illinois-tolls-cost-drivers-27-billion-since-then/)
Why should working class people pay more for a failed democrat led policy that diverted funds to Chicago's transit debacle? This is another usage tax on mainly northern Illinoisians! You already have enough of our hard-earned money; I'm against this proposed increase.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Paul Redfern
Email: predferny@yahoo.com
Zip Code: 60504

Question/Comment:

Tollway revenues are at record highs. Since 1973 — the year the system was supposed to become free to drivers — the agency has collected more in tolls each year than it needed to operate and maintain the system. During that time, the tollway has collected over $22 billion more in tolls than it needed for maintenance and other non-capital expenses.

Apart from the Tollway, the state also is already collecting more money for transportation than it is spending on roads. Road Fund revenue grew an average of 14% a year under Rebuild Illinois, while expenditures grew just 5% annually. That's due in large part to the automatic increase mechanism — the same thing the state now wants to do with tolls.

Question/Comment:

The toll road fee was supposed to be temporary not forever. If Illinois would do a better job of spending and not give money away to residents because of their lifestyle choice then the real taxpayers wouldn't be left holding the bill. Stop this stupidity before it goes any further.

From: Kathy Noerenberg via Illinois Policy <action@illinoispolicy.org>
Sent: Thursday, July 23, 2026 5:25 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Kathy Noerenberg
Email: KNOERENBERG@AOL.COM
Zip Code: 60558

Question/Comment:

The initial point of the tolls was to pay for the construction of the tollways which would be paid off in the 70s, so the public was lied to. I remember about 10 yrs ago when the IL Tollway Authority was caught in a massive case of misuse of funds to make their office extra fancy with expensive furniture etc. It was corruption! Where exactly has the $22B overage from the last 50 years gone??? We want: 1) SPECIFIC ACCOUNTING DETAILS of the ITA expenses, 2) NO TOLL HIKES & 3) NO TIES TO INFLATION! I'm shocked at the current toll costs as it is! Most people are not millionaires. This would only encourage more waste, corruption and people to leave the greater Chicagoland area &/or more people to leave Illinois than already are leaving!!

Question/Comment:

With clear revenue grossly exceeding capital expenditures for the tollways, this only opens up "justification" and hidden reasoning to continuously hike tolls indefinitely. Illinois is already one of the highest cost of living states because of all of the poor tax decision making and endless budget growth. We need a break. The amount of traffic that will occur on side streets and other highways will make every single person in the tri county area immensely worse. Please do not allow for this egregious plan to come to fruition. It only opens Pandora's box on what the state will do to balance their unsubstantiated budgets and think this is the normal way of closing gaps.

Subject: Public Comment Opposing Proposed Toll Rate Increases and Automatic Indexing

Name: Eric McAllister
Email: eman_2112@gmail.com
Zip Code: 61611

Question/Comment:

To: Members of the Illinois Tollway Board of Directors and Governor J.B. Pritzker

Subject: Public Comment Opposing Proposed Toll Rate Increases and Automatic Indexing

I am writing to express my strong opposition to the Illinois Tollway's proposed $26.5 billion "Driving Connections" capital plan and its accompanying toll rate increases. Raising passenger tolls by approximately 45 cents per toll and commercial rates by 30% marks the largest passenger hike in state history. This burden is unwarranted given that the Tollway is already generating record-high net revenues, collecting significantly more each year than required for system operations and maintenance. Rather than demonstrating fiscal discipline, this proposal asks working residents and local businesses to shoulder an unnecessary financial burden.

Equally concerning is the provision establishing automatic, inflation-linked rate hikes every two years starting in 2029. By locking in automatic adjustments that bypass future board votes and public scrutiny, the Tollway effectively eliminates public accountability. A typical daily commuter passing two toll points per day will face an estimated $225 in added annual costs starting in 2027 alone, with costs compounding continuously thereafter. Furthermore, a 30% rate increase on commercial freight will inevitably drive up the cost of goods and services delivered throughout Northern Illinois, compounding inflationary pressures on households across the state.

The Tollway was originally intended to become a free, self-sustaining highway network decades ago. Instead, drivers face up to 15 additional years of construction, lane closures, and traffic congestion across major corridors (such as I-294, I-88, and I-355) while paying unprecedented prices. I urge the Board and the Governor to reject this proposal, eliminate the automatic increase mechanism, and require the Tollway to operate within its existing record revenues before shifting new financial obligations onto Illinois taxpayers and commuters.

Sincerely,
Eric McAllister
East Peoria, IL 61611

Question/Comment:

This is absurd. How about start with cutting waste first? Why do construction projects take years to complete in IL but months in other states? Parts of our highways have been under construction for 5 years!!! Insane cost. The maintenance costs are out of control due to the length of time it takes to do anything. Weren't some of these dollars supposed to go to schools?? Last year I had to hire a law firm costing 13000$ to force my school district to teach our special needs son. That is money I will always feel illinois owes me and now you all want more tolls??? It's bad enough I have to pay a toll at all just to sit in traffic.

Zip Code: 60194

Question/Comment:

Please don't raise the tolls. Make better repairs. There was toll road construction a few years back that touted "replacing 50 year old pavement". I remember reading that and saying to myself why didn't they make the entire toll system out of something that could last 50 years? You somehow had the formula then. Using that pavement could maybe reduce toll costs since it will be maintenance every so often not complete replacement. We pay enough already.

Question/Comment:

I already pay $5 to get to work on top of the $7 in gas it takes. Just to sit in endless construction traffic wasting an hour of my morning and an hour of my afternoon. On top of that my taxes pay for your tolls because, let's be honest, you flip that cost onto us the taxpayer. You are not paying for your own tolls…if you even drive the same streets, which I doubt you do because after a month of the non-stop traffic you would have passed a law forcing the construction companies to complete the projects in x amount of time. Maybe JB can put the toilets back in his house and pay those taxes to cover the hike?…or maybe he can tax his Hyatt brand a little harder. Seriously, get wrecked.

Question/Comment:

While I doubt that this message will be read by a human, I thought I would try anyway. I appreciate the transparency in making it known not only that the tolls would increase, but they would continue to increase with this plan. However, in a state where costs of living has always been high, and road construction never stops, this seems like a move that is more about money than the people of this state. We live immediately next to a highway, and the rising cost of everything has already far outpaced the increase in income that I receive from the two jobs I work. Not doing this would be on simple way to keep costs from rising for the people of Illinois. Whats more, if you were to reverse course and deliver on the long ago promise of these roads no longer bring toll roads, it would not only show you care, but make memorable steps in showing that promises can be kept by people in high positions.

Please do not raise the tolls!

Question/Comment:

Given the fact that the tollway has already taken in more funds than needed to cover repairs and reconstruction costs, it does not need a rate hike.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Patrick Kenny
Email: PK1144@AOL.com
Zip Code: 61080

Question/Comment:

Revenues from tolls are at record levels and the toll increase is unnecessary because at current revenue trajectory for the future there would be enough money to pay for the building plan without any increase at all. Also, the two members of construction unions who sit on the board should resign or be removed because it is the definition of conflict of interest.

From: Christine Murphy-Lucas via Illinois Policy <action@illinoispolicy.org>

Subject: Stop the Toll Hike

Name: John Czarnik
Email: Masonjackson312@gmail.com
Zip Code: 60631

Question/Comment:

I am writing to express my opposition to the Illinois Tollway proposal that would allow toll increases without requiring future approval or a public vote.

Illinois residents already face a significant financial burden, and any future toll increases should remain subject to public oversight and accountability. Decisions that directly impact taxpayers and commuters should be transparent and include an opportunity for public input.

I respectfully urge you to reject this proposal and preserve the existing process that ensures toll increases receive the scrutiny they deserve.

Thank you for your time and consideration.

Question/Comment:

No one wants to pay more money to sit in traffic jams year after year. Raise the toll when construction is complete. Or, lower it in the construction zone. We take our lives in our hands when lanes shut down and we compete with 18 wheelers to move into closed lanes. That's a lot of risk and inconvenience to pay for.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Erick Hillebrand
Email: e_hillebrand@yahoo.com
Zip Code: 60532

Question/Comment:

I oppose increasing tolls on the Illinois Tollway. Many commuters and families already face rising costs for housing, groceries, and transportation. Higher tolls would place an additional burden on people who rely on these roads every day for work, school, and essential travel. Before raising tolls, I encourage exploring ways to improve efficiency, reduce unnecessary spending, and ensure existing funds are used as effectively as possible. Please prioritize affordability for Illinois residents.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike - enough is enough

Name: Eric Schieler
Email: eschieler@gmail.com
Zip Code: 60124

Question/Comment:

Cost-of-Living Impact: Driving is a necessity for many workers, not a luxury. Increasing tolls places an additional financial burden on daily commuters who are already dealing with inflation and high fuel costs.

Regressive Nature: Flat toll hikes disproportionately affect lower- and middle-income drivers, who spend a larger percentage of their take-home pay on transportation costs compared to high earners.

Gas Taxes vs. Tolls: Illinois drivers already pay high state and local gas taxes meant to fund transportation infrastructure. Paying both high gas taxes and rising tolls feels like paying twice for the same fundamental service—getting from point A to point B.

Lack of Accountability: Distrust toward the Illinois State Toll Highway Authority (ISTHA), based on past political patronage, lucrative non-competitive contracts, and high administrative salaries is only increasing

Moving Goalposts: When tolls are originally introduced or raised for specific construction megaprojects, motorists are often told the increases are temporary. Instead, tolls rarely decrease, and the revenue becomes a permanent feature of state infrastructure spending.

Diversion to Local Streets: Higher tolls incentivize drivers to bypass the tollway system entirely. This redirects heavy commuter traffic and semi-trucks onto local arterial roads and residential streets, increasing local traffic congestion, noise, and wear-and-tear on municipal roads funded by local property taxes.

Higher Consumer Costs: Trucking and logistics companies pass increased toll costs directly down the supply chain. Higher shipping rates mean higher prices for goods, grocery items, and services for Illinois consumers.

Let Elon bore to actually resolve traffic issues!

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Scott Cleave
Email: scottcleave@yahoo.com
Zip Code: 60201

Question/Comment:

I still don't understand why we still have the whole tollway system. There has been more than enough time to pay off construction financing. Upkeep should be paid for no differently than all the other interstate highways. It seems to me to be a political fiefdom that does nothing for taxpayers or travelers. It only feeds the political machine. And in Illinois, we've had enough of that! Let's go the other way and phase it out. Do not increase the burden on us to pay for your political power.

From: STACY GUSTIN via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: STACY GUSTIN
Email: rbmellsg@yahoo.com
Zip Code: 60203

Question/Comment:

Increasing the amount of the tolls has never resolved the continual financial problems of the Illinois tollway system. All it has ever accomplished is the never ending burden that Illinois residents bear with increases in taxes and fees. The construction ends and within a year or maybe two the roads are in need of repairs once again.

Is it a lack of quality materials, unexplainable expenses or a combination of many elements of mismanagement. The result should not be a never ending increase in tolls. I have had many visitors from other states who are stunned by the fact that our toll system is never paid in full.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Andrew Scumaci
Email: ascumaci@bartlettilfd.gov
Zip Code: 60103

Question/Comment:

I am writing to express my strong opposition to the proposed 57% toll hike. This increase functions as a de facto tax, effectively replacing funds that were diverted from the roadway budget to finance unrelated public transportation projects. I am well aware of these fiscal maneuvers, and they are unacceptable.

For my household, this increase represents an additional cost of over $20 per week—or $2.70 per day on the Elgin-O'Hare system alone—which is an unrealistic financial burden. Furthermore, I have observed consistent toll increases over the past several years, contradicting claims regarding the necessity of this latest hike.

I urge the Board and the Governor to reject this proposal. Please consider the impact on your user base; if these costs continue to rise, commuters will have no choice but to reduce their use of the system. You rely on drivers to fund your bond obligations, and this pattern of excessive fee increases is unsustainable. I ask that you stop these recurring hikes and prioritize fiscal transparency and accountability.

Zip Code: 60463

Question/Comment:

Governor J.B. Pritzker stated, “If you want to make things more affordable, the best thing you can do is put a little more money in people's pockets,” as reported by the Chicago Tribune.

This certainly does not seem to be “putting money in people’s pockets.” It seems to be robbing them instead. Why aren’t we proposing actual long-term solutions that are cost effective? Instead, the state elects to spend over and over and over on the same projects. From engineering that is way over budget and takes years-the is vastly behind the need curve-to work that needs to be redone every few years because it wouldn’t hold up to the projected use. This is a disaster and only adds to the unending cost of living increases in Illinois. No wonder people want out.

Question/Comment:

It is absurd to think of the rate increase along with inflation increases the Tollway is asking for. This is anti-working class agenda that doesn't not at all show any meaningful impact on the people that use this system. This should be completely rejected.

From: David Gallaher via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Please do not do this to working families like mine. I commute to O'Hare airport from Downers Grove for work and I have no other option than to take the tollway. This increase will absolutely take food away from my family as the percentage increase for my drive is staggering. You are hurting working families who rely on the tollway to get to and from jobs that support the state. At a minimum, there needs to be a carveout for O'Hare airport employees. We cannot afford such a dramatic increase when the gas tax continues to rise, gas prices are high, and property taxes are ever increasing. This will cause me to reconsider my future in Illinois if this toll rate increases. Please reconsider. Thank you.

From: Thomas Morrison via Illinois Policy <action@illinoispolicy.org>

Email: trm1500@yahoo.com
Zip Code: 60067

Question/Comment:

I strongly oppose this proposal.
The IL legislature and governor shouldn't have authorized it in the first place.
The politicians talk all the time about "affordability."
Expensive gas taxes, sales taxes, and now toll increases are a slap in the face to consumers and businesses who pay the bills.
They cannot just earn more or charge more to cover costs.
Show some restraint. Oppose a toll hike. Live with what you've got.

Question/Comment:

When you collect as much money as this state does and you can't find money to pay for the roads, that's not a reason to raise taxes on the roads. It's a reason to cut all spending beyond the absolute essentials, pay for the reasons the state government was created in the first place, and get rid of the programs that have accumulated over the years. There's plenty of money to spend on the tollway. You just choose to spend it on nonsensical programs that are nothing more than hand outs to tax consumers rather than benefits to tax payers.

Zip Code: 60056

Question/Comment:

Hello IL Tollway Board of Directors and Mr. Pritzker,

Voting for the largest toll hike in IL history coupled with automatic toll increases, similar to the gas tax auto increase, is a terrible and punishing idea for the hard working people of IL.

Increased taxes after new or increased fee's are sadly the way of life here in IL under Mr. Pritzker's "leadership." It may come as a surprise, but the far majority of Illinoisans weren't born with a silver spoon in their mouths, and we worry about paying for everyday items.

I could understand a toll increase every once in a while, if the funds were needed. But the road fund is flush with cash. In fact we have so much money for the roadway that Mr. Pritzker stole hundreds of millions of dollars from the fund, multiple times, in order to "balance" his budget.

Seems to me that this new toll hike and auto increase is just another way for JB to later steal the funds to "balance" his future, out of control spending budgets.

For the love of all that is wholly, do NOT pass this extremely egregious toll hike AND auto increase.

Instead, how about we pass some common sense laws like, government officials can't steal funds from the people of IL (looking directly at you Mr Pritzker.) Or how about tax or fee relief, instead of always increasing them.
At the very least, drop the auto toll increases.

A very concerned citizen being priced out of my home State of Illinois,
Joe

Subject: Stop the Toll Hike

Name: Eileen Mullen
Email: ecmullen@aol.com
Zip Code: 60013

Question/Comment:

Illinois residents are being pushed to the breaking point by relentless tax and fee increases. Sales taxes, property taxes, and basic living costs continue to rise, while neighboring states remain far more affordable. Families and businesses are leaving because they can no longer absorb the financial pressure.

The tollway hike — and its automatic future increases — is unacceptable. It places an additional burden on working people who rely on these roads daily. It raises commuting costs, will drive up the price of transporting goods including food, and will fuel inflation at a time when households are already strained. It also accelerates the loss of employers and jobs to nearby states with lower operating costs as we have recently seen taking place.

This must stop. I urge you to halt the proposed toll increase and take immediate steps to reduce the financial strain on Illinois residents and businesses.

Zip Code: 60142

Question/Comment:

To the Members of the Board of Directors,

I am writing to express my strong opposition to the proposed $26.5 billion capital plan and the accompanying toll increases—specifically the 45-cent passenger hike, 30% commercial rate increase, and the proposed biennial automatic inflation adjustments.

At a time when Illinoisans are already facing elevated inflation, high property taxes, and a rising overall cost of living, imposing the largest passenger toll hike in state history is fiscally irresponsible. Rather than looking for ways to streamline operations or live within existing record revenues, state leadership continues to rely on tax and fee increases as the default fix for government spending.

This continuous cycle of rising costs is having real demographic and economic consequences. Across the country, states that lean heavily on high taxes and expanding mandates are seeing a steady outbound migration of residents. Crucially, it is often high earners, business owners, and mobile professionals—the very individuals who drive economic growth and generate tax revenue—who leave first for states with more competitive fiscal environments. Every time Illinois increases the cost of working, commuting, and doing business, it incentivizes more high-value taxpayers to move elsewhere, eroding the long-term tax base and shifting an even heavier burden onto those who stay.

Furthermore, putting future rate hikes on "auto-pilot" via inflation-linked adjustments removes transparency and public accountability from future board decisions.

The Tollway Board should focus on fiscal restraint, prioritizing essential maintenance within current revenues, and protecting working families and businesses from further cost increases. I urge you to vote NO on this proposed toll hike.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Rizwan Ahmed
Email: rizwan_s_ahmed@yahoo.com
Zip Code: 60139

Question/Comment:

I am writing as a concerned constituent to urge you to oppose the proposed toll increase.

Families across our region are already dealing with higher costs for housing, groceries, fuel, and other everyday necessities. Increasing tolls would place an additional financial burden on commuters, working families, and small businesses that rely on our roadways every day.

Before asking residents to pay more, I encourage you to prioritize greater transparency regarding how current toll revenues are being spent, identify opportunities for operational efficiencies, and explore alternative funding solutions that do not further impact taxpayers and commuters.

Reliable transportation infrastructure is important, but it should be funded in a way that is fair, accountable, and mindful of the financial pressures many residents are already facing.

I respectfully ask that you oppose the proposed toll increase and advocate for more fiscally responsible alternatives.

Thank you for your time, your service, and your consideration of my concerns

Question/Comment:

To the Illinois Tollway Board of Directors:
This governor has presided over a waterfall of tax increases across every aspect of life and commerce for the past four years. The proposed tollway increases will hamper Illinois competitiveness, prompt more businesses and even more residents to relocate to other states, and it will impoverish Illinois citizens with not control over endless " inflation adjusted" toll increases. You all are destroying the eceonomic foundation of this state while you assume that people and businesses with resources to move will continue to stay here and take it. THEY WON'T DO THAT.

From: Cierra Berk via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

So, when is enough enough?? For something that was supposed to be shut down after the initial roads were built in the 1960's, this sure has taken on a life of it's own!! I've been driving over 50 years, with a CDL, for the last 38.. Now we have Tollway Board, who has never seen the light of day! Who the hell is running this thing! I say enough is enough! As a citizen of this state since birth, I say enough!! NO to any increases, and NO new roads! I am retired, and I just can't afford to live here anymore! I sabed, but not for this state! You guys just keep taking, and we're just supposed to keep shelling it out! Well, I say no more!! Taxes in this state get more ridiculous every year! Just got a gas tax increase, take it out of there!!

Subject: Stop the Toll Hike

Name: Aurelio Marand
Email: aureilm@outlook.com
Zip Code: 60126

Question/Comment:

Illinois families are already dealing with high living costs, and additional tax hikes would place an even greater burden on homeowners, workers, seniors, and small businesses.

The Illinois Tollway was originally presented to the public as a system where tolls would eventually end after the roads were paid for. Residents feel that promise has not been fulfilled. Instead of raising taxes or fees again, elected officials should focus on responsible budgeting and fiscal accountability.

Please vote NO on any tax hike proposals. As a voter, I will be paying close attention to these decisions and will take them into consideration when I cast my vote in future elections.

Question/Comment:

This toll hike is not needed. The only reason it is being considered is because the state redirected funds to the CTA and are looking to once again fill the coffers. The projects that are being used to try to justify this increase are not needed. They may be nice to have, but they aren't necessary. We need to stop increasing how much it costs to live the state of Illinois and the Tollway needs to do its part in that equation. Vote no to this toll hike!

Question/Comment:

Stop JB Pritzker's toll hike plan. I hear that the Illinois highway system has so much of a surplus that Pritzker confiscated a ton of money to benefit Chicago's mass transit. That is NOT a fair use of tollway money - especially when the Tollway was originally sold to the public as "toll-free" by a certain date.

Meanwhile, the Edens Expressway is falling apart due to shoddy workmanship or cheap materials - probably so that cronies could enrich themselves at the expense of motorists who have to dodge potholes and open seams on work that is only a couple of years old.. Why should we be taxed and tolled at higher rates when the state does such a crappy job resurfacing the roads?

From: Joe Cofran via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

Stop the toll hike.

Illinois residents are already among the most highly taxed in the country. We do not need another tax that will continue to raise the cost of business in this state. Fuel taxes were already doubled in 2020 and continue to rise. Please do not do the same thing to the tolls. The automatic increases on gas taxes are already unpopular with residents, the automatic toll increases will be the same.

My profession does not require me to live in Illinois. I have been considering leaving the state due to unacceptable fiscal policy and oppressive taxes, as many other residents and businesses have done in recent years. I will leave the state if this passes, then you will get no tax, nor toll dollars.

Thank you for your consideration.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Richard Hayes
Email: rihayes@yahoo.com
Zip Code: 60010

Question/Comment:

Tolls increased during last recapitalization of the tollway system which was in disarray and needed upgrades. 25BN was forecasted to be raised to improve tollway which all of it is just about complete and should last another 10-30 year. Now an additional 57% increase is being asked for when there is little if any major improvements needed in the next 10 years. You need to inflate prices for tolls not every 10-15 years but annually. This 57% increase is lunacy. Start acting a responsible party in appropriately managing finances.

Question/Comment:

This is my understanding and my concern as a daily 294 Tollway traveler since 1989. Tollway revenues are at record highs. Since 1973 — the year the system was supposed to become FREE to drivers — the agency has collected more in tolls each year than it needed to operate and maintain the system. During that time, the tollway has collected over $22 billion more in tolls than it needed for maintenance and other non-capital expenses.
Apart from the Tollway, the state also is already collecting more money for transportation than it is spending on roads. Road Fund revenue grew an average of 14% a year under Rebuild Illinois, while expenditures grew just 5% annually. That's due in large part to the automatic increase mechanism — the same thing the state now wants to do with tolls.
Why does the agency need more money, where has the existing record-high revenue gone and which projects truly require raising the cost travel for Illinois residents.
Not right to ask for a huge increase on a road that was supposed to be free. I'm paying thousands of dollars in tolls every year for a roadway (294) that has been under construction more time than not.
Enough is enough. If these ridiculous rate increases happen, it will force me to look for alternative routes to work.

Question/Comment:

Please do not approve the proposed tollway rate increases.

This will burden Illinois drivers not only from the direct increased toll rates, but also by increased prices of consumer goods, as the commercial drivers will simply pass the additional costs onto us. The automatic increases every two years places an undue burden on Illinois residents, driving more residents to flee the state.

This is clearly connected to last year's mass transit bailout, and not from a legitimate need. The tollway system was supposed to be temporary. Currently, tollway revenues are at record highs, and we already have a gas tax to supplement the costs for road improvements. The proposed tollway rate increases should not be necessary if the money allotted to road improvements are being properly maintained.

Please reject the proposed tollway rate increases.

Question/Comment:

DO NOT implement any further toll hikes! We already pay enough for the roads we drive in Illinois. While the Tollways are better maintained than the other highways in the State, that is not saying much. The tollway has record revenues. They need to frugally spend those revenues just as I or any other household or business would spend available income. You don't spend just because you have it. You spend because you need to spend, not because you have excess funds!

Additionally, it is NOT FAIR that I as a non-RTA/CTA/METRA user should have to fund these systems. I am funding the Tollway because I use the Tollway. the users of the RTA/CTA/METRA should fund the system that they use. It is not my fault that these over-bloated bureaucratic systems waste money and are inefficient. Make them cut waste, and force their users to fund their systems!

Last time I checked, this was not communism. We should not be taking from the Tollway to pay for the RTA/CTA/METRA. They and their users need to take care of themselves. If I rode one of them, I would expect to pay my fair share, not to have someone else pony up for my share.

I hope that you take my thoughts, as well as the vote that comes with me on election day, into account when you decide to (hopefully not) increase the tolls.

Thank you.

Question/Comment:

Hello,

I urge you to reject the toll hike on Illinois drivers. The new proposed rate per mile is almost double what we are currently paying. In a period of time where gas prices and the overall cost of living is at an all time high, passing along a rate increase is completely out of line. If the governor and the tollway board approve of this hike, this proves that both are completely out of touch with their constituents. I'm especially concerned with the rate increase for commercial drivers. At a time where most of what I buy is transported via truck, I am concerned about the additional cost increases myself and others will increase. The trucking companies will have to increase their rates which I fear will cause all other downstream parties to increase their rates, making life in Illinois even more unaffordable than it is.

I urge you to stop the toll hike.

Question/Comment:

Quit taking the already broke Illinoians. 45 cents is absolutely ridiculous. For a POINTLESS project. Why fix something that isn't broke. Regardless of what you do traffic is TRAFFIC. Nothing will ever ever ever change that. We cannot afford more in tolls. Some people rely on taking the toll to make their already long commute quicker. The fact alone that these bordering states that everyone is moving to have no tolls should show you that you're doing something wrong. You want more people to stay in Illinois.... Then you must change soemthing. And that is to make Illinois affordable again. Prices of homes have skyrocketed for what reason???? If I did not have all of my family residing in this horrendously outrageously expensive state I would jump aboard with everyone else and skidaddle. This new generation coming in will not stand for this. Let alone all of the other chaotic nonsense that is happening all through Illinois. To raise these tolls is basically telling all living in Illinois you don't matter and YOU Illinois board and freaking Pritzer JUST WANT TO TAKE OUR MONEY. stupid nonsense. Our voices don't matter regardless, this messed up system doesn't hear the people they don't care in the end it's about one thing. Money. Just thought I would pass along and say this.

Question/Comment:

Dear Governor Pritzker and Tollway Board members,

The over taxation of Illinois needs to stop. We continue to pay more and more in fees and taxes while getting less and less in return. Illinois needs to live within the income gained by existing taxes without increasing taxes and without creating new avenues for increased fees and new taxes. Governor Pitzer, until Illinois can get the fundamentals right and balance the budget there should be no more luxuries and tax free initiatives for big business and big sports. Frankly, if you run for President of the U.S.A., I can't and won't vote for you as you have raised taxes and shown you can't control the budget. Illinois needs austerity and so does the U.S. Federal budget. If you can't manage the Illinois state budget, you surely can't manage the federal budget either.

Sincerely,
Neal Mori

Question/Comment:

I am writing to strongly oppose the Illinois Tollway's proposed rate increases. The Tollway's own financial statements make it unmistakably clear that this agency does not need additional revenue to operate. In 2024, it collected roughly $1.7 billion in operating revenue, while spending only $421.6 million on maintenance and operations. That is a massive surplus — not a shortfall.

The Tollway brought in more toll revenue in 2024 than in any year in its history. It continues to generate far more money than is required to run and maintain the system, yet it is still seeking to raise rates. A 45-cent increase per toll, stacked on top of automatic inflation-based increases, is nothing more than an unnecessary and unjustified financial burden on the commuters who rely on these roads every day.

There is no credible operational justification for demanding more from drivers when the agency is already producing record surpluses. I urge the Board to reject this increase and instead identify efficiencies within the existing budget before asking drivers to pay more.

From: Vytautas Izganaitis via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

I am writing to strongly oppose the Illinois Tollway's proposed rate increases. The Tollway's own financial statements make it unmistakably clear that this agency does not need additional revenue to operate. In 2024, it collected roughly $1.7 billion in operating revenue, while spending only $421.6 million on maintenance and operations. That is a massive surplus — not a shortfall.

The Tollway brought in more toll revenue in 2024 than in any year in its history. It continues to generate far more money than is required to run and maintain the system, yet it is still seeking to raise rates. A 45-cent increase per toll, stacked on top of automatic inflation-based increases, is nothing more than an unnecessary and unjustified financial burden on the commuters who rely on these roads every day.

There is no credible operational justification for demanding more from drivers when the agency is already producing record surpluses. I urge the Board to reject this increase and instead identify efficiencies within the existing budget before asking drivers to pay more.

Question/Comment:

We already pay in excess of $600 per year in tolls just so my wife can get to work....please don't do this. The roads are fine. I'd rather have slightly crappier roads than a hike this big. We'll have to use the roads less and it'll mean we spend even less money than before on tolls- bad for the state budget.

Question/Comment:

As someone who is a resident of the state for the past 30 years and have started a company in Illinois, having such a high increase is devastating.

I don't mind seeing a smaller increase of 10-15% but seeing an increase by 45 cents per toll is purely ridiculous and unreasonable. It is becoming very hard defending the actions of politicians of this state. And I had been loyal along with my staff and family for years.

Try to change this and make it reasonable

Subject: Stop the Toll Hike

Name: Ida Thompson
Email: thompsonim2016@gmail.com
Zip Code: 60425

Question/Comment:

Illinois already receives enough money from tolls.

Yet, I have watched toll closures (no salary or health care costs) because the employees are gone.

The eastbound exit for 294/I80 at Halsted has been closed for over two years. What's the problem?

The contractor that just resurfaced Halsted at 183rd Street did not do a good job. Who's selecting the contractors and who is reviewing and approving the work? Horrible!

I do not support higher tolls during these hard and uncertain economic times. VOTE NO.

Increasing tolls in this manner is irresponsible to the working citizens who have to use the tollway system.
Hiding taxes by increasing user fees is an insult to every citizen this state.
Please consider practicing fiscal responsibility to the citizens of this state not to special interest unions and contractors.

Question/Comment:

ENOUGH! The tollway was supposed to become a freeway decades ago, but a political stunt was used to borrow money to extend its charter. We all know it. In addition we have questions as to why our roads cost huge amounts per mile more than in other states. We also know of the corruption programmed into the computers at IDOT calling for asphalt over cement which every one of your engineers will tell anyone is CORRUPTION and THEFT and in direct contradiction of what they learned in engineering schools. We know about the corrupt garbage stunt of renting barriers and how they are 10% of the budget. We've had it with you white collar criminals and your padded costs per mile. No more! No hikes. If the state needs road money LET ICE REMOVE ALL YOUR ILLEGAL pets from our prisons and towns and use the money wasted on them for roads.

Question/Comment:

Dear Sirs,

I oppose the measures proposed that create perpetual inflation related increases in tolls on the Illinois Tollway System. The system is already operating with collections that create a positive cash flow for the tollways, It is now time to fulfill the commitment made to the Illinois populace to eliminate the tolls altogether. It would only be 53 years late to comply with that promise.

Question/Comment:

This proposed toll increase is a bad decision and adding the automatic annual increase is a cowardly act. If you are so concerned and fearful of passing increases thus protecting yourselves with automatic annual increases...then it is a poor decision in the first place. Pritzker is using this "cowardly annual increase" with the gas tax. Jim Sweeney you promised to protect the Road Fund and the Amendment to secure those funds, yet Pritzker has once again raided the funds for other uses...specially supporting the CTA...which is bleeding funds due to low ridership. Do you think that he will not raid the Tollway Funds...if he can violate the Amendment to secure the Road Funds, he will raid the Tollway Funds. What happens to the interest earned on the Road Funds...where is that money going? Where is the accountability for that interest dollars.

Stop this massive increase in the tolls...stop Pritzker from raiding the Road Funds. Stop the cowardly automatic annual increase.

Better yet, demand zero-based budgeting...cut spending.

Respectfully

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Christopher Clune
Email: cclune11@gmail.com
Zip Code: 60540

Question/Comment:

This state desperately needs to reverse course on its obsessive effort to increase the tax burden on literally everything and instead get obsessive about growing the tax base, which requires politicians to step up and lower taxes, make efficient budgets and reform the ever ballooning pension deficit. People are truly worn out by the ever increasing taxes in this state. Until Illinois can be competitive to other states and stop the outflow of residents (especially young residents), businesses, jobs, and opportunity, it will continue to fail. Doubling the toll tax will not only do more harm than good in said areas, but why is it even necessary? The RTA only said it needed $250mm to operate and the toll tax is projected to bring nearly $2 billion? Where is the rest of that money going? Illinois's road fund is already entirely mismanaged. We desperately need financial accountability and people in government to make cost reduction to residents their #1 priority. For my entire lifetime and even today, its priority #2,897.

Question/Comment:

Dear Board Members:

Illinois drivers alread pay some of the highest taxes and fees in the nation. A proposed 57% toll increase would place an even heavier burden on commuters, families and small businesses who rely on the tollway system every day.

I urge you to reject this toll hike. Illinoisans are already stretched thin and such a steep increase would make transportation less affordable and less accessible for the very people the tollway is meant to serve.

Please decline this proposed toll increase.

Sincerely,

Candida Cain

Question/Comment:

This hike is unfair to drivers in Illinois. I remember when the 1st toll road it was promised to be toll free after it completed, what a joke now they have their own retirement system and it never stops. Now they want to increase fees without public input. If you want to keep people in Illinois this is not the way to do it.

Question/Comment:

I look at my tolls paid every day I work. This past week Illinois charged me $4.75 three times in 33 mins and that same day I was charged $4.75 twice in 11 mins. Thats $23.75 in less than an hour of driving. This doesn't include all the smaller tolls. I had a very small trailer I was towing. On a separte occasion earlier this year I received a bill in the mail from Illinois Tollway telling me I didn't pay 3 tolls for a total of $1.05 the bill sent to me was for over $12. I have been fighting with Illinois tollway for several months to have this bill disolved. I have an ipass that in 15 years has never failed but for some reason on this day it did. I filed a complaint with Illinois attorney General and nothing has been done. How many other drivers are getting over charged and just pay it? This year in total I have paid 551 tolls for $529. I'm a gig worker. I pay $6000 a year in property taxes for a 2 bedroom townhouse and of course the 49 cent gas tax per gallon. This is ridiculous. when is this madness going to stop?

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Matthew Prill
Email: mrmattp64@gmail.com
Zip Code: 60107

Question/Comment:

No No No to the tollway hike.
We already pay some of the highest property taxes in the nation, and taxpayers keep getting told that the next tax or fee increase will finally solve the problem. We were told doubling the gas tax would fix our roads. Instead, the money was diverted to the general fund to help balance the budget.

Vehicle registration fees have skyrocketed. The gas tax keeps climbing. New fees are added year after year. Yet the roads still need work, the budget problems persist, and taxpayers are expected to keep paying more.

Now we're being asked to accept yet another increase.

At some point, enough is enough. The people who work hard, pay their taxes, and keep this state running are tired of being treated like an unlimited source of revenue. Instead of demanding more from taxpayers, state leaders should start demanding more accountability for how taxpayer dollars are spent.

It's no wonder so many families and businesses are leaving the state. Every new tax, fee, and mandate makes that decision a little easier. If this continues, don't be surprised when even more people decide they've had enough and take their jobs, investments, and tax dollars elsewhere.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Keith Frigo
Email: kfrigo@sbcglobal.net
Zip Code: 60805

Question/Comment:

Please reject the tollway hike, the money from tolls should be spent on its upgrades. Not given to the city of Chicago for its transit projects. We pay enough as it is and milking us Illinois citizens isn't helping anyone. Maybe consider a higher rate for commercial vehicles that is set through the IPass system. Companies are making millions delivering their goood over our roads.

Question/Comment:

Please stop the toll hike. You are punishing Illinois residents for Springfield's inability to balance budgets and their mistake of bailing out the CTA. We had enough of a surplus to bail out a floundering transit system so tolls obviously already bring in more money than we need for roadway projects if we can throw the money away on the CTA (NITA).

Subject: Stop the Toll Hike

Name: Jose Maldonado
Email: jmado1@gmail.com
Zip Code: 60014

Question/Comment:

Governor Pritzker, I am asking you to reconsider the Illinois toll increases. Illinois families are already facing rising costs for housing, groceries, insurance, fuel, and other everyday expenses, and higher tolls only add to that burden for those of us who rely on the tollway to get to work and support our families. I understand the importance of maintaining our transportation infrastructure, but I urge you to prioritize transparency, efficiency, and responsible use of existing funds before asking residents to pay more. Please consider alternative funding solutions and help provide some financial relief to hardworking Illinoisans. Thank you for your time and consideration.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Celeste Holmes
Email: cbhrcc@icloud.com
Zip Code: 60175

Question/Comment:

The proposed toll hike is unaffordable for Illinois residents, especially at a time when the Tollway system is becoming less safe, not more. Families are already strained by rising costs across housing, groceries, utilities, and transportation. Increasing tolls now would force drivers to pay more for deteriorating pavement, prolonged construction zones, confusing detours, and hazardous lane shifts.It is unreasonable — and inequitable — to raise prices while failing to provide the basic safety and reliability drivers are entitled to. I urge the Board to reject or delay the toll hike until the Tollway can demonstrate clear, measurable improvements in roadway safety, maintenance, and transparency around how current funds are being used.

From: Brendan Delaney via Illinois Policy <action@illinoispolicy.org>

Subject: Stop the Toll Hike

Name: Bob Thompson
Email: bobmthompson01@gmail.com
Zip Code: 60030

Question/Comment:

I implore you to reject this toll hike. We are already overtaxed as a state and this increase far exceeds inflation. I am retired and my social security increase was less than 4% last year and is projected to be less than 4% in 2027. We cannot afford to have this extremely high toll increase. We already one of the 2 highest gas taxes in our nation. Illinois cannot handle these unrealistice toll increases. Money has been and continues to be mismaaged by our state. This is a main reason that our citizens are leaving in droves to other tax friendly states such as TN, TX and FL.

Regards,

Bob Thompson

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Mark Landiak
Email: Mlandiak@corpdyn.com
Zip Code: 49103

Question/Comment:

Another huge toll increase is unfair to Illinoisans struggling to make ends meet. People driving to and from work are already paying the second highest gasoline taxes in the nation. Taxpayers that have to pay two tolls going to and coming from work are already paying almost $1000/yr. Adding a 45 cent hike purr toll would add almost $500 a year to this burden. This is outrageous and simply not fair. For that reason, we are asking you to reject any increase in the already high gas and toll taxes paid by IL workers.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Noreen Lake
Email: nllake@hotmail.com
Zip Code: 60018

Question/Comment:

Please stop the toll hikes in Illinois. The tollway fund carries a $5.2 billion balance and does not need to increase the current rates. Increasing the fees is unnessary and only to benefit Chicago. Orginially the toll way system fees was suppose to stop back in the 1970's. But because it is a "cash cow" they kept the fees. It is time to stop and help the people of Illinois with FEWER taxes and fees and not more.
When I contacted my state Senator, the response from her office was "you do not have to use the tollway". Well, that was a stupid response, as then using surface streets would cause more pollution, due to stop and go traffice. I thought we were suppose to be "green".
These increase fees will also cost more to consumers as the trucks driving will have to increase their fees to cover the additional costs.
So bottom line the people of Illinois will get hit with double fees because of this rediculous attempt for more money by the government and tollway officials.
STOP THE TOLLWAY FEE INCREASES!
Thank you for your attention and consiceration in this matter.

STOP THE TOLL HIKE... we are being taxed enough

From: Jim Burns via Illinois Policy <action@illinoispolicy.org>
Sent: Monday, July 27, 2026 8:45 AM
To: Board of Directors; governor@state.il.us
Subject: Why Establish a Permanent Toll Increase

Name: Jim Burns
Email: johnnybravotp@yahoo.com
Zip Code: 61103

Question/Comment:

Dear Illinois Tollway Board Members,

Upgrades to the tollway system have been very good. So I understand the need to increase tolls to perform these construction projects. However, I do not understand why tolls will increase automatically every other year and be tied to the rate of inflation. Why is that necessary?

To me such a rate increase indicates constant improvement tot he tollway system. Is this truly necessary? If so why? I would think that if inflation takes off again, like it did a few years ago at 9%, tolls will increase a great amount. This will strain the budgets of tollway users, like me. if inflation were to be very high, I believe it would be prudent not to undertake new construction or upgrades during that period.

Furthermore, will there not come a time when the system has reached a point that no additional upgrades will be necessary? And, what would happen to tolls should there be a period of deflation? Will tolls decrease?

Hopefully, you take into consideration the pocket books Illinois residents who rely upon the tollway system on a frequent basis If a toll increase is needed, do so on a case by case basis. Automatically increasing tolls I believe is not justified.

Thank you for considering my views on this issue.

Cordially,

Jim Burns
A Tollway User

Email: tatel1031@gmail.com
Zip Code: 60654

Question/Comment:

Governor Pritzker and Members of the Illinois Tollway Board:

I strongly oppose the proposed 57% toll increase for Illinois drivers. Illinois residents already face a significant tax and fee burden, and a toll hike of this magnitude would place an additional financial strain on working families, commuters, and businesses that rely on the tollway system every day.

Before asking drivers to pay substantially more, the Tollway should prioritize operational efficiency, cost management, and transparency regarding how existing toll revenues are being utilized. Increasing costs for residents during a time of ongoing affordability concerns is not the right solution.

I urge you to reject the proposed toll increase and explore alternatives that do not place yet another financial burden on Illinois motorists.

Thank you for your consideration.

Zip Code: 60655

Question/Comment:

While I enjoy the roadway frequently, the effect on Sr Citizens and our ability to afford the tollways will become out of control. Most areas have very little traffic and are far from congested. People are moving out of Illinois at a high rate and you will only see reduced cars using the road. In addition, the cost to trucking has a direct impact on our costs. Somewhere it has to stop. You reduced your labor pool and should have accounted for that in your future.

Question/Comment:

This hike is disgusting, when we are paying $5.00+ for hamburger, electricity bills are increasing, and auto insurance is going over the roof, and you want another hike in tolls. The tolls are already high and you want MORE????? You need to look at who's paying the tolls, yes we are, everyday people and citizens of Illinois. People from other states aren't footing the bill like our oversized governor states, but WE are. Don't do it, the tollways are in good shape, actually money needs to go to state and rural roads which are in terrible shape.

Email: get.bird.tune@staydclkd.com
Zip Code: 62321

Question/Comment:

I think that the tolls are high enough, and as they were SUPPOSED to disappear DECADES ago, we need to stop them now. Let's use that surplus we have in the coffers from our gas tax that is so high--that money needs to be used and might as well be used to improve the roads if needed after the toll is removed. That might actually create less traffic on other roads, making their repair bills lower as well. Please consider it.

Question/Comment:

The tollway already exceeds its needed revenue for running & maintenance operations. Tolls are already some of the highest in the nation. Many of the roads have already undergone construction for lengthy periods. This puts an unexceptible burden on people & businesses that must run those routes regularly and discourages our state tourism due to these high fees. Please reject these increases. We love to travel our state and country but can't afford to use our trailer in IL due to high fees & we have many family and friends who will not visit here due to these tolls. Please stop the high cost and disruption of our roads with high tolls.
Thank you for your time & consideration in this matter.
Linda Schuster

Question/Comment:

Wish you would first look at cutting internal COSTS before passing on your record toll increases. You currently take in more revenue than your operating expenses.
I was in construction in the 90s and worked the construction of your new headquarters at Ogden Ave. Nothing but the best for that.....marble floors, Mahogany Furniture and all the best in decorations. Just so your employees feel like executives?? STOP THE GROSS INCREASE. We are being ripped off!!

Question/Comment:

Governor Pritkzer has campaigned on the topic of affordability. He's a LIAR and definitely out if touch! We are already one of the most taxed states in the Union. Find a different and more creative way to fund projects. If this tax goes through....you are then NO different than Trump and tariffs. Congrats!

Zip Code: 60302

Question/Comment:

To whom it may concern,
I am writing about the proposed toll hikes which are already at record highs and asking you to REJECT this.
When tolls were started years ago the money was supposed to go to road upkeep with tolls ending in 1973, and the agency has collected more in tolls each year than it needed to operate and maintain the system. I must also mention that Illinois has the crappiest roads as they don't hold up well and always seem to need more repairs. Other states with similar traffic and weather don't seem to need as many repairs, why is that? Regarding the proposed automatic increase mechanism for tolls? This is just another way to kick the can down the road instead of the Illinois legislature properly dealing with a problem.
House Speaker Chris Welch said unions wanted something to point to that would "help keep working people working and keep roads getting repaired". Governor Pritzker appoints the tollway board, and two of its members hold leadership positions in construction unions (potential conflict?). Is anyone addressing what appears to be a lack of quality for the completed work, taking into account the State spending more than the Reason Foundation's 2023 model which calculated that it cost more than it should have to do the work?
Illinois drivers deserve clear answers about why the agency needs more money, where the existing record-high revenue has gone, and which projects truly require raising the cost of travel for Illinois residents. Maybe the legislature and the tollway board should consider taking a pay cut to cover some of the costs instead of raising tolls, or at the very least provide some better accountability, and better work.
Thanks,
Ralph Wiser

Zip Code: 60707

Question/Comment:

Please stop the proposed toll hike. It was supposed to be free years ago. Paying an extra $220 a year is not worth it. I'm seeing more construction taking more time with little to show for it.

Some of projects have made congestion worse requiring changes to have to made to my commute. The central tri-state 294 corridor is a mess especially around O'Hare. I avoid this area because of the mess. It's difficult to get the southbound Irving Park exit because of the entrance is just before it.
It means that I have to work my way cautiously to exit while navigating through two other lanes of traffic. The northbound lanes are not much better because of the interchange to get to I-90 and exits for O'Hare. Go up to Golf Road because it's easier to navigate despite being farther from my home.

I don't see anything changing in the near future. If the hike does go through a southbound exit at Dempster or Touhy would be nice. It would cut off some of the O'Hare traffic. Going down to I-90 is worth it because of the O'Hare traffic.

Subject: Please Stop the Toll Hike

Name: Ryan Sparkowski
Email: rspark96@gmail.com
Zip Code: 60004

Question/Comment:

Dear Members of the Illinois Tollway Board of Directors,

I am writing to strongly oppose the proposed passenger toll increases of approximately 45 cents per toll (a roughly 57% increase) and the automatic inflation-linked increases every two years beginning in 2029.

As a daily commuter who drives to work five days a week and pays a toll in each direction, this hike would add nearly one dollar to my daily costs, or around $225 extra per year. Us Illinois residents already pay some of the highest taxes and fees in the country, including the highest combined state and local tax burden and among the highest property taxes. Adding another significant fee on top of that places an unnecessary burden on working people/families.

Tollway revenues are already at record levels and exceed operating and maintenance needs. Drivers should not be asked to fund further large capital projects through higher tolls when the system was originally intended to become free once its construction costs were paid.

I urge the Board to reject these proposed increases.

Sincerely,
Ryan Sparkowski

Question/Comment:

Please reject the toll tax. I would imagine if this goes through many residents in Illinois will pay their last toll as they leave the state for good.

I've lived here all 53 years of my life but seriously considering retiring elsewhere.

We need some relief not more taxes heaped on us.

Subject: Stop the Toll Hike

Name: ADAM SMOLINSKI
Email: asmolinski48@gmail.com
Zip Code: 60061

Question/Comment:

Why would you increase the toll when we are struggling harder than ever. Inflation is already sucking the life out the lower/middle class. Eventually a revolution will ignite if you heathens don't stop siphoning away our wealth and value. McCulloch v. Maryland, Marshall declared: "The power to tax involves the power to destroy." Best be prepared for the destruction of your own creation if you wish to proceed as such; blood sucking tax leeches. We already pay enough, enough is enough. Be on the right side of history.

From: Mikah Šoliūnas via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Mikah Šoliūnas
Email: mikahsoliunas@gmail.com
Zip Code: 60409

Question/Comment:

I take the tollway each day to work and the average increase would cost me an additional $225 yearly. That's in addition to paying some of the highest gas prices in the nation—which are still increasing. As inflation outpacing earnings for the past two months and predictions for the third quarter to be similar well! Seems like another additional expense I just don't need!

From: Jeremy Dixon via Illinois Policy <action@illinoispolicy.org>

Zip Code: 60440

Question/Comment:

Governor Pritzker and Members of the Illinois Tollway Board,
I am writing as a Will County resident and Illinois taxpayer to formally object to the proposed toll increase on the Illinois Tollway system.
Illinois already carries one of the highest overall tax burdens of any state in the country — between property taxes, income tax, sales tax, and existing tolls, residents like me are already paying more than enough to fund the infrastructure and services we rely on. The Tollway has consistently generated substantial revenue, and residents should not be asked to pay more simply because the system has failed to operate within the resources it already has.
If the state or the Tollway Authority cannot run a balanced budget on current toll revenue, that is a management and prioritization problem — not a justification for extracting more money from drivers who already fund this system every time they get on the road. Raising tolls to paper over fiscal mismanagement shifts the burden onto working residents and commuters instead of addressing the actual causes of the shortfall: spending, overhead, and how existing revenue is allocated.
I am asking you directly to:
Reject the proposed toll increase.
Conduct and publish a full audit of current Tollway revenue and expenditures before any further rate discussions.
Identify and eliminate unnecessary spending before asking taxpayers for more.
Illinois residents deserve a government that lives within its means before it comes back to us for more. I expect a response outlining your position on this matter.

Sincerely,

Jeremy Dixon

Subject: Stop the Toll Increase!

Name: John Boehme
Email: baymee4@gmail.com
Zip Code: 60506

Question/Comment:

I don’t think the increase in tolls is justified by legitimate road improvements and maintenance. As I understand it, the increases will be used to pay contractors that would otherwise be paid with funds for other roads, but those funds are being diverted to better fund mass transit in Chicago. It is very unfair that suburban residents will see their cost to drive increase by nearly 50%, while city residents see no increase at all in their transportation costs. It strikes me as pure corruption on the part of my state government.

Question/Comment:

Illinois Tollway Board:
This message serves to strongly urge you to stop the contemplated toll hike. This cost increase, along with the other taxes (property, sales, motor fuel, etc.) combine to make for excessive government-driven expenses in the region which need to be reined in. In the case of the Tollway system, the steady volume of traffic would seem to generate adequate revenue to sustain current levels of operation and maintenance without any increase.

Question/Comment:

Illinois needs to stop always looking for ways to raise taxes and fees for its residents. When you consider all forms of revenues Sources in Illinois. Illinois takes the largest percentage of the tax payers income of all states.
The net effect is that our net tax base continues to leave Illinois to escape the mounting tax burden.

From: Darrian Walsh via Illinois Policy <action@illinoispolicy.org>
Sent: Monday, July 27, 2026 4:53 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Darrian Walsh
Email: Wolfdisaster83@gmail.com
Zip Code: 60505

Question/Comment:

I urge Governor JB Pritzker and the Illinois Tollway Board to reject the proposed toll increase. Illinois drivers are already facing higher costs for housing, groceries, insurance, and transportation. Raising tolls would place another financial burden on working families, commuters, and small businesses that rely on the Tollway every day.

Before approving any increase, the Tollway should demonstrate that existing revenues are being used as efficiently as possible, prioritize cost savings, and explore alternatives that do not require asking drivers to pay more.

Please vote against the proposed toll hike and protect Illinois motorists from additional transportation costs.

Thank you for your consideration.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Steve Vogrin
Email: Vogrin1@yahoo.com
Zip Code: 60516

Question/Comment:

I strongly oppose any increase in Illinois Tollway tolls. Illinois drivers already face a high cost of living, and another increase places an additional financial burden on commuters, families, and businesses that rely on the Tollway every day.
Before asking motorists to pay more, the Tollway should demonstrate that it has maximized operational efficiency, reduced unnecessary spending, and explored all cost-saving measures. Any additional revenue should be justified with clear, measurable benefits and full public transparency.
The Tollway has received significant revenue from users over the years. Rather than raising tolls, I encourage the Board to prioritize responsible financial management and identify savings within its existing budget.
Please reject the proposed toll increase and focus on keeping Illinois affordable for the residents and businesses that depend on the Tollway system.

From: Nanette White via Illinois Policy <action@illinoispolicy.org>
Sent: Monday, July 27, 2026 7:14 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Nanette White
Email: nlywhite@yahoo.com
Zip Code: 60178

Question/Comment:

My name is Nanette White, and I live in Sycamore. I oppose raising passenger tolls by about 45 cents and authorizing automatic inflation increases without future board votes. I urge the board to reject automatic toll hikes and instead pursue a more transparent, accountable plan that protects drivers from open-ended increases.

These toll increases, if implemented effect everyone in Northern Illinois due to the increase of everyday goods and services. The toll costs will impact especially the working class, senior citizens and anyone on a fixed income.

The costs of the increase will ripple across other generations. The Illinois Tollway has already collected record high tolls in 2025. And decades ago, we were promised that the tollway would be paid for.

Lastly, the toll increases will contribute to businesses reconsidering the added costs of doing business in Illinois. The costs will be passed on to consumes already struggling with increased taxes. This will lead businesses and families to leave Illinois.

Respectfully,

Nanette White

Question/Comment:

As businesses flee the state schools are failing people are leaving the state 1/3 of the counties want to form a new state , you want to steal more money from Illinois Residents through a toll hike . There is no good in you , none . You take tax dollars from legal US citizens and give it to illegal aliens , untaxed . Yet you want to increase the toll on Illinois tollways . I don't use the tollway hardly at all , but many businesses do , and in the long run that fee paid to transport goods or equipment , through higher tolls , gets passed down to Illinois Residents through higher prices on goods . You're a person of destruction , not a builder. You could have done something great with the state but you chose destruction . This is your legacy , pathetic .

Question/Comment:

This state has been abusing its citizens for decades. This poll tax hike is yet another unnecessary and disgusting attempt to squeeze money out of common people to fix the politicians mess. Illinois politicians raise their own paychecks practically on a yearly basis while they run up the debt. We are tired of this! If you need more money then the state politicians should have to take a pay cut, and pritzkers army of security can be downsized, that would help the state get more money without hurting the regular citizens. You illinois politicians disgust me and will burn in hell

Question/Comment:

The tolls already pull in more revenue each year than the system needs. That has been true for over 50 years. Additional increases will only get pushed to other non-related projects. The cost of tolls is already at a breaking point for many of us so we will be forced to use the tolls less and contribute to higher local road congestion, more fuel consumption, and even road rage due to all the heavy traffic.
The increase is not needed and planned increases going forward is just more evidence this increase isn't for the tollway system but for pet projects and fat pockets.

Elections have consequences, even for non-elected positions.

Question/Comment:

Dear Governor Pritzker and Illinois Tollway Board of Directors,

I strongly urge you to reject the proposed 57% toll hike on Illinois drivers. Illinois residents already pay some of the highest taxes and fees in the country, including high gas taxes, vehicle registration fees, and other driving-related costs. Drivers are struggling with inflation, rising insurance premiums, and everyday expenses. A massive toll increase would place an unnecessary additional burden on families, commuters, and small businesses across the state. Tolls are a regressive form of taxation that hits working Illinoisans the hardest, especially those who rely on tolled roads for work, school, or family obligations. There are better ways to address transportation funding—such as improving efficiency, cutting waste, and prioritizing existing revenue—without punishing drivers who are already contributing heavily. Please reject this toll hike and prioritize keeping costs down for the people of Illinois.

Thank you for your consideration.

Sincerely,
Benjamin Mack
Chicago, IL

Question/Comment:

Is there no end to destroying Illinois families with unending tax hikes? Is there never enough? Incompetence with budgeting is not the problem of the peasants as we MUST budget in order to survive. But government just tacks on more tax hikes when they finally get their tails caught in the door. ENOUGH!!! We see through all this tax hike rhetoric; we, the People, are done with it.

Question/Comment:

I'm writing to express my opposition to toll hikes and tolls in general. As a very active driver and traveler, I've seen numerous roads across the country. I am now a student at Iowa State University and being in Iowa (a state without tolls) the roads here are much better quality. Yes, there is less usage than in Illinois but there are still major highways and roads in the Des Moines area that do have comparable traffic to Chicago area roads and highways. 9 times out of 10 the roads are better quality if not similar. And it's not about weather either, Iowa gets the same if not worse weather than Illinois does and they can still maintain their roads better than Illinois does. I know that tolls are supposed to be used for road improvements but why is it the case that the states without tolls have better roads than the ones with tolls. Maybe instead of taxing more, spend less. Basic economics.

From: Robert Kolek via Illinois Policy <action@illinoispolicy.org>

Question/Comment:

When the tollway system was originally proposed it was based on the premise that when the tollway bonds were retired, the tolls would cease. Increasing the tolls only serves to perpetuate the lie on which the tollway system was built. Tolls are in fact a tax imposed in many cases on those drivers least able to afford that tax. STOP THE TOLL HIKE.

Question/Comment:

It is my understanding that the tollway proposes raising passenger tolls by about 45 cents each and commercial tolls by 30%, starting Jan. 1, and adding automatic increases every two years starting in 2029. This is outrageous and ridiculous. The state of Illinois does not have a revenue problem. They have a spending problem. Tollway revenues are already at record highs, with $1.3 billion more in revenues in 2025 than operating and maintenance expenses. Since 1973 — the year the system was supposed to become free to drivers — the agency has collected more in tolls each year than it needed to operate and maintain the system. No other state is doing this to their people. We are just trying to go to work and support our families, and every time we turn around we are being taxed and robbed. Please vote NO.

Sent: Wednesday, July 29, 2026 9:35 AM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike!!!

Name: Cara McCurdy
Email: carajmccurdy@gmail.com
Zip Code: 60560

Question/Comment:

My name is Cara McCurdy, and I live in Yorkville. I use the Illinois Tollway regularly for commuting to work and running my business, and I oppose the proposed 45-cent toll increase for passenger vehicles. This would significantly hurt my income as I need to take the tollway to go to work. I work full-time and have a part-time job to make ends meet as it is.

The Tollway is already generating record revenue, and this increase comes on top of years of rising costs for Illinois drivers. I'm also concerned about the proposal to tie future rate increases to CPI adjustments starting in 2029, which would let tolls climb automatically without requiring a new public vote or hearing process each time.

I urge the board to reject this rate hike and instead pursue a more transparent plan that doesn't lock in open-ended future increases without direct public input.

Thank you for considering my comment.

- Cara McCurdy

Question/Comment:

Illinois is prohibiting tourism,as well as punishing residents who must travel via the toll roads for their living.helpdonthurt

From: Gary Johnson via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 29, 2026 12:53 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Gary Johnson
Email: buzokrep@gmail.com
Zip Code: 60188

Question/Comment:

Please vote to stop the toll hikes. They would be excessive and harmful financially to us average citizens. Further, the tollway revenues in 2025 were more than 1 billion above operating and maintenance expenses, and the tollway was supposed to be free to the consumer in 1973. That's disgusting to the say the least.

Stop this taxing madness

From: Richard Genett via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 29, 2026 8:44 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Richard Genett
Email: rpgenett@yahoo.com
Zip Code: 60422

Question/Comment:

All this Governor has accomplished is raising the cost of living in the state of Illinois. This is another cost of living increase for all working and leisure seeking Americans travelling in the Chicagoland area. The tollway tolls was originally sold as a temporary cost to drivers. Temporary has become 68 years, we were lied to by politicians then and it continues to the present day and now this new scheme. Please reject this excessive toll hike.

From: Terry Semmens via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 29, 2026 9:10 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Terry Semmens
Email: terry.semmens@gmail.com
Zip Code: 60190

Question/Comment:

You are a business that is already making money. Tax increases should only be considered if the Tollway was losing money and could not afford roadway improvements. $1.72 billion buys a lot of improvements.

Question/Comment:

Please stop the toll hike. We are Senior citizens here and the toll hike, with all of the other takes will actually break us. We are living check to check. This isn't fair anymore.

From: John Becker via Illinois Policy <action@illinoispolicy.org>
Sent: Wednesday, July 29, 2026 10:21 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: John Becker
Email: jqbecker@gmail.com
Zip Code: 60515

Question/Comment:

I'd like to get an explanation why a toll hike is needed, when the Tollway has so much waste in the system.

For example: Saturday morning July 26, I was in a massive traffic jam on I-294 southbound around 9:30am. There was a guy sitting in a Tollway pickup truck on his cellphone, with one of those flashing light signs. Is this really a job? How about get out of the truck and direct traffic instead of texting his girlfriend.

On other occasions, I see 3, 4, or 5 trucks all on the side with the flashy light signs, and 1 guy picking up garbage at 7pm in the evening on a Sunday. Nice cushy overtime gig for all 6 guys. Is that really necessary?
Thanks in advance for a cogent reply.

Question/Comment:

I understand the toll roads are bringing in more money than is needed for maintenance. An increase is not needed if that is the case. Thank you. Sincerely yours, Gary Stevens

Question/Comment:

IL Tollway Board of Directors-

Please stop the madness of using the Tollway to fund other projects. The tolls should be used to pay for the roads. The fact that these funds are being used for other "Unknown" IL expenses is unfair, and not appropriate. As an individual who utilizes I-355 daily to go to work, I find the tolls to be getting excessive. I am asking that the other projects be funded with their own mechanism. The toll road authority should not fund any other projects. IL taxpayers should have transparency on where the money is being spent. There is no reason to increase the tolls.

Question/Comment:

The Governance of this state and its institutions is not for the people but for slush funds to cover up years of mismanagement. This is yet another such project. In households we need to budget and hold ourselves accountable for delivering on the budget , or we don't spend. Not in Illinois. We don't do anything to improve and save dollars for our citizens we just raise taxes and fees , not to mention salaries of underperforming elected and appointed officials. Stop this irresponsibility. The Governor should insist on a concrete plan to revitalize and improve transit a responsible budget which means less cost not more. No reason for fare hikes when you haven't even used the money already collected.

Question/Comment:

The parasitic economic model of Illinois government is killing us. The taxation and leadership of our "super" majority legislature and its gubernatorial tete is pathological, not at all responsible or even feasible. We pay for people not from the state to live here rent-free by syphoning the financial tanks of the citizenry. I hear that the Governor is from a family of Hotel moguls. You'd never know it by how he runs (ruins?) this state.

Question/Comment:

Too much money. Too many union bosses on the committee.
Illinois is in debt too much already! Start posting it off.

From: Shirley Schick via Illinois Policy <action@illinoispolicy.org>
Sent: Thursday, July 30, 2026 4:53 PM
To: Board of Directors; governor@state.il.us
Subject: Stop the Tollway Hike

Name: Shirley Schick
Email: schticks.51@att.net
Zip Code: 60133

Question/Comment:

Please do not listen to the governor and consider hiking the tolls on IL tollways. We already pay way too much in taxes. We need to get a list of where all the money currently collected is going. Please consider how hard it is for families just to live these days. Only a communist state would continue raising taxes on it's citizens, like IL is. If on a road repair the contractor is telling you 100.00 for a hammer, you need to find a new contractor.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Victoria Toelle
Email: toellevlt@gmail.com
Zip Code: 61704

Question/Comment:

It's time to start thinking out of the box instead of going to the answer to always increase taxes and fees. A person doesn't go to their employer and say I need more increase in pay to pay not only for my needs but my wants. I wonder has Illinois government seen all the articles and statistics about how bad Illinois is doing rated to other states? Illinois residents have paid to keep roads repaired and resurfaced and yet the roads are in dire need. In Missouri it was noticed a resurfacing of a section of road that looked 100% better than roads in Illinois and it was completed in 4 days. Illinois hasn't changed with its corrupt government. Statistics are proving that our government does not care about the Illinois people. Illinois government is ignoring that so many businesses and people are leaving. It's time to have representation of the whole state and not just Chicago or just make Chicago it's own state so that the rest of the Illinois residents can be represented. It's sad to see the demise of a state that could be so fruitful.

Subject: Stop the Toll Hike

Name: Daniel Cwiak
Email: Cwiakdan@yahoo.com
Zip Code: 60050

Question/Comment:

When will this end? The tollways were built with the promise that they would be FREE within a certain period of time.
That time has come and gone because of an increasing number of vehicles which do not support the roads. Why must it always be the taxpayer who foots the bill?
Let's show some discretion and provide the relief by getting more competitive with our road system. Tighten the belt, close the taxpayer ATM, and give people a chance to stay in lllinois. We can if we want to be a progressive state, instead of one where people only pay the toll on their way out.

From: Eric Roseberg via Illinois Policy <action@illinoispolicy.org>

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Timothy Laud
Email: timlaud@aol.com
Zip Code: 60048

Question/Comment:

This toll hike has no justified purpose other than a money grab. The toll authority has demonstrated a lack of common sense when it comes to financial matters. The warehouse fiasco on the south side as well as the improper choice of contractor on the project south of the airport are examples that the present board is not qualified to manage the present budget, let alone a much larger one. Until the board can demonstrate responsible use of funds, they should not be granted larger responsibility.

To: Board of Directors; governor@state.il.us
Subject: Stop the Toll Hike

Name: Eric Dirst
Email: edirst@comcast.net
Zip Code: 60517

Question/Comment:

This large toll hike is a huge burden to Illinois people already struggling to pay for gas and groceries. Now is not the time for this big a hike, and a much smaller one, if necessary, should obviously be considered. Illinois already has one of the highest tax rates in the country, so further burdening our tax payers will only cause more flight from Illinois and more pain for taxpayers, resulting hopefully in politicians being voted out of office for continuing to de-prioritize the citizens of Illinois and further burden them.

Zip Code: 61073

Question/Comment:

The proposed Toll Hike is NOT necessary!! It is simply a ploy for more Illinois corruption and waste. Illinois roads are no better than Wisconsin's and they manage to stay TOLL FREE. Illinois already takes in the more than is necessary to maintain the roads and adding the unreasonable automatic increases every 2 years just adds insult to an already unbearable tax to an already overburdened middle class who need the roads to get to and from work. You are killing the middle class of Illinois and it is just not sustainable. Additionally, it will drive up an already unbearable cost of living as the trucking industry will pass the increased costs of the tolls onto consumers for basics such as food and other consumer products. NO TOLL INCREASE AND NEVER EVER ANYTHING WITH AUTOMATIC INCREASES. The working class will be priced out of IL. and will only need the tollway to LEAVE the state!

Question/Comment:

Regarding the proposed toll hike, my opinion is NO, NO, NO, NO, NO!

1. When the tollway was built, bonds were sold to pay for the construction. The deal was that tolls would be charged to pay off the bonds, and once the bonds were fully paid, the tolls would no longer be charged. The tollway has not kept that promise.
2. I understand that the tollway still has maintenance expenses, but tollway users still pay gas taxes, which are also used to pay for road maintenance. This is not right. Why should a taxpayer pay more just because they live or work near the wrong expressway?
3. When Governor Pritzker took office, the gas tax was immediately doubled and has increased every year after that. We pay some of the highest gas taxes in the country. Not long ago, we voted on a referendum which required that all gas tax money be spent on road maintenance. It passed, but I understand that it is still being spent on other projects.
4. Part of this toll increase is to be used to build new tollways. If you are going to build new tollways, you should sell bonds and use the tolls to pay for the construction. Once it is paid, the tolls should stop. Of course, you can't make that promise because you are corrupt and have no credibility. Please change that and do the right thing.

Question/Comment:

Illinois is an unbearable place to live, day by day

I'm here because this is where my roots are, my family, and my support. I'm a widow left with 6 kids to finish raising and, by God's grace, was able to purchase a modest home in late 2019... before COVID, before interest rate hikes, and before the outrageous housing market increases.

I work full time and have benefits including a High Deductible Healthcare Plan for my family. I drive 70 miles a day to get to/from work; gas prices are high, car insurance is high, pay $75+ for a high mileage oil change (because even with 800+ credit I can't afford a new car). First you give the convenience of open-road tolling, then penalized people by making them pay twice the toll amount if they paid with cash, you raised tolls, then you outright got rid of the tollbooths ("saving money" by no longer having to pay the employees).

I avoid the tollways, the freeways are always crowded, and are in terrible condition. Who knows how much I've spent over the years on suspension, brakes, rotors, and other routine maintenance (not to mention the preventative maintenance I've had to skip to pay other bills). because going to a mechanic is expensive.

You are out of your ever-loving mind if you think raising the tolls will help anything. It will keep more people off the tollways, which means even fewer people to PAY those tolls, which will then require more reviews of how to generate revenue to pay for the maintenance of the tollways.

You seriously need to consider zero-based budgeting; figure out how to lower the tolls to increase traffic on the tollways so more people pay into the tollway, and plan for the future by saving up for routine expenses. When there is an "excess" in revenue don't jump right away to look at ways you MAY chose to "improve" the system. Start with the basic maintaining that SHALL be done.

There is MUCH more I could add to this but I feel this is probably most relevant. Raising the tolls yet again and BUILDING IN FUTURE RAISES is ill-advised and I oppose it,

Question/Comment:

Hello - Please reject the Toll Hike that could soon be forced on us here in Illinois. I am old enough to remember when tolls were initiated and were supposed to be temporary!! Now we learn that the tolls rake in so much money, they don't even need to use all of it to maintain the roads. Will these increased tolls be like the huge gasoline tax that we pay that is not used for the lawful purpose of roads and instead is diverted elsewhere. Most things are too expensive now and an increase in tolls is not going to help affordability for the people that have to use the tollroads regularly. And lastly, the automatic future yearly increases are a travesty.

Email: 41stwardchicago@gmail.com
Zip Code: 60631

Question/Comment:

Illinois State Toll Highway Authority
Board of Directors
2700 Ogden Avenue
Downers Grove, IL 60515

RE: Strong Opposition to the Proposed Illinois Tollway Rate Increase

Members of the Board,

I write to express my unequivocal opposition to the proposed Illinois Tollway rate increase and to urge the Board to reject this proposal in its current form.

Illinois families, commuters, and businesses are already facing an extraordinary financial burden. The cost of housing, groceries, insurance, utilities, and transportation has risen dramatically over the past several years. Increasing tolls by approximately 57% for passenger vehicles and 30% for commercial vehicles, while also authorizing automatic inflation-based increases every two years beginning in 2029, places yet another financial burden on the very people who keep our state's economy moving.

This proposal asks the public to accept not only one of the largest toll increases in Illinois history, but also to surrender future oversight by allowing recurring increases tied to inflation without meaningful public review or accountability. Once implemented, Illinois drivers would face automatic toll hikes every two years regardless of whether the Tollway has demonstrated improved efficiency, reduced costs, or fulfilled its promises. That is simply unacceptable.

The Tollway has stated that this increase is necessary to fund its proposed $26.5 billion "Driving Connections" capital program. No one disputes the importance of maintaining safe roads and modern infrastructure. However, before asking taxpayers and motorists to pay substantially more, the Board owes the public complete transparency regarding:

Why existing toll revenues are insufficient.
What internal cost-saving measures have been implemented.
Whether every proposed project is truly necessary.
Whether construction contracts have been competitively bid and independently evaluated.

How project costs compare to similar infrastructure projects nationwide.

Illinois residents deserve confidence that every existing dollar is being spent responsibly before they are asked to contribute even more.

Commercial toll increases will inevitably be passed along to consumers through higher prices for food, building materials, retail goods, and countless other products. This proposal will increase the cost of doing business throughout Illinois and make our state less competitive economically.

Equally troubling is the limited timeframe provided for public input on a proposal that will affect millions of Illinoisans for decades to come. A decision of this magnitude deserves a far more robust public engagement process, greater legislative oversight, and independent financial analysis before approval.

Illinois motorists have faithfully paid billions of dollars in tolls over the years with the expectation that those revenues would maintain and improve our tollway system. They should not be treated as an unlimited source of revenue whenever additional spending is proposed.

The Board has a responsibility not only to maintain infrastructure but also to protect the public's trust. That trust requires fiscal discipline, transparency, accountability, and meaningful public participation—not automatic, perpetual increases that remove future opportunities for public input.

For these reasons, I respectfully urge the Illinois Tollway Board of Directors to:

Reject the proposed toll increase.
Reject automatic inflation-based toll increases.
Conduct an independent financial and operational audit before requesting additional revenue.
Expand public engagement and provide greater transparency regarding all proposed capital expenditures.
Explore efficiencies and cost reductions before placing additional burdens on Illinois drivers.

Illinois residents should not be asked to pay substantially more simply because it is easier than demanding greater fiscal accountability. Good government requires difficult decisions, careful stewardship of public funds, and respect for the hardworking families who ultimately bear these costs.

I respectfully ask that this letter be included in the official public record and that the Board vote against the proposed toll increase.

Sincerely,

Goran Davidovac

Question/Comment:

Stop the Toll Hike. You are just stealing the money from your neighbors of Illinois.
Tollway revenues are already at record highs, with $1.3 billion more in revenues in 2025 than operating and maintenance expenses. Since 1973 — the year the system was supposed to become free to drivers — the agency has collected more in tolls each year than it needed to operate and maintain the system.

Submitted to the Illinois Tollway Board of Directors
Regarding the Proposed Driving Connections Capital Program

Submitted by: John Gardiner
Title: Business Manager, Ironworkers Local 1
On behalf of: Ironworkers Local 1, Ironworkers District Council of Chicago & Vicinity
Public Hearing Location: College of DuPage, Student Resource Center — 425 Fawell Boulevard, Glen Ellyn, IL 60137
Date: July 15, 2026

Chairman and Members of the Illinois Tollway Board:
My name is John Gardiner, and I serve as Business Manager of Ironworkers Local 1. I submit this written testimony on behalf of the Ironworkers District Council of Chicago and Ironworkers Local 1 to formally register our strong support for the proposed Driving Connections capital program.

Driving Connections represents a $26.5 billion, 15-year commitment to strengthening the roads, bridges, and interchanges that our region depends on. The proposed program addresses critical safety improvements, congestion reduction, and the modernization of aging infrastructure across every corridor in the Tollway system. Here in DuPage County, the plan includes reconstruction and widening along the Reagan Memorial Tollway (I-88), investments that will directly benefit the safety and commerce of the communities we serve.

This program is about far more than concrete and steel. It represents a long-term investment in the economic health of our region. Modernized corridors and improved interchanges reduce time lost to congestion and allow goods and people to move more efficiently across the state. Just as importantly, this program sustains thousands of good, family-supporting careers in the building trades, putting skilled craftworkers to work on projects that will serve Illinois residents for decades to come.

Ironworkers are the bridge builders of this country. From the bridges that carry these tollways, to the skylines of our cities, to the infrastructure supporting renewable energy sources, our members have built Illinois. We have a long history of partnering with the Tollway and other jurisdictions across the state to deliver projects on time and done right the first time. That track record gives us confidence that this program will deliver real, lasting value to drivers and communities throughout the region.

For these reasons, the Ironworkers District Council of Chicago and Ironworkers Local 1 respectfully urge the Board to move forward with the proposed Driving Connections capital program. We thank the Board for the opportunity to provide both verbal and written testimony on this important proposal.

Respectfully submitted,

John F. Gardiner
Business Manager, Ironworkers Local 1

Illinois Tollway Communications Department
2700 Ogden Avenue
Downers Grove, IL 60515

Re: Opposition to Proposed Illinois Tollway Rate Increases

Dear Illinois Tollway Communications Department,

We strongly oppose the proposed toll increases. Before asking Illinois residents to pay more, the Illinois Tollway should demonstrate that it has thoroughly addressed waste, inefficiency, unnecessary administrative costs, and opportunities to improve operational performance. Taxpayers deserve confidence that every existing dollar is being managed responsibly before they are asked to contribute even more.

Higher tolls disproportionately burden working families, students, commuters, small businesses, and those who have no practical alternative but to use the tollway system every day. These costs accumulate quickly, effectively becoming another tax on people already struggling with the rising costs of housing, groceries, fuel, insurance, and education. Illinois should be making it easier, not more expensive, for people to get to work, attend school, and support their families.

We urge the Illinois Tollway Board to reject any toll increase until it conducts a comprehensive review of its spending, identifies measurable cost-saving efficiencies, and demonstrates a genuine commitment to fiscal responsibility. Illinois residents expect government agencies to manage resources wisely before shifting additional financial burdens onto the public.

Thank you for considering our comments.

Respectfully,

David & Cynthia Schenk

Marengo Illinois 60152

I'm writing because I'm against the raise in tolls. What are we seniors to do on a fix income? We don't get a raise. Prices just keep increasing. How can we visit relatives and friends? It'll be to costly. So fewer times to get together. The tolls were for maintenance not construction. Then another short time the tolls will be raised again. a Poor senior

WRITTEN TESTIMONY

Submitted to the Illinois Tollway Board of Directors

Regarding the Proposed Driving Connections Capital Program

Submitted by: Justin Miner

Title: Business Agent, Ironworkers Local 444

On behalf of: Ironworkers District Council of Chicago and Ironworkers Local 444

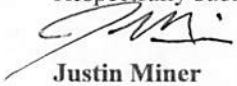
Public Hearing Location: Northern Illinois University, Barsema Alumni Hall Ballroom — 231 N. Annie Glidden Road, DeKalb, IL 60115

Date: July 20, 2026

Chairman and Members of the Illinois Tollway Board:

My name is Justin Miner, and I serve as Business Agent of Ironworkers Local 444, headquartered in Joliet. I submit this written testimony on behalf of the Ironworkers District Council of Chicago and Ironworkers Local 444, whose approximately 800 members work across an 18-county jurisdiction spanning much of northern Illinois, to formally register our strong support for the proposed Driving Connections capital program.

Driving Connections represents a $26.5 billion, 15-year commitment to rebuilding the roads, bridges, and interchanges that our region relies on. Within Local 444's own jurisdiction, the proposed program includes significant investment in Will County: roadway and bridge reconstruction along the South Tri-State Tollway between 159th Street and 95th Street, targeted widening between Illinois Route 394 and 159th Street, and new SmartRoad infrastructure. The plan also includes widening the Veterans Memorial Tollway (I-355) between I-55 and Army Trail Road and rebuilding the I-355/I-88 interchange, projects that run directly through the communities our members call home.



These projects are not abstract to our membership. They are the bridges, structures, and interchanges our ironworkers will erect, weld, and reinforce, work that will keep commerce and commuters moving safely through this corridor for decades to come. This kind of investment also sustains good, family-supporting careers in the building trades and reflects the kind of long-term planning our region needs to remain competitive.

Beyond the immediate construction work, this program supports the apprenticeship and training pipeline that keeps our trade strong for the next generation. Every major structural project funded through this plan is an opportunity to bring new apprentices into the field, train them under experienced journeymen, and build the skilled workforce this region will continue to need long after this program is complete. Investments like these strengthen not just our infrastructure, but the communities and families that depend on stable, well-paying trade careers.

Local 444 has built a strong partnership with the Illinois Tollway over many years, and our members have a proven track record of delivering this kind of work safely, on schedule, and built to last. Ironworkers helped build the skyline of this state and the bridges that connect it, and we are ready to continue that legacy through this program.

For these reasons, the Ironworkers District Council of Chicago and Ironworkers Local 444 respectfully urge the Board to approve the proposed Driving Connections capital program. We thank the Board for the opportunity to provide both verbal and written testimony on this important proposal.

Respectfully submitted,

Justin Miner
Business Agent, Ironworkers Local 444
Ironworkers District Council of Chicago

WRITTEN TESTIMONY

Submitted to the Illinois Tollway Board of Directors

Regarding the Proposed Driving Connections Capital Program

Submitted by: Mark Richeson

Title: Business Manager, Ironworkers Local 498

On behalf of: Ironworkers District Council of Chicago and Ironworkers Local 498

Public Hearing Location: Luna Rochelle — 531 S. 7th Street, Rochelle, IL 61068

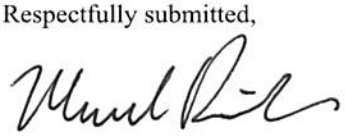
Date: July 23, 2026

Chairman and Members of the Illinois Tollway Board:

My name is Mark Richeson, and I serve as Business Manager of Ironworkers Local 498, headquartered in Rockford and covering a jurisdiction that includes Rochelle and the surrounding Ogle County communities. I submit this written testimony on behalf of the Ironworkers District Council of Chicago and Ironworkers Local 498 to formally register our strong support for the proposed Driving Connections capital program.

Ironworkers Local 498 has served this community since 1916. Our members have raised the steel on many of the structures that define this region, including the many buildings within Rochelle's own industrial park, along with countless bridges that carry Rochelle -area residents to work, school, and home every day. We understand firsthand the value of durable, well-built infrastructure, and we recognize the same value in the Tollway's proposed program.

Our trade's connection to the roads and bridges of this state goes back well over a century. Long before the Illinois Tollway system existed, ironworkers were tying rebar and erecting steel on the bridges that first linked Illinois communities together. When the Tollway began construction in the 1950s, our members were on those original spans, and we have been part of every major capital program since, including Move Illinois and Bridging the Future. Driving Connections is simply the next chapter in a partnership between the ironworker trade and this state's transportation system that has spanned generations.



Driving Connections represents a $26.5 billion, 15-year commitment to rebuilding the roads, bridges, and interchanges that our region relies on. Of direct significance to our jurisdiction, the plan includes a $3.53 billion investment in the Ronald Reagan Memorial Tollway (I-88), rebuilding and reconstruction of the corridor between Highway 251 and the Aurora Toll Plaza to support growing tech, freight and commuter demands plus adding a new western access point. This corridor serves nearly a quarter million travelers daily and is a critical connection between Rochelle, the Chicago region.

For Local 498, this is not a distant or abstract program, it is a direct investment in the communities we serve, from Rockford to Rochelle and across our jurisdiction. It means steady, skilled work for our members, continued opportunities to train the next generation of ironworkers through our apprenticeship program, and a safer, more reliable transportation network for the families and businesses that depend on this corridor every day.

Local 498 has a long history of partnering with the Illinois Tollway on projects along this very corridor, and our members have consistently delivered that work safely, on schedule, and built to last, a standard our trade has upheld on Illinois infrastructure for more than a hundred years. We are ready to continue that legacy through the Driving Connections program.

For these reasons, the Ironworkers District Council of Chicago and Ironworkers Local 498 respectfully urge the Board to approve the proposed Driving Connections capital program. We thank the Board for the opportunity to provide both verbal and written testimony on this important proposal.

Respectfully submitted,

Mark Richeson
Business Manager, Ironworkers Local 498
Ironworkers District Council of Chicago

VILLAGE OF SCHAUMBURG

PROGRESS THROUGH THOUGHTFUL PLANNING

July 29, 2026

Arnie Rivera
Chairman of the Board
Illinois State Toll Highway Authority
2700 Ogden Avenue
Downers Grove, Illinois 60515

Dear Mr. Rivera,

On behalf of the Village of Schaumburg, I want to express our gratitude for this opportunity to provide comment on the initiatives that are outlined in the Driving Connections Capital Plan. Driving connections represents a 15-year, $26.5 billion investment in the Illinois State Toll Highway Authority's 294-mile network. The Village recognizes that the proposed investments included in the new capital plan represent the Tollway's continued commitment to maintaining the network in a good state of repair while also pushing the envelope for modernizing its infrastructure.

We are appreciative of the Tollway's proposal to allocate $34 million to evaluate congestion reduction alternatives at the interchange of I-290, I-90, and IL Route 53. These improvements are desperately needed to resolve snarled traffic and improve the interchange's performance. The interchange has exceeded its design lifetime. Like the other bridges along IL 53 and I-290 in the northwest suburbs, it is time that the interchange be rehabilitated to accommodate the 250,000 vehicles that traverse it every day. These conditions not only affect motorists; they also reduce the reliability of several Pace routes that serve Schaumburg. These are imminent needs, and to that end we support the Tollway taking the lead on the project in partnership with the Illinois Department of Transportation. We believe the Tollway can deliver on the project while fulfilling the wishes of the State and communities surrounding Route 53.

To improve transit access to-and-from Schaumburg, the Village seeks to provide a new bus-on-shoulder station at the Meacham Road interchange. We completed a feasibility study in 2023 to identify the location and configuration with the Tollway's input. The Village wishes to continue development of this bus-on-shoulder station to further the advancement of regional transit initiatives serving Schaumburg and the surrounding Northwest Chicagoland suburbs.

The Village understands that the scope of proposed improvements could not be funded without raising tolls. The system-wide increase of toll rates will represent a substantial increase for Schaumburg commuters and businesses alike, with increases ranging from 30% up to 55% per transaction. The proposed rates will have an impact on all drivers regardless of personal

VILLAGE OF SCHAUMBURG

PROGRESS THROUGH THOUGHTFUL PLANNING

circumstances. When future toll increases are proposed that exceed consumer price index fluctuations, the Tollway should prioritize keeping toll increases to a minimum to reduce the impact on our residents and businesses.

The Village of Schaumburg and Illinois Tollway have had a longstanding and mutually beneficial partnership. We look forward to collaborating with the Tollway to work together to improve mobility, safety, and reliability for commuters and businesses.

Sincerely,

Tom Dailly

WRITTEN COMMENTS

Submitted to the Illinois Tollway Board of Directors

Regarding the Proposed Driving Connections Capital Program

Submitted by: James Gardiner

Title: President, Ironworkers District Council of Chicago & Vicinity

On behalf of: Ironworkers District Council of Chicago & Vicinity, representing 10 affiliated local unions across central and northern Illinois

Date: July 28, 2026

Chairman and Members of the Illinois Tollway Board:

My name is James Gardiner, and I have the privilege of serving as President of the Ironworkers District Council of Chicago & Vicinity. Our District Council represents ten affiliated local unions and thousands of skilled ironworkers across a territory that stretches from Springfield in central Illinois to the borders of Iowa, Wisconsin, and Indiana. On behalf of every one of those locals and every ironworker they represent, I write to express our strong, enthusiastic, and unequivocal support for the Illinois Tollway's proposed Driving Connections capital program.

Ironworkers are the bridge builders of Illinois. For more than a century, our members have climbed the iron, tied the rebar, and raised the steel that holds this state together, literally and figuratively. From the skyline of Chicago to the smallest rural overpass, from the original spans of the Illinois Tollway system in the 1950s to the modern interchanges of today, ironworkers have been present at every stage of this state's infrastructure story. We do not say this to boast. We say it because it is the lens through which our Council views this proposed program: not as a line item in a budget, but as the next chapter in a partnership between the trade that builds Illinois and the agency that keeps it moving.

The scope of Driving Connections is, frankly, historic. A $26.5 billion, 15-year investment touching all five tollways and the 12-county region is exactly the kind of long-range, generational commitment our infrastructure requires, and exactly the kind of program that provides our locals the certainty they need to plan training, staffing, and apprenticeship pipelines for the next decade and a half. This is not simply a construction program. It is a jobs program, a safety program, and an economic development program rolled into one, and our Council views it as such.

The program's interchange and bridge work alone represents an enormous body of skilled ironwork spanning our entire jurisdiction. On the Veterans Memorial Tollway (I-355), the largest single investment in the program at $6.63 billion, crews will rebuild the I-355/I-88 interchange and widen the corridor between I-55 and Army Trail Road, a project our Council understands to include roughly $3.1 billion in interchange improvements alone. Along the Jane Addams Memorial Tollway (I-90), the program will deliver roadway and bridge reconstruction between Rockford and Elgin, eight miles of new SmartRoad, and an expanded interchange at Lee Street. On the South Tri-State Tollway (I-294), crews will rebuild roadway and bridges from 159th Street to 95th Street and widen segments near Illinois Route 394, while the Central Tri-State Tollway will see $1.87 billion in roadway and bridge reconstruction between Balmoral Avenue and Wolf Road, a full interchange rebuild at Irving Park Road, and design of a new

bridge over the Bensenville Railroad Yard. Further west, the Reagan Memorial Tollway (I-88) will see a new access point, reconstruction between Illinois Route 56 and Illinois Route 251, and widening between the Aurora Toll Plaza and the Eisenhower Expressway. And through the Illinois Route 390/I-490 corridor, the Tollway's partnership with the Chicago Department of Aviation will deliver a new interchange and rehabilitated roadway supporting continued airport development.

Every one of these projects means iron in the ground and ironworkers on the job. This is precisely the kind of work our ten locals were built to perform, and precisely the kind of investment that keeps skilled trades careers strong, family-supporting, and available to the next generation of Illinois workers who choose to pick up a torch or tie rebar for a living.

Our Council's support for this program is not merely words on a page. It has been demonstrated in person and on the record through the testimony of our own local union leadership at Tollway public hearings across the region, including Ironworkers Local 1, Ironworkers Local 444, and Ironworkers Local 498, each of whom appeared to speak directly to the projects within their own jurisdictions and the benefits this program will bring to their members and communities. Their testimony, and this letter, reflect the same unified message from every corner of our District Council: this program is good for Illinois, good for the traveling public, and good for the working men and women who will build it.

The Illinois Tollway has a long and proud history of partnering with the building trades to deliver projects safely, on time, and built to the highest standard, and our ironworkers have been proud partners in that legacy for generations. We are confident that history will continue through Driving Connections, and we look forward to standing shoulder to shoulder with the Tollway as this program moves from proposal to steel in the ground.

On behalf of the Ironworkers District Council of Chicago & Vicinity and our ten affiliated local unions, I respectfully urge the Board to approve the proposed Driving Connections capital program. Thank you for your consideration and for the opportunity to submit these comments for the public record.

Respectfully submitted,

James Gardiner

RE: CMAP Support for the Illinois Tollway's *Driving Connections* Capital Program

Dear Executive Director Rouse:

On behalf of the Chicago Metropolitan Agency for Planning (CMAP), thank you for the opportunity to review and comment on the Illinois Tollway's proposed 15-year, $26.5 billion capital program, *Driving Connections*. The program represents a major long-term commitment to strengthening northeastern Illinois' transportation network and advancing the shared goals of safety, mobility, economic prosperity, and regional resilience. The Tollway's extensive multi-year outreach process and resulting program goals reflect thoughtful stewardship of our transportation system and align with CMAP's draft Regional Transportation Plan (RTP).

As the metropolitan planning organization for northeastern Illinois, CMAP guides investment decisions that maintain, modernize, and strategically expand our multimodal system. We are encouraged by the Tollway's balanced approach, which recognizes both sides of the transportation ledger: the need for new revenues to responsibly operate and expand the system, and the equally critical need to invest in the assets we already rely on every day. *Driving Connections* effectively embodies this principle by pairing system renewal, targeted expansion, and technological transformation with a long-term funding strategy rooted in user fees.

CMAP offers the following comments on how Driving Connections aligns with regional goals, priorities, and needs:

Board Members
Gerald Bennett, Chair
Frank Beal
Matthew Brolley
Jada Curry
Gary Grasso
Paul Hoefert

Non-voting Members
Abolfazl Mohammadian

Executive Director
Erin Aleman

Strengthening the system
The program's commitment to renewing and rebuilding existing infrastructure — including roadway and bridge rehabilitation, corridor modernization, reconstruction of aging facilities, and systemwide safety improvements — supports CMAP's priority to maintain the region's transportation system in a state of good repair. The Tollway's focus on high-impact needs ensures that resources are directed where they will provide the greatest benefit for the region.

Driving economic growth
CMAP strongly supports investments that improve access to job centers, freight hubs, and tourist destinations. The program's emphasis on reducing congestion, enhancing travel reliability, and improving critical interchanges aligns with the RTP's economic development strategies and supports efficient movement of people and goods across northeastern Illinois.

Maximizing prior investments
The decision to build on the foundation of past capital programs — *Move Illinois* and *Bridging the Future* — demonstrates responsible reinvestment in corridors where improvements are already underway. This approach aligns with CMAP's long-standing principle that agencies should maximize the return on previous investments through smart sequencing and thoughtful completion of partially implemented projects.

Advancing regional access through partnerships
The proposed Corridor Opportunities for Regional Enhancements (CORE) initiative is among the most promising elements of the program. By prioritizing multi-agency coordination and setting aside funding for intergovernmental projects, CORE offers a pathway to expand modal options, improve regional connectivity, and address multimodal bottlenecks that no single agency can resolve alone. CMAP believes CORE can amplify the Tollway's strengths while supporting shared regional priorities across partners including the Illinois Department of Transportation, the Chicago Department of Aviation, local governments, and transit agencies.

Transforming the system with technology
The Tollway's proposed investments in SmartRoads, fiber infrastructure, customer-facing technologies, and sustainability initiatives align well with the RTP's call for innovation in operations, safety management, and system efficiency. Integrating intelligent transportation technologies will be essential for managing demand, improving travel reliability, and supporting future transit opportunities along Tollway corridors.

Balanced funding and long-term value
The Tollway's funding strategy — long-term bond financing supported by incremental toll rate adjustments — reflects a responsible user-fee model that ensures transparency and predictability. The proposed structure provides a stable foundation for the program's 15-year horizon and enables the region to make meaningful progress on projects that have systemwide benefits.

CMAP appreciates the Tollway's thoughtful approach to *Driving Connections*. The program meaningfully aligns with regional transportation priorities, reflects responsible and balanced investment principles, and offers a strong vision for how the Tollway can support the prosperity and resilience of northeastern Illinois.

We look forward to continued collaboration as the program moves forward. CMAP stands ready to be a partner to advance the CORE initiative, coordinate across agencies, align program investments with the final Regional Transportation Plan, and support implementation of shared priorities.

Sincerely,

Erin Aleman

STATE SENATOR • 45TH DISTRICT

August 3, 2026

Chairman Arnie Rivera
Illinois Tollway
2700 Ogden Avenue
Downers Grove, IL 60515

Dear Chairman Rivera,

I am writing as a follow up acknowledgement to the public comments my office submitted on behalf of the residents of Illinois' 45th Senate District to ensure their voices are heard regarding the Illinois Tollway's proposed rate increase. The message I have received from constituents over the past several weeks has been clear and consistent: they overwhelmingly oppose this proposal.

No one disputes the importance of maintaining safe, reliable roads and investing in critical infrastructure. Illinois motorists expect a transportation system that is well maintained, and I support responsible investments that keep our roadways safe. However, those investments must be balanced with the financial realities facing the families, workers, commuters and businesses that rely on our tollways every day.

Illinois already carries one of the highest tax burdens in the country. Families continue to face rising costs for groceries, housing, utilities, insurance and other everyday necessities. Employers are struggling with higher operating costs, and many commuters are already stretching their household budgets. Against that backdrop, asking Illinoisans to absorb the largest tollway rate increase in state history sends the wrong message.

Over the past several weeks, my office has heard from thousands of residents through calls, social media, emails and responses to our districtwide survey. Their concerns have been remarkably consistent. They believe this proposal places yet another financial burden on taxpayers who already contribute more than enough.

As elected officials and public servants, we have a responsibility to listen to the people we represent. The residents of the 45th District have spoken, and they deserve to know their concerns are being taken seriously. I respectfully urge the Illinois Tollway to reconsider this proposal, explore cost-saving alternatives and work toward solutions that maintain our transportation infrastructure without placing additional financial strain on Illinois families and employers.

Thank you for your time and consideration. I appreciate your willingness to review the concerns of the people I represent, and I hope their voices will play a meaningful role as the Tollway moves forward with this decision.

Sincerely,

Andrew S. Chesney
State Senator - 45th District

Subject: DuPage County support and comments
re: Driving Connections Capital Program

Dear Director Rouse,

We share your enthusiasm for the proposed Driving Connections capital program. The program hits the mark on the important projects and areas of need in the region. DuPage County is excited for the program because it focuses so much on critical facilities in DuPage County.

The Tollway has become inextricably linked to the health and growth of businesses in DuPage County and to the accessibility of all areas of the six-county region. In addition, labor representatives and business advocates clearly support the program for the benefits it offers through construction and maintenance contracts. We know that those contracts have positive multiplicative effects throughout the economy.

DuPage County leadership and staff appreciate the excellent working relationship we have established through the years and look forward to building upon that through cooperative projects and initiatives. Our team has compiled some comments, attached, that we offer in the spirit of coordination and shared mission. Please feel free to contact Director Travia or John Loper in the Division of Transportation for any follow-up discussions you think might prove useful as you progress into the Driving Connections Program.

Very truly,

Deborah A. Conroy,
Chair, DuPage County Board

cc: Stephen M. Travia, Director, DuDOT
John Loper, Chief Transportation Planner, DuDOT

2026 Driving Connections Capital Program
DuPage County Comments

DuPage County offers the following comments pertaining to items mentioned and unmentioned in the Program. Comments are organized in consideration of the program goals and corridors outlined by the program.

Strengthening the system: DuPage County agrees that system renewal and maintaining a state of good repair for safety and performance is of paramount importance. There were many discussions as part of early IL 390 planning about tolling the I-290 extension from Elmhurst to I-90 when federal legislation offers a more efficacious process. With rising gas prices and commuters and commercial trucking watching the bottom line, it occurs to the county that I-490 and IL 390 may experience less demand and hence lower revenues as long as I-290 is not tolled. Tolling this facility would ultimately benefit the I-290 corridor and its state of good repair as well as perhaps balancing longer distance system utilization.

Strengthening the system in our eyes includes ***corridor modernization.*** Here, we urge the Tollway to consider greater collaboration with the County and IDOT to improve "cross-corridor" bike and pedestrian accommodations with enhanced lighting for safety. The county has received many comments over the years and through many public comment events that access over or under tollways is extremely difficult without sidewalk and pedestrian signals. The county has been a strong advocate for enhanced interchange design to benefit continuity of non-motorized travel across the county.

Driving Economic Growth: As part of the IL 390 planning, the County and Tollway believed that the opening of the Western O'Hare Access gateway would most likely require some sort of transit access along the 390 from Hanover Park or Schaumburg to Western Access, and that planning for bus on shoulder in BRT style would be a logical step after all ramps and access points are constructed. The 390 has delivered in terms of congestion reduction and travel efficiency in northeast DuPage County but we believe that it is time to re-evaluate transit accommodations with the new NITA and the Pace reVision process. Easy on/off or transit pull-offs at major centers like Hamilton Lakes should be considered.

Maximizing Prior Investment: DuPage County is extremely supportive of this goal. We are sincerely appreciative of your efforts to include local agencies in the I-355/I-88 interchange work. We will continue to be interested in the ideas that emerge from the environmental and design phases of that project. A number of interchange locations have been on the county's project radar for a decade or more. These are enumerated in no particular order below:

1. I-88 Westbound off-ramp between Highland Avenue and Midwest Road*
2. 31st Street at I-294 interchange
3. 22nd Street at I-294 interchange**
4. US 34/Ogden Avenue at I-294 interchange
5. Bridge/underpass improvements including:
    a. Eola Road at I-88 for bike-ped accommodations
    b. Mill Street at I-88 for bike-ped accommodations
    c. Finley Road at I-88 and I-355 bike-ped accommodations
    d. Army Trail Road at I-355 – sidewalk and lighting
    e. Maple Avenue at I-355 traffic signal and pedestrian accommodations
6. Extension of IL 390 ramps to County Farm Road and new County Farm Road alignment
    a. IL 390 gateway aesthetics relocation

'* For congestion and safety relief of Highland Avenue overpass at I-88 and Butterfield Road.
'** Interchange modernization, pedestrian accommodations and potential Pace expressway terminal

Expanding Regional Access: Having already identified non-motorized cross-corridor access priorities, the County would only add that the organization is appreciative of the Tollway's willingness to consider ways to help create an East Branch DuPage River Trail (EBDRT) alignment using I-355 right of way. The County would like to discuss with Tollway other capital, drainage and environmental improvements pertaining to the EBDRT. This non-motorized corridor will parallel I-355 in the northern two-thirds of the county and we believe there may be more opportunities for stormwater mitigation that would benefit both agencies.

Transform with Technology: DuPage County DOT is supportive of the Tollway's SmartRoads ITS initiatives. DuPage County DOT has utilized tollway fiber in a number of corridors to date and there are active intergovernmental agreements covering use of fiber. As DuPage County expands the reach of its ITS systems and virtual monitoring, we ask that Tollway review and consider DuDOT requests for use of fiber to access more distant portions of the county's signal systems. Multi-party agreements with IDOT, Tollway and County would greatly benefit the chances of creating region-wide traffic monitoring through a regional TMC. The County would also appreciate continued discussion with the Tollway centered around arterial level SmartRoad ATIS systems on principal arterials like Army Trail Road, 75th Street, Naperville Road, Highland Avenue, and Eola Road.

It is our hope that many of these suggestions and ideas resonate with your program and will lead to greater intergovernmental cooperation in the future.

LINE, SIMILIAR TO EUROPEAN RAIL LINES. VISCONSIN TO
INDIANA HAS SIMILIAR. THIS WOULD BE MORE BENEFICIAL
TO ALL, AS OPPOSED TO MORE TRAFFIC, MORE POLLUTION
+ INCREASED EXPENSE TO TAXPAYERS.

Comment: *(optional)*

The money from the Road Fund ($1.5 billion) should be used for the highways, not public transportation. This should not be an automatic process every 5 years. Don't the taxpayers have the right to say how their money is being used?

Enough is enough. Everyday citizens can not afford these tolls. Money was allocated for the tollway. Where is that money? Once again we are being taken advantage of. This is a disgrace, but I know you don't care. Just take care of yourself.

The price increase is excessive compared to the cost of living. I will have to figure out non-toll routes if this passes, since I believe the new proposed toll costs are going to be to expensive for my budget.

When will the greed stop!! There is NO clear JUSTIFICATION for an increase on IL Tolls! No proof that Raising Fees improves anything at IL Tollway or Services. Additionally, there have been NO accountability for the Spending at the IL Tollway. Nor has there been accountability for the amount of BILLIONS this INSTITUTION has/have received! (Independent oversight needed)! Seniors on fixed incomes should be EXEMPT from all Tolls – this increase is a hardship and an additional burden on Seniors who BUILT IL – LASTLY CEO + others become wealthy on this slush fund but provide rogue + sometimes political Decisions - When money is involved - NEED AN INDEPENDENT COUNCIL – A PUBLIC source to monitor

As of 1972 - The Tollway Roads are supposed to be FREE. There should not be any Toll Increases - Make all Tollway Roads Free From Tolls. The Tollway has made Enough money to maintain all the Roads. They took in (2.8 Billion) in Tolls Since 1972 To 2025. Because you are still collecting Tolls, You are Putting a Monetary Burden on all The citizens of Ill. Because Trucking companies Add the Toll cost To all of the citizens Because the cost of Goods are passed on To Everyone! Help The working People save money by Stopping the Tolls

Thank you

I don't understand why public transportation received $1.5 billion dollars from the state that was intended for highway construction. Where is the accountability and fairness in this decision? How much extra do the people who use public transportation have to spend? Don't you see something wrong with this decision? Perhaps the tolls could increase 15 cents and public transportation could increase 25 cents. Seems more fair than the current plan!

At the meeting in Markham on July 15, all of the people who spoke in favor of the increase plan to profit on it — owners of construction and engineering companies, their employees, construction workers, and union members. Those who oppose the increase are working families, commuters who have only one way to get to work, senior citizens who are on a fixed income, and independent drivers like Uber and towing firms. Why was money from the Road Fund used for public transportation? Public transportation riders were not raised one penny!!!
